Part One Performing the Feline Physical Examination 1

1	Setting the Stage: Feline-Friendly Practice	3
1.1	Challenges Faced in Feline Practice	3
1.2	The Emergence of Feline-Friendly Practice	4
1.3	Key Principles of Feline-Friendly Practice	4
1.4	The Role of Sound	8
1.5	The Role of Tactile Stimulation	8
1.6	The Role of Scent	8
1.7	The Role of Advance Preparation	9
1.8	Examination Room Etiquette: Accessing the Cat	10
1.9	Recognizing Body Language	12
1.10	Feline-Friendly Handling	16
1.11	Other Feline Handling Tools	20
2	Assessing the Big Picture: the Body, the Coat, and the Skin of the Cat	24
2.1	Forms of Identification	24
2.2	Body Condition Scoring	25
2.3	Assessing Hydration	29
2.4	Inspecting the Coat: First Impressions	30
2.5	Identifying Coat Colors and Coat Patterns	32
2.6	Assessing Coat Quality	34
2.7	Inspecting the Skin	40
3	Examining the Head of the Cat	52
3.1	Skull Shape and Facial Symmetry	52
3.2	The Eyes and Accessory Visual Structures	52
3.2.1	A Systematic Approach to the Eye Examination	52
3.2.2	Evaluating the Adnexa of the Eye	53
3.2.3	Evaluating the Globe	58
3.2.4	Evaluating the Sclera	60
3.2.5	Evaluating the Cornea	61

- 3.2.6 Evaluating the Iris 61
- 3.2.7 Evaluating the Pupils 62
- 3.2.8 Assessing Ocular Reflexes 62
- 3.2.9 Assessing the Anterior Chamber 64
- 3.2.10 Assessing the Lens 65
- 3.2.11 Introduction to Fundoscopy 66
- 3.2.12 Fundoscopy and Direct Ophthalmoscopy 67
- 3.2.13 Fundoscopy and Indirect Ophthalmoscopy 67
- 3.3 The Ears 68
- 3.4 The Nose 72
- 3.5 The Extra-Oral Examination 73
- 3.6 The Intra-Oral Examination 75
 - 3.6.1 Assessing Mucous Membrane Color 75
 - 3.6.2 Assessing Capillary Refill Time 76
 - 3.6.3 Examining the Mucosa 76
 - 3.6.4 Examining the Gingiva 78
 - 3.6.5 Assessing the Dentition 78
 - 3.6.6 Assessing the Occlusion 79
 - 3.6.7 Assessing for Calculus 81
 - 3.6.8 Opening the Mouth 81
 - 3.6.9 Examining the Tongue 82
 - 3.6.10 Assessing for Periodontal Disease 82
 - 3.6.11 Feline-Specific Dentistry 84

- 4 Examining the Endocrine and Lymphatic Systems of the Cat 90**
 - 4.1 Evaluating the Thyroid Gland 90
 - 4.1.1 The Pathophysiology of Hyperthyroidism 90
 - 4.1.2 The Etiology of Hyperthyroidism 91
 - 4.1.3 The Art of Palpating an Enlarged Thyroid Gland 91
 - 4.2 Assessing the Lymphatic System 93
 - 4.2.1 Examining the Submandibular Lymph Nodes 93
 - 4.2.2 Examining the Superficial Cervical or Pre-Scapular Lymph Nodes 93
 - 4.2.3 Examining the Popliteal Lymph Nodes 94
 - 4.2.4 Feeling for Lymph Nodes That Should Not Be Present 94

- 5 Examining the Cardiovascular and Respiratory Systems of the Cat 98**
 - 5.1 The Cardiac Patient 98
 - 5.2 Assessing the Cardiovascular System Prior to Auscultation 99
 - 5.2.1 Attitude 99
 - 5.2.2 Respiratory Rate 99
 - 5.2.3 Respiratory Effort 99
 - 5.2.4 Respiratory Route 99
 - 5.2.5 Mucous Membrane Color 99
 - 5.2.6 Capillary Refill Time (CRT) 99

