

1. Basic science

1.1 Applied surgical anatomy

1.1.1: Anatomy of the thorax, *Vishy Mahadevan*

1.1.2: Anatomy of the abdomen, *Vishy Mahadevan*

1.1.3: Anatomy of the pelvis and perineum, *Vishy Mahadevan*

1.1.4: Anatomy of the limbs and spine, *Vishy Mahadevan*

1.1.5: Head and neck anatomy, *Vishy Mahadevan*

1.1.6: Neuroanatomy, *Vishy Mahadevan*

1.2 Applied surgical physiology

1.2.1: Introduction to applied surgical physiology, *David Adams*

1.2.2: Metabolic pathways, nutrition, and abnormalities, *Judy Harmey*

1.2.3: Blood loss, hypovolaemic shock, and septic shock, *Andrew Topping*

1.2.4: Fluid and electrolyte balance and replacement: Acid-base balance, *Catriona Kelly, Rosalind O' Reilly, and Brian Mullan*

1.2.5: Haemostasis and thrombosis, *Dermot Cox*

1.2.6: Cardiovascular, *Aidan Bradford*

1.2.7: Respiratory, *Aidan Bradford*

1.2.8: Gastrointestinal, *Aidan Bradford*

1.2.9: Urinary, *Aidan Bradford*

1.2.10: Endocrine, *Kamalan Jeevaratnam*

1.2.11: Neurology, *Kamalan Jeevaratnam*

1.3 Applied surgical pharmacology

1.3.1: Essential pharmacology for surgeons, *Chris Brearton*

1.4 Applied surgical pathology

1.4.1: Pathology, *David Lowe*

1.5 Applied surgical microbiology

1.5.1: Sepsis, *Muhammad Raza*

1.5.2: Skin and soft tissue infections, *Manjusa Narayan and Jonathan Moore*

1.5.3: Healthcare-associated infection, *Allison Sykes*

1.5.4: Blood borne viruses, *Shirelle Burton-Fanning and Sheila Waugh*

1.5.5: Asepsis, *Louise Hall*

1.6 Applied surgical radiology

1.6.1: Plain film radiology for surgeons, *Jonathan Spratt*

1.6.2: Nuclear medicine for surgeons, *Ian Minty*

1.6.3: PETCT for surgeons, *Ian Minty*

1.6.4: MRI for surgeons, *Ishmael Chasi*

1.6.5: CT for surgeons, *Pallavi Mehrotra*

1.6.6: Ultrasound for surgeons, *Robert Kent*

1.6.7: Essential interventional radiology for surgeons, *Daniel Kusumawidjaja and Peter A. Gaines*

2. Common surgical conditions

2.1 Assessing the acute abdomen

2.1.1: Assessing the acute abdomen, *Tom Wiggins and James N. Crinnion*

2.2 Abdominal wall and hernias

2.2.1: Abdominal wall and hernias, *Peter Sedman*

2.3 Upper gastro-oesophageal surgery

2.3.1: Upper gastro-oesophageal surgery, *Bill Allum*

2.4 Hepato-pancreato-biliary disorders

2.4.1: Hepato-pancreato-biliary disorders, *Graeme Poston and Robert Jones*

2.5 Colorectal

2.5.1: Colorectal, *Adam Kimble and Ken Hosie*

2.6 Breast Surgery

2.6.1: Clinical assessment and management of benign breast disease, *Amit Goyal and Malcolm Reed*

2.6.2: Breast cancer treatment, *Amit Goyal and Malcolm Reed*

2.6.3: Non-surgical treatment of breast cancer, *Mymoona Alzouebi and Matthew Hatton*

