

List of contributors, vii

- 1 Epidemiology and genetics of chronic pancreatitis, 1**
- 2A Pathobiology of the acinar cell in acute pancreatitis, 10**
- 2B Locoregional pathophysiology in acute pancreatitis: pancreas and intestine, 19**
- 2C Pathophysiology of systemic inflammatory response syndrome and multiorgan dysfunction syndrome in acute pancreatitis, 29**
- 3 Diagnosis, prediction and classification, 38**
- 4 Medical treatment, 47**
- 5 Nutritional treatment in acute pancreatitis, 55**
- 6 Gallstone pancreatitis: diagnosis and treatment, 64**
- 7 Treatment of local complications, 75**
- 8 Treatment of systemic complications and organ failure, 85**
- 9 Specific treatment for acute pancreatitis, 91**
- 10 Sequelae of acute pancreatitis, 101**
- 11 History of chronic pancreatitis, 113**
- 12A Epidemiology and pathophysiology: epidemiology and risk factors, 118**
- 12B Epidemiology and pathophysiology: genetic insights into pathogenesis, 126**
- 12C Pancreatic stellate cells: what do they tell us about chronic pancreatitis?, 143**
- 12D Autoimmune pancreatitis: an update, 152**
- 12E Etiology and pathophysiology: tropical pancreatitis, 161**
- 12F Mechanisms and pathways of pain in chronic pancreatitis, 169**
- 13A Imaging of chronic pancreatitis, 179**
- 13B Endoscopic ultrasonography in chronic pancreatitis, 188**
- 14A Pancreatic enzyme replacement therapy (PERT), 195**
- 14B Nutritional treatment: antioxidant treatment, 205**
- 14C Pancreatogenic diabetes: etiology, implications and management, 211**
- 14D Nutrition without a pancreas: how does the gut do it?, 225**
- 15A Endoscopic management of chronic pancreatitis, 233**

- 15B Shocking and fragmenting pancreatic ductal stones, 245**
- 15C Endoscopic management: celiac plexus blockade, 249**
- 16A A brief history of modern surgery for chronic pancreatitis, 256**
- 16B Surgery for chronic pancreatitis: indications and timing of surgery, 261**
- 16C Chronic pancreatitis: surgical strategy in complicated diseases, 265**
- 16D Surgery for chronic pancreatitis: pancreatic duct drainage procedures, 273**
- 16E Surgical management: resection and drainage procedures, 279**
- 16F The role of pancreatoduodenectomy in the management of chronic pancreatitis, 286**
- 17A Total pancreatectomy and islet cell autotransplantation: patient selection, 295**
- 17B Total pancreatectomy and islet cell autotransplantation: the science of islet cell preservation, from pancreas to liver, 299**
- 17C Total pancreatectomy and islet cell autotransplantation: long-term assessment of graft function, 308**
- Index, 321**
