Foreword	xv
Preface	xvii
Contributors	xix
Abbreviations	xxv
1 Introduction	1
<i>Michael L. J. Apuzzo</i>	
1.1 Essential “Arrows” in the Technical Quiver: Fragments of Personal Memoirs	1
1.2 Imaging (1973)	1
1.2.1 The Operating Microscope (1955).....	1
1.2.2 Modern Endoscopy (1974).....	2
1.2.3 Imaging Directed Stereotaxy and Navigation (1977).....	2
1.2.4 Bipolar Forceps (1955).....	3
1.2.5 Ultrasonic Aspirator (1978).....	3
1.2.6 Microanatomy (1973).....	3
2 The Evolution of Surgery—the Soul of Neurosurgery	4
<i>Edward R. Laws, Jr., Ian F. Dunn</i>	
2.1 Introduction: Early History	4
2.2 Nomenclature	4
2.3 Stages of Surgery for Meningiomas ...	6
2.4 Initial Surgical Progress	6
2.5 Extracranial Approaches to Skull Base Lesions	6
2.6 Microneurosurgery	7
2.7 Refined Skull Base Approaches and Anatomical Studies	8
2.8 Allied Advances in Meningioma Management	8
2.9 Modern Surgical Management	8
References	9
3 Inside the Pathology	11
<i>Marialaura Del Basso De Caro, Elia Guadagno, Felice Giangaspero</i>	
3.1 Skull Base: Elements of Anatomy and Embryology	11
3.2 Surgical Resectability	11
3.3 Meningiomas	12
3.3.1 Definition and Epidemiology.....	12
3.3.2 Histopathology.....	12
3.3.3 Immunohistochemistry.....	16
3.3.4 Molecular Features.....	16
3.3.5 Prognostic Factors.....	17
3.4 Solitary Fibrous Tumor/Hemangiopericytoma	18
3.5 Meningiomas of the Skull Base	18
3.5.1 Skull Base Meningiomas in Pediatric Age...	19
3.6 Future Perspectives	19
References	19

Contents

4	Exogenous Factors Affecting Meningiomas	21
	<i>Moujahed Labidi, Anne Laure Bernat, Sebastien Froelich</i>	
4.1	Introduction	21
4.2	Ionizing Radiation	21
4.3	Exogenous Hormones	22
4.3.1	Link between Cyproterone Acetate and Meningiomas	22
4.4	Radiofrequency Electromagnetic Fields	24
4.5	Metabolic Syndrome and Obesity	25
4.6	Occupational Exposures	25
4.7	Smoking	26
4.8	Immunity	26
4.9	Trauma	26
4.10	Conclusion	26
	References	26
5	Instrumentation (Micro, Endo, IGS, MRI Application)	29
	<i>Oreste de Divitiis, Phillip A. Bonney, Teresa Somma, Federico Frio, Gabriel Zada</i>	
5.1	Introduction	29
5.2	The Role of the Microscopy in Skull Base Surgery	29
5.2.1	Positioning	29
5.2.2	Operating Microscope	30
5.2.3	Microsurgical Instruments and Techniques	31
5.3	Endoscopy	32
5.3.1	Introduction	32
5.3.2	The Endoscope	32
5.3.3	Pure Endoscopic Approaches	33
5.3.4	Endoscope-Assisted Microneurosurgery ..	34
5.4	Image-Guided Surgery	34
5.5	Reconstruction Materials	35
5.5.1	Duraplasty and Hemostasis	35
	References	35
6	Intraoperative Neurophysiologic Monitoring during Surgery	37
	<i>Pietro Meneghelli, Francesco Sala</i>	
6.1	Introduction	37
6.2	Intraoperative Neurophysiologic Monitoring Techniques	38
6.2.1	Mapping Techniques to Identify Cranial Motor Nerves	38
6.2.2	Monitoring Techniques	39
6.2.3	Anesthetic Considerations	42
6.3	Clinical Application in Skull Base Surgery	43
6.3.1	IONM for Sellar and Cavernous Sinus Surgery	43
6.3.2	IONM for Cerebellopontine Angle Surgery	44
6.3.3	IONM for Jugular Foramen—Clival and Foramen Magnum Surgery	45
6.4	IONM Changes and Surgical Strategy ..	46
6.5	Conclusions	47
	References	47
7	Role of Stereotactic Radiosurgery	49
	<i>Gautam U. Mehta, Jeyan Kumar, Mohana Rao Patibandla, Jason P. Sheehan</i>	
7.1	Introduction	49
7.2	Radiobiology of Skull Base Meningiomas	49

