

Highlights include:

- Authored by leaders who represent the many disciplines that comprise this evolving field
 - Emphasizes the use of injections and nerve blocks as an aid to diagnosis, prognosis and therapy
 - Discusses pain categorized by anatomic location as well as syndrome
 - Incorporates vivid illustrations depicting the physical symptoms and anatomy of each site, as well as key findings from MRI, CT, X-rays and other imaging technologies
 - Includes new coverage that goes beyond the clinical boundaries of pain medicine, such as law, ethics and business administration
 - Concise and comprehensive approach is geared for pain medicine board preparation and major section on headache medicine is designed to assist with preparation for board certification in headache medicine
 - Illuminates the multidisciplinary perspective and interdisciplinary approach to managing chronic pain with many chapters on the psychology of pain and applications of psychotherapeutic and mind/body interventions
-

Περιεχόμενα:

Preface

Introduction

Part I Pain: History and General Principles

1. Pain: Historical Perspectives

2. Current Concepts in the Neurological Assessment of Pain

3. Definitions and Classifications of Pain

Part II Pain: Anatomy, Physiology and Biology

4. Anatomy and Physiology of Pain

5. Molecular Biology of Pain

6. Pathophysiology of Pain

Part III Fundamentals of Pain Evaluation

7. Understanding the Patient in Chronic Pain

8. Radiological Evaluation of Spinal Disease

9. Role of Electrodiagnostics in Pain Assessments

Part IV Behavioral Concepts in Pain Medicine

10. Psychological Aspects of Pain

11. Essentials of Psychological Evaluation and Testing

12. Individual and Group Therapy/Pain and Mind-Body Medicine

13. Inpatient Model of Chronic Pain

Part V Pain By Anatomic Location

14. Epidemiology of Headaches

15. Historical Features in Primary Headache Syndromes

16. Pathophysiology of Headaches

17. Chronic Daily Headaches

18. Common Headache Syndromes

19. Refractory Headaches

- 20. Organic Headaches
- 21. Facial Pain
- 22. Oral/Dental Pain
- 23. Neck Pain
- 24. Failed Back Surgery Syndrome
- 25. Pain Management in Rheumatologic Disorders
- 26. Pain in the Extremities
- 27. Facet Syndrome
- 28. Abdominal Pain
- 29. Low Back Pain
- 30. Pelvic Pain
- 31. Perineal Pain
- 32. Foot Pain

Part VI Pain Associated with Surgery and Trauma

- 33. Acute Pain
- 34. Sports Medicine

Part VII Generalized Painful Syndromes

- 35. Fibromyalgia and Myofascial Pain Syndromes
- 36. Polyneuropathy
- 37. Advances in The Management of Ischemic Pain
- 38. Peripheral Vascular Disease
- 39. Cancer Pain Syndromes
- 40. Pain in HIV and AIDS Patients
- 41. Sickle Cell Disease
- 42. Visceral Pain
- 43. Central Pain Syndromes
- 44. Acute Pain in Children
- 45. Chronic Pain in Children
- 46. Cancer Pain and Palliative Care in Children
- 47. Reflex Sympathetic Dystrophy and Complex Regional Pain Syndrome
- 48. Pain in the Elderly

Part VIII Focal Pain Syndromes

- 49. Acute Herpes Zoster and Postherpetic Neuralgia

Part IX Pharmacologic Therapies for Pain

- 50. Psychopharmacology for Pain
- 51. Opioids
- 52. Common Opioid Related Side
- 53. NSAIDs
- 54. Adjuvant Analgesics
- 55. Pre-emptive Analgesia
- 56. Opioids for Non-Malignant Pain – Issues and Controversy
- 57. Neuraxial Drug Delivery
- 58. Medical Management of Cancer Pain

Part X Non Pharmacologic Therapies for Pain

- 59. Peripheral Nerve Blocks
- 60. Intraarticular Injections and Facet Blocks Tim Lamer
- 61. Diagnostic Injections for Spine Pain
- 62. Epidural Steroid Injections
- 63. Spinal Canal Endoscopy
- 64. Sympathetic Blocks

- 65. Neurolytic Blocks
- 66. Neuromodulation for Pain
- 67. Acupuncture
- 68. Neurosurgical Treatment of Pain
- 69. Physical Medicine and Rehabilitation
- 70. Cryoanalgesia and Radiofrequency Myles Day
- 72. Anesthetic Interventions in Cancer Pain
- 73. Complementary and Alternative Medicine in Pain Management
- 74. The Use of Botulinum Toxin in Pain Management

Part XI Pain, Administration and the Law

- 75. The Role of Pain Clinics
- 76. Setting up a Pain Treatment Facility
- 77 How to Manage a Pain Practice
- 78. Certification in Pain Medicine
- 79. Disability Assessment of Pain-Impaired Patients
- 80. Medical-Legal Considerations in Pain Management
- 81. End of Life Ethics
- 82. Palliative Care
- 83. Ethical Issues in Pain Medicine and Problems of Trust in the Management of Chronic, Non-Malignant Pain
- 84. Outcome Measurements in Pain Medicine
- 85. Radiation Safety for the Pain Specialist

Glossary
