

SECTION I. Introduction

- 1: Development of the concept, *Eric Taylor*
 - 2: ADHD in the 21st century: Biology, context, policy, and the need for integrative perspectives, *Stephen P. Hinshaw and Richard M. Scheffler*
-

SECTION II. Aetiology and pathophysiology

- 3: ADHD genetics, *Kate Langley*
 - 4: Conceptualizing and investigating the role of the environment in ADHD: Correlate, cause, consequence, context and treatment, *Edmund-Sonuga-Barke and Gordon Harold*
 - 5: Gene-environment interactions, *Barbara Franke and Jan K. Buitelaar*
 - 6: Brain volumes and intrinsic brain connectivity in ADHD, *Kerstin Konrad, Adriana di Martino, and Yuta Aoki*
 - 7: ADHD brain function, *Katya Rubia*
 - 8: Insights from neuroanatomic imaging into ADHD throughout the lifespan, *Philip Shaw and Eszter Szekely*
 - 9: Neurophysiology, *Daniel Brandeis, Sandra Loo, Grainne McLoughlin, Hartmut Heinrich, and Tobias Banaschewski*,
 - 10: Cognitive functioning in ADHD: Inhibition, memory, temporal discounting, decision making, timing, and reaction time variability, *David Coghill, Maggie Toplak, Sinead Rhodes, and Nicoletta Adamo*
 - 11: Emotional dysregulation and ADHD, *Celine Ryckaert, Jonna Kuntsi, and Philip Asherson*
 - 12: Neuropsychological functioning and ADHD: A developmental perspective, *Sarah O'Neill, Jeffrey M. Halperin, and David Coghill*
-

SECTION III. Epidemiology

- 13: Epidemiology, *Guilherme V. Polanczyk*
-

SECTION IV. Clinical Presentation

- 14: Current diagnostic criteria: DSM, ICD, and future perspectives, *Luis Augusto Rohde, Christian Kieling, and Giovanni Abrahão Salum*
 - 15: Sluggish cognitive tempo, *Stephen P. Becker and Russell A. Barkley*
 - 16: Sex differences in ADHD, *Corina U. Greven, Jennifer. S. Richards, and Jan K. Buitelaar*
 - 17: Quality of life and impairment in ADHD, *Melissa Mulraney and David Coghill*
 - 18: Adult ADHD and employment, *Marios Adamou*
 - 19: Adult ADHD: Clinical presentation and assessment, *Philip Asherson, Josep Antoni Ramos-Quiroga, and Susan Young*
-

SECTION V. Comorbidity

- 20: Conduct disorder in ADHD, *Anita Thapar and Stephanie van Goozen*
- 21: Irritability, disruptive mood, and ADHD, *Melissa Mulraney, Argyris Stringaris, and Eric Taylor*
- 22: Comorbidity: Depression and anxiety, *Cristal Oxley and Argyris Stringaris*
- 23: ADHD and substance misuse, *Timothy Wilens, Nicholas Carrellas, and Joseph Biederman*,
- 24: Autism spectrum disorder, *Sven Bölte, Luise Poustka, and Hilde Geurts*

- 25: Intellectual impairment and neurogenetic disorders, *Emily Simonoff*
- 26: Influence of tics and/or obsessive-compulsive behaviour on the phenomenology of ADHD, *Aribert Rothenberger, Andreas Becker, Lillian-Geza Rothenberger, and Veit Roessner*
- 27: Developmental coordination disorder, *Christopher Gillberg, Elisabeth Fernell, I. Carina Gillberg, and Björn Kadesjö*
- 28: ADHD and communication disorders, *Rosemary Tannock*
- 29: ADHD and reading disorder, *Erik G. Willcutt*
- 30: ADHD and sleep, *Melissa Mulraney, Emma Sciberras, and Michel Lecendreux*
- 31: The relationship of ADHD to obesity and allergy, *Samuele Cortese and Marcel Romanos*
-

SECTION VI. Clinical Assessment

- 32: Children and adolescents: Assessment in everyday clinical practice, *Marina Danckaerts and David Coghill*
- 33: ADHD in adults, assessment issues, *Sandra Kooij, Philip Asherson, and Michael Rösler*
-

SECTION VII. Interventions

- 34: Long-term outcomes in the multimodal treatment study of children with ADHD, *Jim Swanson*
- 35: Behavioural interventions for preschool ADHD, *David Daley and Saskia Van der Oord*
- 36: Cognitive-behavioural treatment in childhood and adolescence, *Manfred Döpfner and Saskia van der Oord*
- 37: Behavioural (adolescent / adult), *Alexandra Philomena Lam and Alexandra Philipsen*
- 38: Cognitive training approaches for ADHD: Can they be made more effective?, *Edmund Sonuga-Barke and Samuele Cortese*
- 39: Neurofeedback, *Martin Holtmann, Björn Albrecht, and Daniel Brandeis*
- 40: Nutritional intervention for ADHD, *Jan K. Buitelaar, Nanda Rommelse, Verena Ly, and Julia J. Rucklidge*
- 41: ADHD treatment: Psychostimulants, *Alessandro Zuddas, Tobias Banaschewski, David Coghill, and Mark A. Stein*
- 42: Non-stimulants in the treatment of ADHD, *Ralf W. Dittmann, Alexander Häge, Juan D. Pedraza, and Jeffrey H. Newcorn*
- 43: ADHD and transitions to adult mental health services, *Chris Hollis*
- 44: ADHD and school, *Christine Merrell and Kapil Sayal*
-

SECTION VIII. Clinical Management

- 45: Organizing and delivering treatment for ADHD, *David Coghill and Marina Danckaerts*
- 46: Treatment in Adult ADHD, *Philip Asherson and Josep Antoni Ramos-Quiroga*
- 47: The next steps: Future clinical and research developments in ADHD, *David Coghill, Alessandro Zuddas, Luis Augusto Rohde, and Tobias Banaschewski*
