Patient Study 5 40-year-old man and the perils of walking in the street (1997) 30

Patient Study 6 54-year-old man with dyspnea and a lifelong murmur (1974) 37

Patient Study 7 26-year-old man with an asymptomatic heart murmur (1979) 44

Patient Study 8 20-year-old man with chest pain and a life-long heart murmur (1979) 50

Patient Study 9 23-year-old female with heart failure and a heart murmur (1975) 59

Patient Study 10 17-year-old man with fever, myalgias, and a heart murmur (1977) 71

Patient Study 11 24-year-old man with left leg pain (1977) 80

Patient Study 12 48-year-old female with dyspnea (1976) 87

Patient Study 13 19-year-old man with easy fatiguability, cyanosis, and clubbing (1977) 93

Patient Study 14 29-year-old man with an asymptomatic murmur and an abnormal chest X ray (1977) 100

Patient Study 15 32-year-old man with a history of dyspnea and syncope over last 38 years (1967) 107

Patient Study 16 55-year-old female with chest pain and hematemesis (1993) 120

Patient Study 17 27-year-old man with decreased exercise tolerance and a heart murmur (1982) 126

Patient Study 18 29-year-old man with pleuritic chest pain, dyspnea, and cardiomegaly (1985) 135

Patient Study 19 25-year-old man with new onset of hemoptysis (1986) 142

Patient Study 20 80-year-old man with hemoptysis and dyspnea (1998) 149

Patient Study 21 21-year-old man with hemoptysis, cyanosis, and a heart murmur (1989) 157

Patient Study 22 23-year-old female with chest pain and visual symptoms (1992) 167

Patient Study 23 Approximately 40-year-old man with new onset of a murmur and heart failure (1975) 173

Patient Study 24 54-year-old female with altered mental status (1993) 182

Patient Study 25 74-year-old female admitted with abdominal pain followed by shock (1994) 187

Patient Study 26 Approximately 82-year-old female admitted with recurrent lower GI bleeding and a known abdominal aortic aneurysm (2001) 191

Patient Study 27 41-year-old female with chest pain and a heart murmur (1994) 197

Patient Study 28 48-year-old man with leg numbness and weakness (1994) 201

Patient Study 29 67-year-old female with chest pain and a new heart murmur (1995) 208

Patient Study 30 62-year-old man with chest pain and hypertension (1996) 214

Patient Study 31 17-year-old female with fatigue and a heart murmur (1997) 219

Patient Study 32 31-year-old female with fatigue and syncope (1997) 224

Patient Study 33 33-year-old female with dyspnea, edema, and a murmur (1995) 231

Patient Study 34 21-year-old man with dyspnea and chest pain (1995) 238

Patient Study 35 54-year-old man with chest pain, hypertension, and abdominal pain (2005) 245

Patient Study 36 19-year-old female with aching legs on exertion (1995) 249

- Patient Study 37 58-year-old man with dyspnea, chest pain, and Sjorgen's syndrome (1996) 256**
- Patient Study 38 37-year-old ex cocaine user with dyspnea and a heart murmur (1998) 261**
- Patient Study 39 24-year-old female with a heart murmur (1997) 266**
- Patient Study 40 34-year-old Asian female with heart failure(2001) 272**
- Patient Study 41 73-year-old man with chest pain and hypertension (2000) 278**
- Patient Study 42 42-year-old female with dyspnea and a heart murmur (2001) 283**
- Patient Study 43 37-year-old female with dyspnea and cyanosis (1999) 289**
- Patient Study 44 27-year-old female with dyspnea, a murmur, and kyphoscoliosis (1996) 296**
- Patient Study 45 41-year-old man with presumed cardiomyopathy (2002) 302**
- Patient Study 46 78-year-old female with chest pain and a heart murmur (2002) 310**
- Patient Study 47 31-year-old man with long-standing clubbing (1997) 317**
- Patient Study 48 79-year-old man with dyspnea and edema 3 years after an operation (1995) 328**
- Patient Study 49 37-year-old female with recurrent syncope and heart failure (1984) 336**
- Patient Study 50 33-year-old man with new onset of hemiplegia (1985) 342**
- Patient Study 51 44-year-old female with chest pain and dyspnea (2008) 345**
- Patient Study 52 80-year-old diabetic female with an abnormal echocardiogram and no CVS symptoms (2008) 352**
- Patient Study 53 42-year-old female with palpitations and an abnormal echocardiogram (2006) 355**
- Patient Study 54 53-year-old alcoholic man and the perils of winter (2009) 360**
- Patient Studies 55–56 90-year-old female with dyspnea and hemoptysis (2000) 366**
- Patient Study 57 1-month-old Infant with unsuspected cardiac pathology on echocardiography (2002) 372**

Patient Study 58 69-year-old man with lower extremity pain (2008)	374
Patient Study 59 71-year-old man with dizziness and weakness (2010)	379
Patient Study 60 20-year-old man with pleuritis and fever (1995)	383
Patient Study 61 20-year-old man with swollen face and chest pain (2008)	389
Patient Study 62 17-year-old female with an acute myocardial infarction (2013)	395
Patient Study 63 66-year-old diabetic female with ICD dysfunction (2008)	401
Patient Study 64 39-year-old man with chest pain and syncope (2011)	406
Patient Study 65 58-year-old female with dyspnea, hypertension, and hematuria (2008)	413
