

Part I: Basic Principles

Chapter 1: Historical Aspects of Electroencephalography

Raoul Sutter, MD, Peter W. Kaplan, MB, BS, FRCP, and Donald L. Schomer, MD

Chapter 2: Cellular Substrates of Brain Rhythms

Florin Amzica, PhD and Fernando H. Lopes da Silva, MD, PhD

Chapter 3: Dynamics of EEGs as Signals of Neuronal Populations: Models and Theoretical Considerations

Fabrice Wendling, MD, PhD and Fernando H. Lopes da Silva, MD, PhD

Chapter 4: Biophysical Aspects of EEG and MEG Generation

Wytse J. Wadman PhD and Fernando H. Lopes da Silva, MD, PhD

Chapter 5: Recording Principles: Analog and Digital Principles; Polarity and Field Determinations; Multimodal Monitoring, Polygraphy (EOG, EMG, ECG, SaO₂)

Donald L. Schomer, MD, Charles M. Epstein, MD, Susan T. Herman, MD, and Bruce J. Fisch, MD

Chapter 6: Anterotemporal, Basal Temporal, Nasopharyngeal and Sphenoidal Electrodes and High-Density Arrays

Andrew Schomer, MD, Margitta Seeck, MD, Andres M. Kanner, MD, FANA, and Donald L. Schomer, MD

Part II: Normal EEG

Chapter 7: Normal EEG and Sleep: Preterm; Term; Infant; Adolescent

Phillip L. Pearl, MD, Jules Beal, MD, Monika Eisermann, MD, Sunita Misra, MD, PhD, Perrine Plouin, MD, Solomon L. Moshe, MD, James J. Riviello, Jr., MD, Douglas R. Nordli, Jr., MD, and Eli M. Mizrahi, MD

Chapter 9: Validating Biomarkers and Diagnostic Tests in Clinical Neurophysiology: Developing Strong Experimental Designs and Recognizing Confounds

Joshua B. Ewen, MD and Sándor Beniczky, MD, PhD

Chapter 10: EEG Activation Methods

Mouhsin M. Shafi, MD, PhD and M. Brandon Westover, MD, PhD

Chapter 11: Artifacts of Recording and Common Errors in Interpretation

William O. Tatum, DO, Claus Reinsberger, MD, PhD, and Barbara A. Dworetzky, MD

Part III: Clinical EEG: General Topics

Chapter 12: Patterns of Unclear Significance

Jonathan Charles Edwards, MD and Ekrem Kutluay, MD

Chapter 13: The EEG in Degenerative Disorders of the CNS: Congenital Malformations, Neurocutaneous Disorders, Inherited Disorders of Metabolism, Cerebral Palsy, and Autism Spectrum Disorders

John Gaitanis, MD, Phillip L. Pearl, MD, and Howard Goodkin, MD

Chapter 14: Brain Tumors and Other Space-Occupying Lesions

Adam L. Hartman, MD and Ronald P. Lesser, MD

Chapter 15: EEG in Inflammatory Disorders, Cerebrovascular Diseases, Trauma and Migraine.

Marian Galovic, MD, Bettina Schmitz, MD, and Barbara Tettenborn, MD

Chapter 16: EEG In Dementing Disorders

Claudio Babiloni, MD, Claudio Del Percio, MD, and Ana Buján, MD
Chapter 17: Electroencephalography in Metabolic Disorders, Intoxications, and Epileptic Encephalopathies
Raoul Sutter, MD, Trudy Pang, MD, and Peter W. Kaplan, MB, BS, FRCP

Part IV: Clinical EEG in the Evaluation of Seizures, Epilepsy, Acute Brain Insults and Related Disorders

Chapter 18: Seizures and Epilepsy in Preterm and term Neonates, infants, children and Adolescents
Jules C. Beal, MD, Monika Eisermann, MD, Sunita Misra, MD, PhD, Phillip L. Pearl, MD, Perrine Plouin, MD, Eli M. Mizrahi, MD, and Solomon L. Moshe, MD
Chapter 19: The Application of EEG to Epilepsy in Adults and the Elderly
Vaishnav Krishnan MD, PhD, Bernard S. Chang, MD, MMSc, and Donald L. Schomer, MD
Chapter 20: Convulsive Status Epilepticus
Frank W. Drislane, MD, Susan T. Herman, MD, and Peter W. Kaplan, MB, FRCP
Chapter 21: Nonconvulsive Status Epilepticus
Frank W. Drislane, MD, Susan T. Herman, MD, and Peter W. Kaplan, MB, FRCP
Chapter 22: EEG in the ICU: Anoxia, Coma, Brain Death, and Related Disorders
Gamaleldin M. Osman, MD, James J Riviello, Jr, MD, and Lawrence J. Hirsch, MD
Chapter 23: EEG Based Anticipation and Control of Seizures
Stiliyan Kalitzin, PhD and Fernando Lopes da Silva, MD, PhD
Chapter 24: Non-Epileptic Events
David K. Chen, MD and W. Curt LaFrance, Jr., MD, MPH
Chapter 25: EEG in Psychiatric Disorders
Andres M. Kanner, MD, FANA and Adriana Bermeo-Ovalle, MD
Chapter 26: Standardizing EEG Interpretation and Reporting
Sándor Beniczky, MD, PhD, Harald Aurlien, MD, PhD, Jan Brøgger, MD, PhD, Ronit Pressler, MD, PhD, MRCPCH, and Lawrence J. Hirsch MD
Chapter 27: Automatic Integrated EEG Interpretation and Reporting
Masatoshi Nakamura, MD and Hiroshi Shibasaki, MD

