

Section I. Antimicrobial Dosing-Adult

Adult Antimicrobial Dosing

Adult Antimicrobial Dosing With Obesity

Extended Infusions

Adult Dosing for Continuous Renal Replacement Therapy in Patients with Minimal Residual Renal Function

Vancomycin Adult Dosing and Monitoring Guidelines

Aminoglycoside Adult Dosing and Monitoring

Section II. Antimicrobial Dosing-Pediatric

Pediatric Antimicrobial Dosing

Neonatal Dosing

Pediatric Vancomycin Dosing

Pediatric Aminoglycoside Dosing

Section III. Antimicrobial Agent Fundamentals

Pharmacokinetics of Antimicrobial Agents

Antimicrobial Drug Levels

Laboratory and Clinical Toxicity Monitoring

Section IV. Treatment of Specific Organisms

Spectrum of Activity

Bacteria: Preferred and Alternative Treatment Options

Bacterial Drug Resistance

Fungi: Preferred and Alternative Treatment Options

Viruses: Preferred and Alternative Treatment Options

Section V. Infectious Syndromes in Adults

Clinical Approach to Patients With Infection

Respiratory Tract Infections

Infective Endocarditis: Diagnosis and Treatment

Infective Endocarditis: Prophylaxis

Intravascular Catheter-Related Infections

Central Nervous System Infections

Urinary Tract Infections

Soft Tissue Infections: Nontoxigenic

Soft Tissue Infections: Necrotizing or Toxigenic

Osteomyelitis

Native Joint Infection

Prosthetic Joint Infection

Gastrointestinal Infections

Intra-abdominal Infections

Management of the Febrile Neutropenic Patient

Transplant Infections

Sexually Transmitted Diseases

Tuberculosis

Nontuberculosis Mycobacteria Management Pearls

Fungal Infections

Hepatitis B

Chronic Hepatitis C Infection

Antiretroviral Therapy for HIV-1 Infection

Select Opportunistic Infections in Adult Patients With HIV

Occupational and Nonoccupational HIV, HBV, and HCV Postexposure Prophylaxis and Management

Tick-borne Infections

Zoonotic (Animal-Associated) Infections

Vaccination Schedules

Travel Medicine and Prophylaxis

Bioterrorism