2.7 Vascular surgery

2.7.1: Chronic arterial insufficiency, *Christopher Butler*

2.7.2: Acute limb ischaemia, *Frank Smith and Timothy Beckitt*

2.7.3: Venous and lymphatic disease, *Andrew W Bradbury and Katy Darvall*

2.7.4: Aneurysms, *Rob Sayers and Robert Davies*

2.7.5: Transient ischaemic attacks and stroke, *Ross Naylor*

2.8 Cardiac and pulmonary surgery

2.8.1: Cardiac surgery, *Leslie Hamilton*

- 2.8.2: Pulmonary surgery, *Sasha Stamenkovic***
- 2.9 Genitourinary surgery**
 - 2.9.1: Stones and infections, *Neil Burgess***
 - 2.9.2: Genitourinary malignancies, *Jim Catto and Aidan Noon***
 - 2.9.3: Benign prostatic hyperplasia and obstructive uropathy, *Mary Garthwaite***
 - 2.9.4: Benign scrotal and penile conditions, *Ian Eardley***
- 2.10 Orthopaedic surgery**
 - 2.10.1: Common fractures and complications, *Hemant Sharma and Kevin Sherman***
 - 2.10.2: Degenerative and inflammatory joint disease, *Pierre Nasr and Vikas Khanduja***
 - 2.10.3: Bone and joint infections, *Jehangir Mahalaxmivala and Daoud Makki***
 - 2.10.4: Back pain and sciatica, *David Sharp***
 - 2.10.5: Malignant and metastatic bone disease, *Helen Cattermole***
- 2.11 Skin and soft tissue masses**
 - 2.11.1: Benign and malignant skin lesions, *Mandeep Kang and David Ward***
 - 2.11.2: Soft tissue masses, *Mandeep Kang and David Ward***
- 2.12 Head and neck surgery**
 - 2.12.1: Benign and malignant lesions of the head and neck, *Y Ramakrishnan and Maurice Hawthorne***
 - 2.12.2: Upper airway obstruction, *Maurice Hawthorne***
 - 2.12.3: Ear pain and hearing loss, *Maurice Hawthorne***
- 2.13 Neurosurgery**
 - 2.13.1: Common neurosurgical emergencies, *Ian Sabin and Mark Wilson***
 - 2.13.2: Neuro-oncology, *Ian Sabin***
- 2.14 Endocrine surgery**
 - 2.14.1: Endocrine surgery, *Sheila Fraser and Mark Lansdown***
- 2.15 Surgical oncology**
 - 2.15.1: Cancer screening, *Paul Sutton, Declan Dunne, Anita Hargreaves and Graeme Poston***
 - 2.15.2: Principles of surgical oncology, *D. Gomes, H.Z. Malik, S. Fenwick and Graeme Poston***

2.15.3: Principles of chemotherapy, *Robert P. Jones, Derek McWhirter and Graeme Poston*

2.15.4: General principles of radiation oncology, *Chris D. Lee, Marcel Den Dulk and Arthur Sun Myint*

2.15.5: Hormon therapy in cancer, *Declan Dunne, Derek McWhirter and Graeme Poston*

3 Basic surgical skills

3.1 Principles of safe surgery

3.1.1: Principles of safe surgery, *Amitabh Mishra and Peter McCulloch*

3.2 Anaesthetic techniques

3.2.1: Anaesthetic techniques, *Stephen Wilson and Daniele Dryden*

3.3 Basic surgical techniques

3.3.1: Basic surgical techniques, *David Smith and Jamie Young*

3.4 Surgical wounds

3.4.1: Surgical wounds, *James N Crinnion*

3.5 Surgical haemostasis

3.5.1: Surgical haemostasis, *Yassar Qureshi and Nigel Tai*

3.6 Anatomoses and drains

3.6.1: Anatomoses and drains, *Dermot Burke*

3.7 Principles of surgical endoscopy and minimal access surgery

3.7.1: Principles of surgical endoscopy and minimal access surgery, *Katie Schwab, Deepak Singh-Ranger and Timothy Rockall*

3.8 Simulation and assessment

3.8.1: Simulation and assessment, *Pram Sirimanna, Grace Lee, Sonal Arora and Rajesh Aggarwal*

4. Assessment and management of the surgical patient

4.1 History taking and information gathering

4.1.1: History taking and information gathering, *Michelle Marshall and Caroline Woodley*

