

I: General Considerations

1. History of Liver Transplantation, 2. Surgical Anatomy of the Liver, 3. Molecular and Cellular Basics of Liver Failure, 4. Influence of Transplantation on Liver Surgery, 5. Organ Allocation: The US Model, 6. Organ Allocation: The European Models, 7. Donation After Cardiac or Brain Death: Regulatory and Ethical Principles

II: Patient Evaluation: Adult

8. Current Indications, Contraindications, Delisting Criteria and Timing for Transplantation, 9. Transplantation for Hepatitis A and B, 10. Natural History of Hepatitis C, 11. Transplantation for Hepatitis C, 12. Transplantation for Fulminant Hepatic Failure, 13. Transplantation for Primary Biliary Cirrhosis, 14. Transplantation for Sclerosing Cholangitis, 15. Transplantation for Autoimmune Hepatitis, 16. Transplantation for Primary Hepatic Malignancy, 17. Transplantation for Cholangiocarcinoma, 18. Transplantation for Metastases, 19. Transplantation for Hematological Disorders, 20. Transplantation for Budd-Chiari Syndrome, 21. Transplantation for Alcoholic Liver Disease, 22. Transplantation for Nonalcoholic Steatohepatitis, 23. Unusual Indications for Transplantation

III: Patient Evaluation: Pediatric

24. General Criteria for Transplantation in Children, 25. Transplantation for Cholestatic Liver Disease in Children, 26. Transplantation for Biliary Atresia in Children, 27. Transplantation for Metabolic Disease in Children, 28. Transplantation for Hepatic Malignancy in Children

IV: Special Considerations in Patient Evaluation

29. Ethical Decisions in Transplantation, 30. Psychiatric Assessment of Liver Transplant Candidates, 31. Pretransplantation Evaluation: Cardiac, 32. Pretransplantation Evaluation: Renal, 33. Pretransplantation Evaluation: Infectious Disease, 34. Role of the Clinical Nurse Coordinator, 35. Radiological Evaluation in Transplantation, 36. Monitoring and Care, 37. Nutritional Aspects of Transplantation in Adults, 38. Management of Portal Hypertensive Hemorrhage, 39. Portopulmonary Hypertension and Hepatopulmonary Syndrome

V: Operation

40. Donor Selection and Management, 41. Extended Criteria Donors, 42. Donating After Cardiac Death, 43. The Donor Operation, 44. Principles of Liver Preservation, 45. Recipient Hepatectomy and Grafting, 46. Anesthesia for Liver Transplantation

VI: Split and Living Donor Transplantation

47. Imaging Techniques for Partial Grafting, 48. Living Donor Transplantation in Children, 49. Living Donor Transplantation: Evaluation and Selection in Adults, 50. Adult Living Donor Right Hepatectomy and Recipient Operation, 51. Adult Living Donor Left Hepatectomy and Recipient Operation, 52. Split Liver Transplantation for Pediatric and Adult Recipients, 53. Split Liver Transplantation for Two Adult Recipients, 54. Biliary and Vascular Reconstruction in Living Donor Transplantation, 55. Small-for-Size Syndrome, 56. Minimally Invasive Living Donor Hepatectomy, 57. Dual Grafts for Transplantation, 58.

Outcomes of Living Donor Transplantation: The Western Perspective, 59. Outcomes of Living Donor Transplantation: The Eastern Perspective, 60. Ethics of Living Donor Transplantation

VII: Unusual Operative Problems

61. Arterial Reconstruction Pitfalls, 62. Portal Vein Thrombosis and Other Venous Anomalies, 63. Combined Liver-Kidney Transplantation, 64. Retransplantation, 65. Clinical Management of Necrotic Liver Before and After Transplantation, 66. Intestinal and Multivisceral Transplantation, 67. Transplantation: Situs Inversus and Polysplenia Syndrome, 68. Auxiliary Transplantation

VIII: Postoperative Care

69. Postoperative Intensive Care Management in Adults, 70. Postoperative Intensive Care Management in Children, 71. Postoperative Management Beyond the Intensive Care Unit: Adults, 72. Postoperative Care of Pediatric Transplant Recipients, 73. Transition of Pediatric Patients to Adulthood, 74. Renal Failure in Adults, 75. Graft Failure, 76. Technical Problems: Biliary, 77. Arterial Complications after Transplantation, 78. Infections After Transplantation, 79. Recurrent Hepatitis C After Transplantation, 80. Late Complications and Recurrence of Disease After Transplantation, 81. Neuropsychiatric Complications, 82. Neurological Complications, 83. Role of the Posttransplantation Clinical Nurse Coordinator

IX: Transplant Pathology

84. Histopathology of Liver Transplantation, 85. Pathology of NonNeoplastic Disease After Transplantation, 86. Transplant-Related Malignancies

X: Immunology of Liver Transplantation

87. Rejection After Transplantation, 88. Leukocyte Chimerism- Meaning and Consequences, 89. ABO, Tissue Typing and Crossmatching Incompatibility, 90. Graft-Versus-Host Disease

XI: Immunosuppression

91. Induction and Maintenance of Immunosuppression, 92. Special Considerations for Immunosuppression In Children, 93. Treatment of Acute and Chronic Rejection, 94. Novel Immunosuppression of Patients with Hepatic Malignancies, 95. Novel Immunosuppressive Drugs, 96. Immunosuppressive Biologic Agents, 97. Long-term Toxicity of Immunosuppressive Therapy

XII: Survival and Results

98. Outcome Predictors in Transplantation, 99. U.S. Trends in Transplantation, 100. Long-term Functional Recovery and Quality of Life, 101. Survival and Quality of Life in Children

XIII: Future Developments in Liver Transplantation

102. Genetic and Genomic Potentials in Liver Transplantation, 103. Liver and Hepatocyte Xenotransplantation, 104. Stem Cell and Liver Regeneration, 105. Ischemia-Reperfusion Injury in Liver Transplantation, 106. Extracorporeal Perfusion for Resuscitation of Marginal Grafts, 107. Current Clinical Status of Extracorporeal Devices