7.3	Outcomes of Stereotactic Radiosurgery for Skull Base Meningiomas	49	7.4.1	General Indications	51
7.3.1	Radiological Response	49	7.4.2	Specific Tumor Locations	51
7.3.2	Cranial Neuropathy	50	7.4.3	Primary, Residual, and Recurrent Disease	52
7.3.3	Brainstem Toxicity	50	7.4.4	Atypical and Anaplastic Meningiomas	52
7.3.4	Other Complications	51	7.4.5	Case Example	52
7.4	Management of Skull Base Meningiomas and Indications for Stereotactic Radiosurgery	51	7.5	Conclusions	53
				References	53
8	Sphenoid Wing Meningiomas	55			
	<i>Francesco Tomasello, Domenico La Torre, Filippo Flavio Angileri, Alfredo Conti, Salvatore Massimiliano Cardali, Antonino F. Germanò</i>				
8.1	General Considerations and Definition	55	8.3	Medial Sphenoid Wing Meningioma	58
8.2	Lateral or Pterional Sphenoid Wing Meningiomas	57	8.3.1	General Aspects and Clinical Presentation	58
8.2.1	General Aspects and Clinical Presentation	57	8.3.2	Evaluation	59
8.2.2	Evaluation	57	8.3.3	Indications for Procedure	59
8.2.3	Indications for Procedure	57	8.3.4	Surgical Procedure	60
8.2.4	Surgical Approach	58	8.4	Final Considerations	61
				References	61
9	Clival Meningiomas	63			
	<i>Rami O. Almefty, Ossama Al-Mefty</i>				
9.1	Preoperative Definition of Lesion Features	63	9.4	Complications	65
9.1.1	Definition	63	9.4.1	Vascular	65
9.1.2	Anatomical Considerations	63	9.4.2	Cranial Nerve	66
9.2	Surgical Indications	63	9.4.3	Brainstem	66
9.3	Surgical Techniques	64	9.4.4	CSF Leak	66
9.3.1	Preoperative Assessment	64	9.4.5	Cholesteatoma	67
9.3.2	Approach Selection	64	9.5	Early and Long-term Postoperative Management	67
				References	67
10	Petroclival Meningiomas	68			
	<i>Danica Grujicic, Rosanda Ilic, Teresa Somma, Rosa Maria Gerardi, Luigi Maria Cavallo, Dragan Savic, Mihailo Milicevic</i>				
10.1	Introduction	68	10.3	Clinical Presentation	68
10.2	Anatomical Considerations	68	10.4	Preoperative Evaluation	69

Contents

10.5	Surgical Indications	70	10.7	Complications	74
10.6	Surgical Techniques	70	10.8	Early and Long-term Postoperative Management	74
10.6.1	Retrosigmoid Approach	70	10.9	Conclusion	74
10.6.2	Transpetrosal Approaches	72		References	75
10.6.3	Anterior Petrosal Approach	73			
10.6.4	Posterior Petrosal Approach	73			
11	Olfactory Groove Meningiomas	76			
	<i>Daniel M. Prevedello, Alaa S. Montaser, Matias Gómez G., Bradley A. Otto, Ricardo L. Carrau</i>				
11.1	Introduction	76	11.4.6	Endoscopic Endonasal Approach	80
11.2	Preoperative Definition of the Lesion Features	76	11.4.7	Algorithm for Surgical Management of Olfactory Groove Meningiomas (Endoscopic Endonasal Approaches vs. Craniotomy vs. Two-stages Strategy)	81
11.2.1	Anatomical Consideration	76	11.5	Illustrative Cases	81
11.2.2	Clinical Presentation and Workup	77	11.5.1	Case 1	81
11.3	Surgical Indications	77	11.5.2	Case 2	82
11.3.1	Planning the Surgical Strategy	77	11.5.3	Case 3	83
11.3.2	Preoperative Embolization	78	11.6	Complications	84
11.4	Surgical Techniques	78	11.7	Early and Long-term Follow-up	85
11.4.1	Subfrontal Approach with Unilateral or Bilateral Frontal Craniotomy	78	11.7.1	Functional Outcomes	85
11.4.2	Transbasal Approach	79	11.7.2	Recurrence	85
11.4.3	Pterional Approach	79		References	86
11.4.4	Frontolateral Approach	79			
11.4.5	Supraorbital Keyhole Approach	80			
12	Middle Fossa Floor Meningiomas	87			
	<i>Roberto Delfini, Benedetta Fazzolari, Davide Colistra</i>				
12.1	Introduction	87	12.5.2	Fronto-temporo-(orbito)-zygomatic Approach	91
12.2	Preoperative Definition of Lesion Features	87	12.5.3	Temporal Approach	92
12.2.1	Surgical Anatomy of the Middle Cranial Fossa	87	12.5.4	Operative Techniques	92
12.2.2	Middle Cranial Fossa Floor Meningiomas	88	12.6	Complications	93
12.3	Preoperative Management	90	12.6.1	How to Avoid Complications?	93
12.4	Surgical Indications	90	12.7	Long-term Outcome	94
12.5	Surgical Approaches	90	12.8	Conclusion	94
12.5.1	Pterional Approach	90	12.9	Acknowledgment	94
				References	94

