

1. Introduction
2. General principles
 - a. Access
 - i. Direct puncture
 - ii. Hasson technique
 - iii. Hand assisted
 - iv. thoracoscopy (VATS)
 - b. Principles of trocar placement
3. Operations on the esophagus
 - a. Minimally invasive cricopharyngotomy for Zenker's diverticulum
 - b. Thoracoscopic Diverticulectomy
 - i. with myotomy
 - c. Laparoscopic Fundoplication
 - i. Nissen fundoplication
 - ii. Nissen Rossetti
 - iii. Toupet fundoplication
 - iv. Dor fundoplication
 - d. Laparoscopic repair of paraesophageal hernia
 - i. With mesh reinforcement of the hiatus
 - e. Collis gastroplasty for short esophagus
 - i. Thoracoscopic
 - ii. Laparoscopic
 - f. Laparoscopic Heller myotomy
 - i. With diverticulectomy
 - ii. With Dor fundoplication
 - iii. With Toupet fundoplication
 - g. Laparoscopic esophagectomy

- i. Transhiatal
- ii. Thoracoscopic
- iii. Inversion
- 4. Operations on the stomach
 - a. Bariatric procedures
 - i. Gastric bypass
 - 1. with antecolic RY
 - 2. with retrocolic RY
 - 3. with long limb RY
 - ii. Gastric banding
 - 1. pars flacida approach
 - iii. Duodenal switch with lateral gastrectomy
 - iv. Vertical Banded gastroplasty
 - b. Antrectomy
 - i. With B1
 - ii. With B2
 - c. Subtotal gastrectomy
 - d. Pyloroplasty
 - e. Pyloromyotomy
 - f. Gastrojejunostomy
 - g. Highly selective vagotomy
 - h. Wedge resection of ulcers of leiomyomas
 - i. Intra gastric surgery
 - i. For GI stromal tumors
 - ii. For pancreatic pseudocysts
- 5. Operations on the duodenum and small bowel
 - a. Enterolysis for SBO
 - b. Laparoscopic assisted SB resection
 - c. Laparoscopic assisted stricturoplasty

6. Laparoscopic appendectomy

a. Access

i. Traditional

ii. Variations

b. With endoloop

c. With stapler

d. Retrograde

e. Methods of retrieval

7. Laparoscopic Colorectal surgery

a. Right colectomy

b. Sigmoid colectomy

c. Total abdominal colectomy

i. Totally laparoscopic

ii. Hand assisted

iii. With Ileoanal pouch anastomosis

d. Diverting colostomy

e. Colostomy takedown

f. Abdominal perineal resection

g. Trans anal endoscopic microsurgery

8. Laparoscopic biliary surgery

a. Laparoscopic cholecystectomy

i. with cholangiography

ii. with ultrasonography

b. Laparoscopic common bile duct exploration

i. Transcystic cholangioscopy

ii. Transcystic fluoroscopy

iii. Via choledochotomy

9. Laparoscopic Liver surgery

a. Drainage of hepatic cysts

- b. Non anatomic liver resections
- 10. Laparoscopic pancreatic surgery
 - a. Distal pancreatectomy
 - i. With splenectomy
 - ii. Without splenectomy
 - b. Enucleation of Islet cell tumor
 - c. Pancreatic necrosectomy
- 11. Laparoscopic splenectomy
 - a. Lesser curvature approach
 - b. Lateral approach
- 12. Laparoscopic adrenalectomy
 - a. Left adrenalectomy
 - b. Right adrenalectomy
- 13. Laparoscopic nephrectomy
 - a. Donor nephrectomy
 - b. Laparoscopic nephrectomy for cancer
- 14. Laparoscopic lymphadenectomy
- 15. Thoracoscopic surgery of the chest wall
 - a. Pluerectomy and pluerodesis
 - b. Sympathectomy
- 16. Thoracoscopic Lung Surgery (VATS)
 - a. Wedge resection
 - b. Lobectomy
- 17. Upper GI endoscopy
 - a. Diagnostic
 - b. With PEG
 - c. For treatment of esophageal varicies
