

16.01.01: Blood vessels and the endothelium
16.01.02: Clinical physiology of the normal heart
16.02.01: Chest pain, breathlessness and fatigue
16.02.02: Syncope and palpitation
16.03.01: Electrocardiography
16.03.02: Echocardiography
16.03.03: Cardiac investigations: nuclear and other imaging techniques
16.03.04: Cardiac catheterisation and angiography
16.04: Cardiac arrhythmias
16.05.01: Cardiac failure - epidemiology & physiology
16.05.02: Acute cardiac failure & pulmonary oedema
16.05.03: Chronic cardiac failure - investigation & management
16.05.04: Cardiorenal syndrome
16.05.05: Cardiac transplantation and mechanical circulatory support
16.06: Heart valve disease
16.07.01: Acute myocarditis
16.07.02: The cardiomyopathies: hypertrophic, dilated, restrictive and right ventricular
16.07.03: Secondary to systemic disorders
16.08: Pericardial disease
16.09.01: Acute rheumatic fever
16.09.02: Infective endocarditis
16.09.03: Cardiac disease in HIV infection
16.09.04: Cardiovascular syphilis
16.10: Tumours of the heart
16.11: Cardiac involvement in genetic disease
16.12: Congenital heart disease in the adult
16.13.01: Biology & pathology of atherosclerosis
16.13.02: Coronary heart disease: epidemiology and prevention
16.13.03: Management of stable angina
16.13.04: Management of acute coronary syndromes
16.13.05: Percutaneous interventional cardiac procedures
16.13.06: Coronary artery bypass surgery
16.14.01: Thoracic aortic dissection - rename acute aortic syndromes
16.14.02: Peripheral arterial disease
16.14.03: Cholesterol embolism
16.14.04: Takayasu arteritis
16.15.01: Structure and function
16.15.02: Pulmonary hypertension
16.16.01: Deep venous thrombosis and pulmonary embolism
16.16.02: Therapeutic anticoagulation
16.17.01: Essential hypertension: definition, epidemiology and pathophysiology
16.17.02: Diagnosis, assessment and treatment of essential hypertension
16.17.03: Secondary hypertension
16.17.04: Mendelian disorders causing hypertension
16.17.05: Hypertensive urgencies and emergencies

16.18: Chronic peripheral oedema and lymphoedema

16.19: Idiopathic oedema of women
