

## **Background and basics**

- 1: The epidemiology and pathophysiology of coronary artery disease, *Robert Henderson, Richard Varcoe*
- 2: The history of interventional cardiology, *Toby Rogers, Kenneth Kent, and Augusto D. Pichard*
- 3: Risk assessment and analysis of outcomes, *Peter F. Ludman*
- 4: Vascular access: femoral versus radial, *David H. Roberts*
- 5: Radiation and percutaneous coronary intervention, *Gurbir Bhatia, James Nolan*
- 6: The 'golden rules' of percutaneous coronary intervention, *Rod Stables*
- 7: Routine management after percutaneous coronary intervention, *Kevin O'Gallagher, Jonathan Byrne, and Philip MacCarthy*
- 8: Trial design and interpretation: statistics in PCI, *Ayman Al-Saleh and Sanjit Jolly*

## **Percutaneous coronary intervention-related imaging**

- 9: Angiography: indications and limitations, *David Adlam, Annette Maznyczka, and Bernard Prendergast*
- 10: Coronary physiology in clinical practice, *Olivier Muller, Stephane Fournier, Bernard De Bruyne*
- 11: The role of intravascular ultrasound in percutaneous coronary intervention, *Hirosasa Otake, Yasuhiro Honda, and Peter J. Fitzgerald*
- 12: Optical Coherence Tomography in Percutaneous Coronary Intervention, *Ravinay Bhindi and Keith M. Channon*
- 13: Coronary computed tomography for the interventionalist, *A. Coenen, L.E. Swart, R.P.J. Budde, and K. Nieman*
- 14: Cardiovascular magnetic resonance, *Theodoros D. Karamitsos and Stefan Neubauer*

## **Percutaneous coronary intervention by clinical syndrome**

- 15: Stable coronary artery disease: medical therapy versus percutaneous coronary intervention versus surgery, *Vasim Farooq and Patrick W. Serruys*
- 16: Percutaneous coronary intervention in non-ST elevation acute coronary syndrome, *Bashir Alaour, Michael Mahmoudi and Nick Curzen*
- 17: Primary percutaneous coronary intervention for ST elevation myocardial infarction, *Zulfiqar Adam and Mark A. de Belder*
- 18: Percutaneous coronary intervention in patients with impaired left ventricular function, *Divaka Perera and Natalia Briceno*

## **Percutaneous coronary intervention by lesion and patient subsets**

- 19: Coronary bifurcation stenting: state of the art, *Yves Louvard, Philippe Garot, Thomas Hovasse, Bernard Chevalier, and Thierry Lefèvre*
- 20: Percutaneous coronary intervention for unprotected and protected left main stem disease, *Michael Mahmoudi, Nick Curzen, Christine Hughes, Bruno Farah, and Jean Fajadet*
- 21: Chronic total occlusions, *Colm G. Hanratty, James C. Spratt, Simon J. Walsh*
- 22: Revascularisation in patients with diabetes mellitus, *George Kassimis and Adrian P. Banning*
- 23: Out of Hospital Arrest: Role of PCI, *Marko Noc and Peter Radsel*

## **Adjunctive drug therapies in percutaneous coronary intervention**

- 24: Current status of oral antiplatelet therapies, *Vikram Khanna, Tony Gershlick and Nick Curzen*
- 25: Current status of GP IIb/IIIa inhibitors, *Tim Lockie*
- 26: The role of bivalirudin in percutaneous coronary intervention, *Stefanie Schüpke, Steffen Massberg, and Adnan Kastrati*

27: Optimal medical therapy in percutaneous coronary intervention patients: statins and ACE inhibitors as disease-modifying agents, *Simon J. Corbett and Nick Curzen*

28: New Oral Anti-Coagulants (NOACs) and other Adjunctive Therapies, *Mikhail S. Dzeshka, Richard A. Brown, and Gregory Y.H. Lip*

### **Complications of percutaneous coronary intervention**

29: Contrast-induced acute kidney injury, *Peter A. McCullough*

30: In-stent restenosis in the drug-eluting stent era, *Jaya Chandrasekhar, Adriano Caixeta, Philippe G n reux, George Dangas, and Roxana Mehran*

31: Stent thrombosis, *Nikesh Malik, Amerjeet Banning, and Tony Gershlick*

32: Stent loss and retrieval, *Adam de Belder*

33: Coronary artery perforation, *Mark Gunning and Chee Wah Khoo*

### **Special devices in percutaneous coronary intervention**

34: Rotational atherectomy, *Adam de Belder, Martyn Thomas, and Emanuele Barbato*

35: Laser, *Peter O'Kane and Simon Redwood*

36: Saphenous Vein Graft PCI, Distal Protection and no-reflow, *Giovanni Luigi De Maria and Adrian P. Banning*

37: Bioresorbable Vascular Scaffolds, *Adam J. Brown and Nick E. J. West*

38: Access Sites and the TAVI Procedure, *Corrado Tamburino, Claudia Ina Tamburino and Sebastiano Imm *

39: Selection of TAVI Prostheses, *Mohamed Abdel-Wahab and John Jose*

40: Co-existent Coronary Artery Disease in Patients Undergoing TAVI: When and When Not to Treat, *Muhammed Zeeshan Khawaja and Simon Redwood*

41: Transcatheter Mitral Valve Repair, *Michael Bellamy and Christopher Baker*

42: Transcatheter Mitral Valve Replacement, *Ricardo Boix Garibo, Mohsin Uzzaman, Michael Ghosh-Dastidar, and Vinayak Bapat*

### **Other Non-coronary percutaneous interventions**

43: Percutaneous device closure of atrial septal defect and patent foramen ovale, *Patrick A. Calvert, Bushra S. Rana, Roland Hilling-Smith, and David Hildick-Smith*

44: Mitral balloon valvuloplasty, *Alec Vahanian, Dominique Himbert, Eric Brochet, Gr gory Ducrocq, and Bernard lung*

45: Alcohol septal ablation for obstructive hypertrophic cardiomyopathy, *Charles Knight, Saidi Mohiddin, and Constantinos O'Mahony*

46: Carotid artery stenting, *Iqbal Malik and Mohamed Hamady*

47: Left Atrial Appendage Occlusion, *Tim Betts*

### **The Future**

48: Novel Therapies for Hypertension, *Kenneth Chan, Manish Saxena, and Melvin D. Lobo*

49: Robotic PCI, *Giora Weisz*

50: Stem Cell Therapy and Delivery, *Fizzah Choudry and Anthony Mathur*
