Glossary x

-
- 1 **MR: What's the Attraction?** 1
- 1.1 It's not Rocket Science, but I Like It 1
- 1.2 A Brief History of Medical Imaging 1
- 1.3 How to Use this Book 5
- Part I The Basic Stuff**
- 2 **Early Daze: Your First Week in MR** 11
- 2.1 Introduction 11
- 2.2 Welcome to the MR Unit 11
- 2.3 Safety First 14
- 2.4 Safety Second: Additional Practical Guidelines 17
- 2.5 The Patient's Journey 21
- 2.6 MRI Radiographer's Blog ... A Few Years On 23
- 3 **Seeing is Believing: Introduction to Image Contrast** 26
- 3.1 Introduction 26
- 3.2 Introduction to the T-Words 27
- 3.3 T₂-Weighted Images 27
- 3.4 FLAIR Images 28
- 3.5 T₁-Weighted Images 28
- 3.6 T_{1w} Images Post-Gd 29
- 3.7 STIR Images 30
- 3.8 PD-Weighted Images 32
- 3.9 Gradient-Echo Images 35
- 3.10 More About Contrast Agents 37
- 3.11 Angiographic Images 38
- 3.12 Diffusion-Weighted Images 39
- 4 **Lost in the Pulse Sequence Jungle?** 41
- 4.1 Introduction 41
- 4.2 Anatomy of a Pulse Sequence 41
- 4.3 Take Me for a Spin (Echo) 43
- 4.4 The Other Branch of the Tree: Gradient Echo 49
- 4.5 Echo Planar Imaging 54
- 4.6 The Pulse Sequence Traveller 54
- 5 **The Devil's in the Detail: Pixels, Matrices and Slices** 55
- 5.1 Introduction 55
- 5.2 From Analogue Signal to Digital Image 55
- 5.3 Matrices, Pixels and an Introduction to Resolution 58
- 5.4 Slices and Orientations 61
- 5.5 Displaying Images 61
- 5.6 What do the Pixels Represent? 63
- 5.7 From 2D to 3D 64
- 6 **What You Set is What You Get: Basic Image Optimization** 67
- 6.1 Introduction 67
- 6.2 Looking on the Bright Side: What are we Trying to Optimize? 67
- 6.3 Trading Places: Resolution, SNR and Scan Time 72
- 6.4 Ever the Optimist: Practical Steps to Optimization 76
- 7 **Improving Your Image: How to Avoid Artefacts** 81
- 7.1 Introduction 81
- 7.2 Keep Still Please! Motion Artefacts 81
- 7.3 Lose the Fat! 88
- 7.4 Digital Imaging Artefacts 92
- 7.5 Susceptibility and Metal Artefacts 96
- 7.6 Equipment Artefacts 98
- 7.7 What's Causing this Artefact? 101
- 8 **Spaced Out: Spatial Encoding** 102
- 8.1 Introduction 102
- 8.2 Anatomy of a Pulse Sequence 102
- 8.3 From Larmor to Fourier via Gradients 103
- 8.4 Something to get Excited About: The Image Slice 106
- 8.5 In-Plane Localization 110
- 8.6 Consequences of Fourier Imaging 117