Part V: Complementary and Special Techniques

Chapter 28: Transcranial Electrical and Magnetic and Stimulation
Alexander Rotenberg, MD, PhD, Alvaro Pascual-Leone, MD, PhD, and Alan D. Legatt, MD, PhD
Chapter 29: Intracranial EEG Monitoring: Depth, Subdural, Foramen Ovale, and Microarrays
Margitta Seeck, MD and Donald L. Schomer, MD
Chapter 30: Electrocorticography
Marc R. Nuwer, MD, PhD and Stephan Schuele, MD, MPH
Chapter 31: Principles and Techniques for Long-Term EEG Recording (EMU, ICU, Ambulatory)
Marc R. Nuwer, MD, PhD, Ronald Emerson, MD, and Cecil D. Hahn, MD, MPH
Chapter 32: Infralow EEG activity
Samps Vanhatalo, MD and J. Matias Palva, MD
Chapter 33: High Frequency EEG Activity

Jean Gotman, PhD and Nathan E. Crone, MD

Chapter 34: Intraoperative Monitoring of Central Neurophysiology

Alan D. Legatt, MD, PhD, Marc R. Nuwer, MD, PhD, and Ronald G. Emerson, MD

Chapter 35: Magnetoencephalography: Methods and Clinical Aspects

Riitta Hari, MD, PhD

Chapter 36: Polysomnography: Technical and Clinical Aspects

Sudhansu Chokroverty, MD and Robert Vertugno, MD

Chapter 37: The Neurophysiological Basis of Myoclonus

Phillip D. Thompson, MD, Hiroshi Shibasaki, MD, and Mark Hallett, MD

Chapter 38: Recording Techniques related to Deep Brain Stimulation for Movement Disorders and Responsive Stimulation for Epilepsy

Jay L. Shils, PhD, DABNM, FASN, FACNS, Sepehr Sani, MD, Ryan Kochanski, MD, Mena Kerolus, MD, and Jeffrey E. Arle MD, PhD

Part VI: Evoked Potentials and Event-Related EEG Phenomena

Chapter 39: Event-Related Potentials: General Aspects of Methodology and Quantification

Marco Congendo, PhD and Fernando H. Lopes da Silva, MD, PhD

Chapter 40: EEG Event-Related Desynchronization (ERD) and Event-Related Synchronization

Gert Pfurtscheller, MD, PhD and Fernando Lopes da Silva, MD, PhD

Chapter 41: Visual Evoked Potentials and Electroretinograms

Gastone G. Celesia, MD and Neal S. Peachey, MD

Chapter 42: Brainstem Auditory Evoked Potentials and Other Auditory Evoked Potentials

Abeer J. Hani, MD and Aatif M. Husain, MD

Chapter 43: Somatosensory and Pain Evoked Potentials: Normal Responses, Abnormal Waveforms, and Clinical Applications in Neurological Diseases

François Mauguière, MD and Luis Garcia-Larrea, MD

Part VII: New Frontiers in Clinical Neurophysiology/EEG

Chapter 44: EEG Analysis: Theory and Practice

Fabrice Wendling, Eng, PhD, Marco Congendo, PhD, and Fernando H. Lopes da Silva, MD, PhD

Chapter 45: EEG Mapping and Source Imaging

Christoph M. Michel, PhD and Bin He, PhD

Chapter 46: Combination of Brain Functional Imaging Techniques: EEG/MEG, fMRI, PET, SPECT - Clinical Applications in Neurology

Margitta Seeck, MD, L. Spinelli, PhD, Jean Gotman, PhD, and Fernando H. Lopes da Silva, MD

Chapter 47: EEG-Based Brain-Computer Interfaces

Gert Pfurtscheller, MD, PhD, Clemens Brunner, MD, and Christa Neuper, MD

Chapter 48: Neurocognitive Processes

Fernando H. Lopes da Silva, MD, PhD and Eric Halgren, PhD
