

I. General Aspects

Chapter 1: Definitions

Chapter 2: Non-Technical Aspects of Safe Surgical Performance

Chapter 3: Cognitive Errors

Chapter 4: Professionalism in Surgery

Chapter 5: The Surgical M&M Conference

Chapter 6: Evidence-based Medicine and Patient Safety

Chapter 7: Electronic Medical Records and Patient Safety

II. Practical Aspects

Chapter 8: Tips and Tricks of Effective Communication

Chapter 9: Tips and Tricks for Informed Consent and Shared Decision-Making

Chapter 10: Surgical Safety Checklists – Pitfalls and Pearls

Chapter 11: Strategies for Preventing Surgical Complications

Chapter 12: Intraoperative 'Rescue' Strategies

Chapter 13: How to Disclose Complications

Chapter 14: How to Become a Safe Surgeon

Chapter 15: How to Become an Empathetic Surgeon

Chapter 16: How to Become a Transparent Surgeon

III. Technical Errors

Chapter 17: Technical Errors in General Surgery

Chapter 18: Technical Errors in Abdominal Surgery

Chapter 19: Technical Errors in Thoracic Surgery

Chapter 20: Technical Errors in Vascular Surgery

Chapter 21: Technical Errors in Urological Surgery

Chapter 22: Technical Errors in Gynecological Surgery

Chapter 23: Technical Errors in Transplantation Surgery

Chapter 24: Technical Errors in Neurosurgery

Chapter 25: Technical Errors in Orthopedic Surgery

Chapter 26: Technical Errors in Spine Surgery

Chapter 27: Technical Errors in Emergency Surgery

IV. Case Examples of non-technical complications

Chapter 29: Case Example #1: Breakdown in Communication

Chapter 30: Case Example #2: Error in Judgment

Chapter 31: Case Example #3: The Preventable In-Hospital Death

V. Conclusion and Future Perspectives

Chapter 32: The Surgeon-Driven Initiative for Surgical Patient Safety
