

Section I: Foundational Concepts in Rehabilitation

- **1 Psychological Factors in Rehabilitation**
- **2 Physiological Factors in Rehabilitation**
- **3 Developing Treatment Pathways**
- **4 Principles of Rehabilitation**
- **5 Measurement in Rehabilitation**
- **6 Range of Motion and Flexibility**
- **7 Principles of Rehabilitation for Muscle and Tendon Injuries**
- **8 Therapeutic Modalities as an Adjunct to Rehabilitation**
- **9 Rehabilitation Considerations for the Female Athlete**
- **10 Biomechanical Implications in Shoulder and Knee Rehabilitation**
- **11 Aquatic Rehabilitation**

Section II: Upper Extremity

- **12 Shoulder Rehabilitation**
- **13 Rehabilitation of Elbow Injuries**
- **14 Rehabilitation of Wrist and Hand Injuries**

Section III: Spine

- **15 Temporomandibular Joint**
- **16 Cervical Spine Rehabilitation**
- **17 Low Back Rehabilitation**

Section IV: Lower Extremity

- **18 Rehabilitation of Thigh Injuries**
- **19 Knee Rehabilitation**
- **20 Lower Leg, Ankle and Foot Rehabilitation**
- **21 Clinical Gait Assessment**

Section V: Restoration of Athletic Performance

- **22 Functional Movement Assessment**
- **23 Functional Training and Advanced Rehabilitation**
- **24 Proprioception and Neuromuscular Control**
- **25 Application of Isokinetics in Testing and Rehabilitation**
- **26 Plyometric Training and Drills**