5.2.7	Jugular Pulse	99
5.2.8	Palpating the Ventral Neck	100
5.2.9	Palpating the Limbs for Warmth and Assessing the Extremities for Color	100
5.2.10	Assessing Femoral Pulses	100
5.3	Cardiothoracic Auscultation	101
5.3.1	Recalling the Cardiac Cycle	101
5.3.2	Normal Heart Sounds	101
5.3.3	Abnormal Heart Sounds: Murmurs	101
5.3.4	Other Heart Sounds	102
5.3.5	Ausculting the Heart	102
5.3.6	Understanding How the Stethoscope Is Built to Facilitate Auscultation	105
5.4	The Respiratory Patient	105
5.4.1	The Upper Airway Patient	105
5.4.2	The Lower Airway Patient	105
5.4.3	The Patient with Thoracic Cavity Disease	107
5.5	Assessing the Respiratory System Prior to Auscultation	110
5.5.1	The Nose	112
5.5.2	The Larynx and the Trachea	113
5.5.3	Thoracic Compliance	113
5.5.4	Thoracic Percussion	113
5.6	Understanding Normal Airway Sounds	114
5.7	Ausculting the Airway	114
5.8	Understanding Adventitious Airway Sounds	115
5.9	Using Airway Sounds to Corroborate Percussive Findings	116
5.10	Purring as an Obstruction to Auscultation	116
6	Examining the Abdominal Cavity of the Cat	120
6.1	Overview of the Digestive Tract as It Pertains to Presenting Complaints	120
6.2	The Esophagus	122
6.3	Visual Inspection of the Abdomen	122
6.4	Superficial Palpation of the Abdomen	122
6.5	Deep Palpation of the Abdomen	124
6.5.1	The Liver	126
6.5.2	The Stomach	127
6.5.3	The Spleen	127
6.5.4	The Pancreas	127
6.5.5	The Small Intestine	128
6.5.6	Mesenteric Lymph Nodes	129
6.5.7	The Large Intestine	129
6.5.8	The Rectal Examination	130
6.6	The Upper Urinary Tract	132
6.7	The Lower Urinary Tract	134
6.8	The Male Reproductive Tract	135
6.9	The Female Reproductive Tract	137

- 6.10 Being Presented with a Female of Unknown Sexual Status 138
- 6.11 Neonates 138

- 7 Examining the Musculoskeletal System of the Cat 145**
 - 7.1 Muscle Condition Score (MCS) 145
 - 7.2 The Skeleton as a Whole 146
 - 7.2.1 Key Components of the Axial Skeleton to Appreciate on Physical Examination 148
 - 7.2.2 Key Components of the Appendicular Skeleton to Appreciate on Physical Examination 150
 - 7.2.3 Additional Components of the Skeleton to Appreciate on Physical Examination 153
 - 7.3 The Appendicular Skeleton: The Forelimb 153
 - 7.4 The Appendicular Skeleton: The Hind Limb 160

- 8 Evaluating the Nervous System of the Cat 174**
 - 8.1 Assessing Behavior and Mental Status 174
 - 8.2 Assessing Posture 176
 - 8.3 Assessing Coordination and Gait 177
 - 8.4 Assessing Postural Reactions 178
 - 8.5 Assessing for Other Abnormal Movements 180
 - 8.6 Evaluating the Spinal Reflexes 181
 - 8.7 Assessing the Cranial Nerves 183
 - 8.7.1 Reviewing the Ocular Reflexes Associated with the Cranial Nerves 183
 - 8.7.2 Reviewing the Cranial Nerves Associated with Ocular Movement 185
 - 8.7.3 Reviewing the Cranial Nerves Associated with Tactile Sensation 185
 - 8.7.4 Reviewing the Cranial Nerves Associated with Muscle Movement Other Than Ocular 186
 - 8.7.5 Reviewing the Cranial Nerves Associated with Digestion 186
 - 8.7.6 Reviewing the Cranial Nerves Associated with Maintaining Posture 186
 - 8.8 Assessing Nociception 186

- Part Two Performing the Canine Physical Examination 191**

- 9 Setting the Stage: Canine-Friendly Practice and Low-Stress Handling 193**
 - 9.1 Challenges Faced in Canine Practice 193
 - 9.2 The Concept of Low-Stress Handling 194
 - 9.3 White Coat Syndrome 196
 - 9.4 The Role of Scent 198
 - 9.5 The Role of Advance Preparation 199
 - 9.6 Examination Room Etiquette: Setting the Tone for Initial Veterinary Interactions with the Dog 199
 - 9.7 Recognizing Body Language 199
 - 9.8 Creative Approaches to Challenging Interactions with Canine Patients 205
 - 9.9 Other Canine Handling Tools 206