13	Cerebellopontine Angle Meningiomas	95
	<i>Marcos Tatagiba, Toma Yuriev Spiriev, Florian H. Ebner</i>	
13.1	Introduction	95
13.2	Clinical Presentation and Preoperative Evaluation	95
13.3	Neuroradiological Evaluation	96
13.4	Patient Evaluation and Decision-making	97
13.5	Preoperative Surgical Planning and Complication Avoidance	98
13.6	Surgical Approaches	99
13.6.1	Anterior Petrossectomy Approach	100
13.7	Posterior and Combined Petrosal Approaches	102
13.7.1	Retrolabyrinthine Approach	102
13.7.2	Translabyrinthine Approach	103
13.7.3	Combined Petrosal Approach	103
13.7.4	Closure of Posterior and Combined Petrosal Approaches	104
13.8	Retrosigmoid Approach for the Treatment of Cerebellopontine Angle Meningiomas	104
13.9	Postoperative Complications Avoidance	107
13.10	 radiosurgery for Cerebellopontine Angle Meningiomas	108
13.11	Conclusion	109
	References	109
14	Foramen Magnum Meningioma	113
	<i>Devi Prasad Patra, Anil Nanda</i>	
14.1	Introduction	113
14.2	History	113
14.3	Surgical Anatomy	113
14.3.1	Occipital Condyle	114
14.3.2	Vertebral Artery	114
14.4	Epidemiology, Clinical Presentation, and Imaging	114
14.5	Classification of Foramen Magnum Meningioma	116
14.6	Operative Approaches	117
14.6.1	Posterior Suboccipital Approach	117
14.6.2	Far Lateral Approach	117
14.6.3	Extreme Lateral Approach	119
14.7	Controversies in Surgical Approaches ..	119
14.7.1	Need for Condyle Resection	119
14.7.2	Need for C1 Laminectomy	120
14.7.3	Need of Vertebral Artery Mobilization ..	120
14.8	Choosing the Right Approach	120
14.9	Complications	121
14.10	Outcome	122
14.11	Role of Radiosurgery	123
14.12	Personal Experience	123
14.13	Conclusion	125
	References	125
15	Tuberculum Sellae/Planum Meningiomas	127
	<i>Luigi Maria Cavallo, Norberto Andaluz, Alberto Di Somma, Domenico Solari, Paolo Cappabianca</i>	
15.1	Introduction	127
15.2	Preoperative Definition of Lesion Features	128
15.3	Surgical Indications	128
15.3.1	Indications for the Endoscopic Endonasal Approach	129

