*Preface* viii  
*Acknowledgments* ix  
*About the companion website* x

- 1** Quality of life associated with implant-supported prostheses: An introduction to implant dentistry 2
- 2** The basics: Osseointegration 4
- 3** The basics: The peri-implant mucosa 6
- 4** The basics: Surgical anatomy of the mandible 8
- 5** The basics: Surgical anatomy of the maxilla 10
- 6** The basics: Bone shape and quality 12
- 7** Implant macrostructure: Shapes and dimensions 14
- 8** Implant macrostructure: Short implants 18
- 9** Implant macrostructure: Special implants 22
- 10** Implant macrostructure: Implant/abutment connection 26
- 11** Implant microstructure: Implant surfaces 30
- 12** Choice of implant system: General considerations 32
- 13** Choice of implant system: Clinical considerations 34
- 14** Success, failure, complications and survival 38
- 15** The implant team 42
- 16** Patient evaluation: Medical evaluation form and laboratory tests 44
- 17** Patient evaluation: Surgery and the patient at risk 46
- 18** Patient evaluation: The patient at risk for dental implant failure 50
- 19** Patient evaluation: Local risk factors 54
- 20** Patient evaluation: Dental history 58
- 21** Patient evaluation: Dental implants in periodontally compromised patients 60
- 22** Patient evaluation: Aesthetic parameters 62
- 23** Patient evaluation: Surgical parameters 66
- 24** Patient evaluation: Surgical template 68
- 25** Patient evaluation: Imaging techniques 70
- 26** Patient records 74
- 27** The pretreatment phase 78
- 28** Treatment planning: Peri-implant environment analysis 80
- 29** Treatment planning: The provisional phase 82
- 30** Treatment planning: Immediate, early and delayed loading 86
- 31** Treatment planning: Single-tooth replacement 90
- 32** Treatment planning: Implant-supported fixed partial denture 94
- 33** Treatment planning: Fully edentulous patients 98
- 34** Treatment planning: Edentulous mandible 100
- 35** Treatment planning: Edentulous maxilla 102

<b>36</b>	Treatment planning: Aesthetic zone	104
<b>37</b>	Dental implants in orthodontic patients	106
<b>38</b>	Surgical environment and instrumentation	110
<b>39</b>	Surgical techniques: Socket preservation	112
<b>40</b>	Surgical techniques: The standard protocol	116
<b>41</b>	Surgical techniques: Implants placed in postextraction sites	118
<b>42</b>	Surgical techniques: Computer-guided surgery	122
<b>43</b>	CAD/CAM and implant prosthodontics: Background	126
<b>44</b>	CAD/CAM and implant prosthodontics: Technical procedure	128
<b>45</b>	Bone augmentation: One-stage/simultaneous approach versus two-stage/staged approach	132
<b>46</b>	Bone augmentation: Guided bone regeneration – product and devices	136
<b>47</b>	Bone augmentation: Guided bone regeneration – technical procedures	140
<b>48</b>	Bone augmentation: Graft materials	144
<b>49</b>	Bone augmentation: Block bone grafts	146
<b>50</b>	Bone augmentation: Split osteotomy (split ridge technique)	150
<b>51</b>	Bone augmentation: Sinus floor elevation – lateral approach	154
<b>52</b>	Bone augmentation: Sinus floor elevation – transalveolar approach	158
<b>53</b>	Bone augmentation: Alveolar distraction osteogenesis	162
<b>54</b>	Soft tissue integration	164
<b>55</b>	Soft tissue augmentation	168
<b>56</b>	Prescriptions in standard procedure	172
<b>57</b>	Postoperative management	174
<b>58</b>	Surgical complications: Local complications	176
<b>59</b>	Surgical complications: Rare and regional complications	180
<b>60</b>	Life-threatening surgical complications	182
<b>61</b>	Peri-implant diseases: Diagnosis	184
<b>62</b>	Peri-implant diseases: Treatment	188
<b>63</b>	Dental implant maintenance	192
	<i>Appendix A: Glossary</i>	194
	<i>Appendix B: Basic surgical table and instrumentation</i>	195
	<i>Appendix C: Preparation of the members of the sterile team</i>	196
	<i>Appendix D: Medical history form</i>	197
	<i>Appendix E: Consent form for dental implant surgery</i>	202
	<i>Appendix F: Postoperative patient records: stage 1</i>	205
	<i>Appendix G: Postoperative patient records: stage 2</i>	206
	<i>Appendix H: Postoperative instructions</i>	207
	<i>Appendix I: Treatment planning: fully edentulous patient</i>	209
	<i>Appendix J: Overdenture supported by two implants: surgical procedure</i>	211
	<i>Appendix K: Overdenture supported by two implants: prosthetic procedure</i>	212
	<i>Appendix L: Fixed prosthesis (mandible) supported by four implants</i>	213
	<i>Appendix M: Fixed prosthesis (maxilla) supported by four implants</i>	214
	<i>Appendix N: Overview of the digital implant dentistry</i>	215
	<i>Appendix O: The double scanning method</i>	216
	<i>Appendix P: The virtual modelling method</i>	217
	<i>Appendix Q: Guided bone regeneration</i>	219