- 10 Assessing the Big Picture: the Body, the Coat, and the Skin of the Dog 213**
 - 10.1 Forms of Identification 213
 - 10.2 Body Condition Scoring 214

- 10.3 Assessing Hydration 221
- 10.4 Breed Designation 222
- 10.5 Inspecting the Coat: First Impressions 223
- 10.6 Identifying Coat Colors and Coat Patterns 225
- 10.7 Assessing Coat Quality 233
- 10.8 Inspecting the Skin 237
- 10.9 Primary Skin Lesions 240
- 10.10 Secondary Skin Lesions 245
- 10.11 Miscellaneous Skin Lesions 246
- 10.12 Hyperkeratosis 249
- 10.13 Skin Folds 250
- 10.14 Nails and Paw Pads 251
- 10.15 Skin Incisions 252
- 10.16 Mammary Glands 255

- 11 Examining the Head of the Dog 261**
 - 11.1 Skull Shape: Function Versus Cosmesis 261
 - 11.2 Facial symmetry 265
 - 11.3 The Eyes and Accessory Visual Structures 265
 - 11.3.1 A Systematic Approach to the Eye Examination 265
 - 11.3.2 Evaluating the Adnexa of the Eye 265
 - 11.3.3 Evaluating the Globe 274
 - 11.3.4 Evaluating the Sclera 275
 - 11.3.5 Evaluating the Cornea 277
 - 11.3.6 Evaluating the Iris 278
 - 11.3.7 Evaluating the Pupils 280
 - 11.3.8 Assessing Ocular Reflexes 281
 - 11.3.9 Assessing the Anterior Chamber 281
 - 11.3.10 Assessing the Lens 282
 - 11.3.11 Introduction to Fundoscopy 282
 - 11.3.12 Fundoscopy and Direct Ophthalmoscopy 283
 - 11.3.13 Fundoscopy and Indirect Ophthalmoscopy 283
 - 11.4 The Ears 284
 - 11.5 The Nose 289
 - 11.6 The Extra-Oral Examination 291
 - 11.7 The Intra-Oral Examination 295
 - 11.7.1 Assessing Mucous Membrane Color 295
 - 11.7.2 Assessing Capillary Refill Time 296
 - 11.7.3 Examining the Mucosa 296
 - 11.7.4 Examining the Gingiva 296
 - 11.7.5 Assessing the Dentition 297
 - 11.7.6 Assessing the Occlusion 301
 - 11.7.7 Assessing for Calculus 302
 - 11.7.8 Miscellaneous Acquired Tooth-Related Defects 303

11.7.9	Opening the Mouth	304
11.7.10	Examining the Tongue	305
11.7.11	Assessing for Periodontal Disease	306
12	Examining the Endocrine and Lymphatic Systems of the Dog	312
12.1	Thyroid Gland Neoplasia in the Dog	312
12.2	The Typical Presentation of Thyroid Gland Neoplasia in the Dog	313
12.3	The Pathophysiology of Hypothyroidism	313
12.4	The Typical Presentation of a Hypothyroid Dog	314
12.5	The Atypical Presentation of a Hypothyroid Dog	315
12.6	Assessing the Lymphatic System	315
12.7	Examining the Submandibular Lymph Nodes	316
12.8	Examining the Superficial Cervical or Pre-Scapular Lymph Nodes	316
12.9	Examining the Popliteal Lymph Nodes	316
12.10	Feeling for Lymph Nodes That Should Not Be Present	317
13	Examining the Cardiovascular and Respiratory Systems of the Dog	320
13.1	Congenital Heart Disease in the Dog	320
13.2	Acquired Heart Disease in the Dog	321
13.3	Assessing the Cardiovascular System Prior to Auscultation	322
13.3.1	Attitude	322
13.3.2	Respiratory Rate	323
13.3.3	Respiratory Effort	323
13.3.4	Respiratory Route	323
13.3.5	Mucous Membrane Color	323
13.3.6	Capillary Refill Time (CRT)	323
13.3.7	Jugular Pulse	324
13.3.8	Assessing Femoral Pulses	324
13.4	Cardiothoracic Auscultation	325
13.4.1	Normal Heart Sounds	325
13.4.2	Abnormal Heart Sounds	326
13.4.3	Other Heart Sounds	326
13.4.4	Ausculting the Heart	326
13.4.5	Understanding How the Stethoscope Is Built to Facilitate Auscultation	326
13.4.6	Understanding the Limitations of Cardiothoracic Auscultation	326
13.5	The Respiratory Patient	330
13.5.1	The Upper Airway Patient	330
13.5.2	The Patient with Laryngeal Disease	332
13.5.3	The Lower Airway Patient	332
13.5.4	The Patient with Thoracic Cavity Disease	333
13.6	Assessing the Respiratory System Prior to Auscultation	334
13.6.1	The Nose	334
13.6.2	The Larynx and the Trachea	334
13.6.3	Thoracic Compliance	335