Contents

15.3.2	Indications for the Supraorbital Approach	130	15.6.1	Endoscopic Endonasal Surgery	135
15.4	Surgical Techniques	130	15.6.2	Supraorbital Surgery	135
15.4.1	Endoscopic Endonasal Approach	130	15.7	Early- and Long-term Postoperative Management	135
15.4.2	Supraorbital Eyebrow Approach	130	15.8	Conclusion	136
15.5	Complications	134		References	136
15.6	Surgical Results	135			
16	Cavernous Sinus Meningiomas	138			
	<i>Antonio Bernardo, Philip E. Stieg</i>				
16.1	Introduction	138	16.7.3	Fronto-Orbitozygomatic Osteotomy	142
16.2	Anatomy	138	16.7.4	Drilling of the Sphenoid Ridge	143
16.3	Development	138	16.7.5	Identification and Dissection of the Meningoorbital Band	143
16.4	Symptoms	140	16.7.6	Anterior Clinoidectomy	144
16.5	Diagnosis	140	16.7.7	Unroofing the Optic Nerve	144
16.6	Treatment	140	16.7.8	Extradural Exposure of the Cavernous Sinus	145
16.7	Surgical Approaches	141	16.7.9	Cavernous Sinus Exploration	146
16.7.1	Preoperative Preparation	141	16.8	Surgery and Radiosurgery	149
16.7.2	Positioning and Incision	142	16.9	Acknowledgments	149
				References	150
17	Reconstruction of the Skull Base	151			
	<i>Sebastien Froelich, Domenico Solari, Moujahed Labidi, Shunya Hanakita, Anne Laure Bernat, Philippe Herman, Paolo Cappabianca</i>				
17.1	Introduction	151	17.3	Current Reconstruction Techniques	154
17.2	Reconstruction Techniques and Materials	151	17.3.1	Transcranial Approaches	154
17.2.1	Free Autografts	152	17.3.2	Endoscopic Endonasal Approaches	156
17.2.2	Nonautologous Materials	153	17.4	Discussion and Conclusions	158
17.2.3	Vascularized Flaps	154		References	158
18	Management of Recurrent Skull Base Meningiomas	161			
	<i>Sheri K. Palejwala, Garni Barkhoudarian, Walavan Sivakumar, Daniel F. Kelly</i>				
18.1	Introduction	161	18.2.4	Histopathology	162
18.2	Recurrence	161	18.2.5	Radiation-induced Meningiomas	163
18.2.1	Presentation	161	18.2.6	Adjuvant Therapy of De Novo Meningiomas	163
18.2.2	Extent of Resection	161	18.2.7	Multiple Recurrences	163
18.2.3	Location	162	18.3	Management	163

18.3.1	Surveillance	164	18.4	Conclusion	174
18.3.2	Surgical Resection	164		References	174
18.3.3	Radiation	172			
18.3.4	Chemotherapy	173			
19	Natural History and Adjunctive Modalities of Treatment	176			
	<i>Peter F. Morgenstern, Jonathan Forbes, Theodore H. Schwartz</i>				
19.1	Introduction	176	19.3.1	Radiation	178
19.2	Natural History	176	19.3.2	Brachytherapy	179
19.2.1	WHO Grade I	177	19.3.3	Medical Therapies	180
19.2.2	WHO Grade II	177	19.4	Conclusion	182
19.2.3	WHO Grade III	178		References	182
19.3	Adjunct Treatment Modalities	178			
20	Complications in the Management of Skull Base Meningioma	185			
	<i>Deopujari CE, Vikram S. Karmarkar</i>				
20.1	Overview	185	20.5.2	Transnasal Endoscopic Skull Base Approaches	192
20.2	Preoperative Factors for Prediction of Complications	185	20.6	Location-related Complications	192
20.2.1	Clinicoradiological Factors	185	20.6.1	Olfactory Groove	192
20.2.2	Multidisciplinary Approach	187	20.6.2	Planum and Tuberculum Sellae	195
20.2.3	Surgeon Factors	187	20.6.3	Cavernous Sinus/Parasellar	195
20.2.4	Patient Factors	187	20.6.4	Sphenoid Wing Meningioma	195
20.3	Perioperative, Operative Complications and Prevention	187	20.6.5	Middle Cranial Fossa Meningioma	195
20.3.1	Anesthesia Considerations	187	20.6.6	Petroclival Meningioma	196
20.3.2	Operative Complications	188	20.6.7	Petrous-tentorial	196
20.4	Postoperative Complications and Prevention	190	20.6.8	Foramen Magnum Meningioma	196
20.5	Approach-related Problems	190	20.7	Conclusion	196
20.5.1	Transcranial Approaches	190	20.8	Acknowledgment	197
				References	197
