

## **1. The principles of medical mycology**

- 1: Introduction to medical mycology, *David W. Warnock*
- 2: Fungal taxonomy and nomenclature, *Andrew M. Borman*
- 3: Physiology and metabolism of fungal pathogens, *Neil A.R. Gow, Alistair J.P. Brown*
- 4: Fungal cell structure and organization, *Nick D. Read*
- 5: Fungal genetics, *Paul S. Dyer, Carol A. Munro, Rosie E. Bradshaw*
- 6: Fungal genomics and transcriptomics, *Carol A. Munro, Duncan Wilson*
- 7: Epidemiology and fungal disease, *Rajal K. Mody, Angela Alquist Cleveland, Shawn R. Lockhart, Mary E. Brandt*
- 8: Pathogenesis of fungal disease, *Frank C. Odds*
- 9: Immunology of fungal disease, *Ivy M. Dambuza, Jeanette Wagener, Gordon D. Brown, Neil A.R. Gow*

## **2. Medically important fungi**

- 10: Aspergillus species, *Stephanie Smith, Rohini J. Manuel, Christopher C. Kibbler*
- 11: Candida species, *Bernhard Hube, Oliver Kurzai*
- 12: Cryptococcus species, *Catriona L. Halliday, Sarah E. Kidd*
- 13: Other yeasts, *Chris Linton, Susan Howell*
- 14: Dematiaceous fungi, *Sarah E. Kidd, Catriona L. Halliday*
- 15: The dermatophytes, *Susan Howell*
- 16: Endemic dimorphic fungi, *Angela Restrepo, Angel A. González, Beatriz L. Gómez*
- 17: Hyaline moulds, *Elizabeth M. Johnson*
- 18: Mucoraceous moulds, *Thomas R. Rogers, Elizabeth M. Johnson*
- 19: Pneumocystis jirovecii, *Stuart Flanagan*

## **3. Fungal diseases**

- 20: Fungal bone and joint infections, *Damien Mack, Simon Warren, Shara Palanivel, Christopher P. Conlon*
- 21: Fungal cardiovascular infections, *Sarah Drake, Jonathan Sandoe*
- 22: Fungal central nervous system infections, *Tihana Bicanic, Thomas S. Harrison*
- 23: Fungal infections of the skin and subcutaneous tissue, *Roderick J. Hay*
- 24: Fungal infections of ear, nose, and throat, *Arunaloke Chakrabarti*
- 25: Fungaemia and disseminated infection, *Rebecca Lester, John Rex*
- 26: Fungal diseases of the gastrointestinal tract, *Silke Schelenz*
- 27: Genito-urinary fungal infections, *Jack D. Sobel*
- 28: Fungal eye infections, *Heather L. Clark, Eric Pearlman*
- 29: Fungal infections of the kidney and those associated with renal failure, dialysis, and renal Transplantation, *Eileen K. Maziarz, John R. Perfect*
- 30: Fungal infections of the respiratory tract, *Samantha E. Jacobs, Catherine B. Small, Thomas J. Walsh*
- 31: Fungal toxin-mediated disease, *Christopher C. Kibbler*

#### **4. Fungal infections in specific patient groups**

32: Fungal infections in haemato-oncology, *Philipp Koehler, Oliver A. Cornely*

33: Fungal infections among patients with AIDS, *Blandine Denis, Fanny Lanternier, Olivier Lortholary*

34: Fungal infections in solid organ transplantation, *Darius Armstrong James, Anand Shah, Anna Reed*

35: Fungal Infections in neonates, *Adilia Warris*

36: Fungal infections in intensive therapy units, *Rosemary Barnes, Matthijs Backx*

37: Fungal disease in cystic fibrosis and chronic respiratory disorders, *Chris Kosmidis, David W. Denning, Eavan G. Muldoon*

#### **5. Diagnosis of fungal disease**

38: Biosafety and quality assurance in the mycology laboratory, *Michael D. Palmer, Shila Seaton*

39: Microscopy and culture of fungal disease, *Gillian Shankland*

40: Histopathology of fungal disease, *Sebastian B. Lucas*

41: The imaging of fungal disease, *Joanne Cleverley*

42: Serology of fungal disease, *Richard Barton*

43: Molecular diagnosis of fungal disease, *P. Lewis White, Rosemary A. Barnes*

44: Guidelines for the diagnosis of fungal disease, *Manuel Cuenca-Estrella*

#### **6. Antifungal therapy**

45: Principles of antifungal therapy, *Russell E. Lewis*

46: Antifungal agents, *Donna M. MacCallum*

47: Antifungal susceptibility testing and resistance, *Elizabeth M. Johnson*

48: Antifungal therapeutic drug monitoring, *H. Ruth Ashbee*

49: Antifungal treatment guidelines, *Laura Cottom, Brian L. Jones*