- 13.6.4 Thoracic Percussion 335
- 13.7 Understanding Normal Airway Sounds 335
- 13.8 Ausculting the Airway 335
- 13.9 Understanding Adventitious Airway Sounds 336
- 13.10 Panting as an Obstruction to Auscultation 337

- 14 Examining the Abdominal Cavity of the Dog 342**
- 14.1 Overview of the Digestive Tract 342
- 14.2 The Esophagus 342
- 14.3 Visual Inspection of the Abdomen 343
- 14.4 Auscultation and Superficial Palpation of the Abdomen 344
 - 14.4.1 Auscultation of the Abdomen 344
 - 14.4.2 Superficial Palpation of the Abdomen 344
- 14.5 Deep Palpation of the Abdomen 346
 - 14.5.1 The Liver 348
 - 14.5.2 The Stomach 348
 - 14.5.3 The Spleen 350
 - 14.5.4 The Pancreas 351
 - 14.5.5 The Small Intestine 352
 - 14.5.6 The Mesenteric Lymph Nodes 354
 - 14.5.7 The Large Intestine 354
 - 14.5.8 The Anal Sacs 354
 - 14.5.9 The Rectal Examination 355
- 14.6 The Upper Urinary Tract 357
- 14.7 The Lower Urinary Tract 358
- 14.8 The Male Reproductive Tract 361
- 14.9 The Female Reproductive Tract 364
- 14.10 Being Presented with a Female of Unknown Sexual Status 367
- 14.11 Neonates 368

- 15 Examining the Musculoskeletal System of the Dog 380**
- 15.1 Muscle Condition Score (MCS) 380
- 15.2 The Skeleton as a Whole 382
 - 15.2.1 Key Components of the Axial Skeleton to Appreciate on Physical Examination 382
 - 15.2.2 Key Components of the Appendicular Skeleton to Appreciate on Physical Examination 383
 - 15.2.3 Additional Components of the Skeleton to Appreciate on Physical Examination 386
- 15.3 The Appendicular Skeleton: The Forelimb 386
- 15.4 The Appendicular Skeleton: The Hind Limb 392

- 16 Evaluating the Nervous System of the Dog 412**
- 16.1 Assessing Behavior and Mental Status 412
- 16.2 Assessing Posture 413
- 16.3 Assessing Coordination and Gait 415
- 16.4 Assessing Postural Reactions 415

xii | Contents

16.5	Assessing for Other Abnormal Movements	418
16.6	Evaluating the Spinal Reflexes	419
16.7	Assessing the Cranial Nerves	421
16.7.1	Reviewing the Ocular Reflexes Associated with the Cranial Nerves	421
16.7.2	Reviewing the Cranial Nerves Associated with Ocular Movement	422
16.7.3	Reviewing the Cranial Nerves Associated with Tactile Sensation	422
16.7.4	Reviewing the Cranial Nerves Associated with Muscle Movement Other than Ocular	423
16.7.5	Reviewing the Cranial Nerves Associated with Digestion	423
16.7.6	Reviewing the Cranial Nerves Associated with Maintaining Posture	423
16.8	Assessing Nociception	423