Contents

- 8.7 Speeding It Up 120
 8.8 3D FT 121
- 9 **Getting in Tune: Resonance and Relaxation** 124
 9.1 Introduction 124
 9.2 Spinning Nuclei 124
 9.3 Measuring the Magnetic Moment 127
 9.4 Relaxation Times 129
 9.5 Creating Echoes 132
 9.6 Relaxation Time Mechanisms 135
 9.7 Gadolinium-based Contrast Agents 141
- 10 **Let's Talk Technical: MR Equipment** 144
 10.1 Introduction 144
 10.2 Magnets 144
 10.3 Gradient Subsystem 149
 10.4 Radiofrequency Transmit Subsystem 154
 10.5 RF Receiver Subsystem 158
 10.6 Computer Systems 162
 10.7 Siting and Installation 163
 10.8 Other Types of MRI Systems 164
- 11 **Ghosts in the Machine: Quality Control** 166
 11.1 Introduction 166
 11.2 The Quality Cycle 166
 11.3 Signal Parameters 169
 11.4 Geometric Parameters 173
 11.5 Relaxation Parameters 177
 11.6 Artefacts 178
 11.7 Spectroscopic QA 179
 11.8 Temporal Stability 179
 11.9 Other Specialist QA 181
- Part II The Specialist Stuff**
- 12 **Acronyms Anonymous I: Spin Echo** 185
 12.1 Introduction 185
 12.2 Conventional Spin Echo 185
 12.3 RARING to Go: Fast Spin-Echo Techniques 186
 12.4 The Extended Family of TSE 191
 12.5 Combining Gradient and Spin Echoes 200
- 13 **Acronyms Anonymous II: Gradient Echo** 207
 13.1 Introduction 207
 13.2 Image Formation in Gradient Echo 207
- 13.3 One Tree, Many Branches: FIDs, Echoes and Coherences 207
 13.4 Ultra-Fast GE Imaging 218
- 14 **The Parallel Universe: Parallel Imaging and Novel Acquisition Techniques** 225
 14.1 Introduction 225
 14.2 Groundwork 225
 14.3 Making SENSE: Parallel Imaging in Image Space 227
 14.4 SMASH Hits: Parallel Imaging in k-Space 230
 14.5 Undersampling by Simultaneous Multi-Slice Excitation 236
 14.6 Image Quality in Parallel Imaging 237
 14.7 k-t BLAST 240
 14.8 Non-Cartesian Acquisition Schemes 242
 14.9 Compressed Sensing 248
- 15 **Go with the Flow: MR Angiography** 251
 15.1 Introduction 251
 15.2 Effect of Flow in Conventional Imaging 251
 15.3 Non-Contrast MR Angiography 255
 15.4 Contrast-Enhanced MRA 263
 15.5 Susceptibility-Weighted Imaging 267
- 16 **A Heart to Heart Discussion: Cardiac MRI** 269
 16.1 Introduction 269
 16.2 Patient Set-up 269
 16.3 Morphological Imaging 272
 16.4 Functional Imaging 273
 16.5 Myocardial Perfusion 282
 16.6 Myocardial Viability 284
 16.7 Myocardial Tissue Characterization 286
 16.8 Coronary Artery Imaging 286
- 17 **It's Not Just Squiggles: In Vivo Spectroscopy** 288
 17.1 Introduction 288
 17.2 Some Basic Chemistry 288
 17.3 Single-Voxel Spectroscopy 291
 17.4 Processing of Single-Voxel Spectra 295
 17.5 Chemical Shift Imaging 297
- 18 **To BOLDly Go: fMRI, Perfusion and Diffusion** 303
 18.1 Introduction 303
 18.2 Diffusion Imaging 303

18.3	Perfusion Imaging	311	20.3	Gradient Effects	347
18.4	Dynamic Contrast Enhancement: Permeability Imaging	316	20.4	Static Field Effects	351
18.5	Brain Activation Mapping Using the BOLD Effect	319	20.5	MR Exposures and Pregnancy	352
19	Making it Count: Quantitative MRI	326	20.6	Occupational Exposure	352
19.1	Introduction	326	20.7	Contrast Agent Safety	354
19.2	Relaxation Times	326	20.8	So is MRI Safe?	356
19.3	Diffusion Parameters	334	21	Where Are We Going Now?	358
19.4	Tissue Perfusion and Permeability	335	21.1	Introduction	358
19.5	Fat Quantification	335	21.2	7 Tesla Systems	358
19.6	MR Elastography	338	21.3	Hyperpolarization	360
19.7	Accuracy, Precision, and Diagnostic Confidence	341	21.4	MR-PET	362
20	But is it Safe? Bio-effects	345	21.5	MR-LINAC	363
20.1	Introduction	345		<i>Appendix: maths revision</i>	365
20.2	Radiofrequency Effects	345		<i>Index</i>	369