4.2 Physical examination

4.2.1: Physical examination, *Caroline Woodley*

4.3 Information sharing

4.3.1: Information sharing, *Michelle Marshall*

4.4 Surgical consent

4.4.1: Surgical consent, *Robbie Lonsdale*

5. Peri-operative management

5.1 Pre-operative assessment

5.1.1: Pre-operative assessment, *Mireille Berthoud*

5.2 Intra-operative Care

5.2.1: Intra-operative Care, *David Cressey*

5.3 Post-operative Care

5.3.1: Post-operative Care, *Gary Mills and Jeremy Groves*

5.4 Nutritional management

5.4.1: Nutritional management, *Mattias Soop and Gordon Carlson*

5.5 Enhanced recovery

5.5.1: Enhanced recovery, *Dileep Lobo*

5.6 Principles of transfusion and haemostasis

5.6.1: Principles of transfusion and haemostasis, *Jeff Garner and Andi Fletcher*

5.7 Venous thromboembolism: Deep vein thrombosis and pulmonary embolism

5.7.1: Venous thromboembolism: Deep vein thrombosis and pulmonary embolism, *David Chadwick and Rob Robinson*

5.8 Metabolic and endocrine disorders in the peri-operative period

5.8.1: Metabolic and endocrine disorders in the peri-operative period, *David Chadwick and Rob Robinson*

6. Assessment and management of patients with major trauma

6.1 Assessment of the multiply injured patient

6.1.1: ABCD of ATLS, *Matthew Moran*

6.1.2: Triage

6.1.3: Tissue response to injury

6.1.4: Shock

6.1.5: Priorities of care

- 6.1.6: Adult respiratory distress syndrome
- 6.2 Principles of management of soft tissue injuries
 - 6.2.1: Skin loss, *Nada Al-Hadithy*
 - 6.2.2: Burns: classification and principles of management
- 6.3 The acute management of major/multiple fractures and dislocations
 - 6.3.1: Classification, *John Keating*
 - 6.3.2: Pathophysiology of fractures
 - 6.3.3: Complications
 - 6.3.4: Joint injuries
- 6.4 Principles of specific injuries
 - 6.4.1: Trauma of conflict zones, *John Clasper*
 - 6.4.2: Head and neurological injury, *Lynn Myles*
 - 6.4.3: Chest injury, *Tim Graham*
 - 6.4.4: Abdominal injury, *Bruce Tulloh*
 - 6.4.5: Vascular injury: Iatrogenic injury including intravascular drug abuse; crush injury and compartment syndrome; tourniquet use; shunts, revascularisation and amputations, *Zahid Raza*

7. Surgical care of the paediatric patient

- 7.1 Principles of paediatric
 - 7.1.1: Principles of paediatric, *Nicola R.K. Anders*
- 7.2 Principles of child protection and governance
 - 7.2.1: Principles of child protection and governance, *Alison Pike*
- 7.3 Common paediatric surgical conditions
 - 7.3.1: Common paediatric surgical conditions, *Ross J. Craigie and James A. Morecroft*

8. Management of the dying patient

- 8.1 Management of the dying patient in consultation with the palliative care team
 - 8.1.1: Management of the dying patient in consultation with the palliative care team, *Katharine Burke, Bee Wee and William Noble*
- 8.2 Terminal care of the dying patient, supporting their family, and ethical considerations
 - 8.2.1: Terminal Care of the dying patient, supporting their

family, and ethical considerations, *Katharine Burke, Bee Wee, and William Noble*

9. Principles of organ and tissue transplantation

9.1 Organ donation

9.1.1: Organ donation, *Chris Callaghan and Pankaj Chandak*

9.2 Principles of the transplant immunology

9.2.1: Principles of the transplant immunology, *Eleanor Bolton and Andrew Bradley*

9.3 Kidney transplantation

9.3.1: Kidney transplantation, *Andrew Bradley and M. Nicholson*

9.4 Pancreas transplantation

9.4.1: Pancreas transplantation, *John Casey*

9.5 Liver transplantation

9.5.1: Liver transplantation, *Simon Harper and R. Praseedom*

10. Evidence based surgery, research and audit

10.1 Research in surgery

10.1.1: Research in surgery, *Alan Montgomery and Jane Blazeby*

10.2 Quality improvement

10.2.1: Quality improvement, *Rob Bethune and Jane Blazeby*

10.3 Statistics for surgeons

10.3.1: Statistics for surgeons, *Vimal J Gokani and Matthew J. Bown*
