

## Contents

List of Contributors *xv*

Preface *xvii*

### Section 1 General Information *1*

#### 1 Fracture Identification *3*

*Anne M. Sylvestre*

- 1.1 Number of Fragments *3*
- 1.2 Fracture Configuration *3*
- 1.3 Location on the Bone *7*
- 1.4 Salter–Harris Fractures *7*

#### 2 Open Fractures *9*

*Anne M. Sylvestre*

- 2.1 First Degree *9*
- 2.2 Second Degree *9*
- 2.3 Third Degree *9*
- Reference *10*

#### 3 Patient Management *11*

*Anne M. Sylvestre*

- 3.1 The Patient *11*
  - 3.1.1 Upon Admission *11*
  - 3.1.2 Immediate Postoperative Care *11*
  - 3.1.3 Upon Discharge From Hospital *11*
  - 3.1.4 Outside and Walks *12*
  - 3.1.5 Follow-up Radiographs and Healing Times *13*
  - 3.1.6 Implant Removal *13*
- 3.2 The Owner *14*
  - 3.2.1 Slippery Floors *14*
  - 3.2.2 Stairs *15*
  - 3.2.3 No Jumping *15*
  - 3.2.4 Common Stressors *15*
  - 3.2.5 Crates *15*
  - 3.2.6 Icing *15*
  - 3.2.7 Gentle Passive Range of Motion (PROM) *16*
  - 3.2.8 Urination and Bowel Movements *16*
  - 3.2.9 Food and Water *16*
  - 3.2.10 Cats *17*
- 3.3 Managing Osteoarthritis (OA) *17*
- References *17*

**4 Bandages and Splints 19***Jennifer White and Anne M. Sylvestre*

- 4.1 The Bandage 19
  - 4.1.1 Layers of a Bandage 19
  - 4.1.2 Creating the Bandage 19
- 4.2 Forelimb 27
  - 4.2.1 Velpeau Sling 27
  - 4.2.2 Spica Bandage 30
  - 4.2.3 Antebrachial Bandages 31
  - 4.2.4 Bandages for a Manus 37
  - 4.2.5 Carpal Flexion Sling 37
- 4.3 Hind Limb 39
  - 4.3.1 Ehmer Sling 39
  - 4.3.2 Robert Jones Bandage 39
  - 4.3.3 Crural and Tarsal Bandages 39
  - 4.3.4 Bandages for a Pes 47
  - 4.3.5 Robinson and 90-90 Slings 47
- 4.4 Bandage Care 47
  - 4.4.1 Home Care Instructions 47
  - 4.4.2 Bandage Changes 50
  - 4.4.3 Bandage/Splint Complications 50
- Reference 60

**Section 2 The Forequarter 61****5 Mandible and Maxilla 63***Teresa Jacobson*

- 5.1 Mandibular Fractures 63
  - 5.1.1 Mandibular Symphyseal Separation 63
  - 5.1.2 Rostral Mandibular Fractures 63
  - 5.1.3 Fracture at the Level of the Mandibular First Molar 64
  - 5.1.4 Temporomandibular Luxation 65
  - 5.1.5 Other Mandibular Fractures 68
- 5.2 Maxillary Fractures 68
  - 5.2.1 Fracture and/or Avulsion of the Incisive Bone 68
  - 5.2.2 Fractures of the Maxillary Bone 68
- 5.3 Managing Expectations 68
- 5.4 Alternatives When the Treatment of Choice is Not an Option 68
- 5.5 Potential Complications of Maxillofacial Fracture Repair 69
- References 74

**6 Scapula 75***Anne M. Sylvestre*

- 6.1 Fractures 75
  - 6.1.1 Fractures Through the Body and Spine of the Scapula 75
  - 6.1.2 Acromion Fractures 76
  - 6.1.3 Fractures of the Neck of the Scapula 76
- 6.2 Managing Expectations with Recommended Treatments 78
- 6.3 Alternatives When Treatment of Choice is Not an Option 78
- References 79

- 7 Shoulder Joint 81**  
*Anne M. Sylvestre*
- 7.1 Fractures and Luxations 82
    - 7.1.1 Avulsion of the Supraglenoid Tuberosity 82
    - 7.1.2 T or Y Fractures of the Scapular Neck and Glenoid Rim 82
    - 7.1.3 Other Fractures Involving the Shoulder Joint 82
    - 7.1.4 Medial Luxations 82
    - 7.1.5 Lateral Luxations 84
  - 7.2 Managing Expectations with Recommended Treatments 84
  - 7.3 Alternatives When Treatment of Choice is Not an Option 86
    - 7.3.1 Fractures 86
    - 7.3.2 Luxations 86
  - References 86
- 8 Humerus 87**  
*Catherine Popovitch, Thomas W.G. Gibson, and Anne M. Sylvestre*
- 8.1 Fractures 88
    - 8.1.1 Physeal Fractures of the Proximal Humerus 88
    - 8.1.2 Two-Piece Humeral Shaft Fractures 88
    - 8.1.3 Multifragmented Humeral Shaft and/or Supracondylar Fractures 89
  - 8.2 Managing Expectations with Recommended Treatments 90
  - 8.3 Alternatives When Treatment of Choice is Not an Option 90
  - References 91
- 9 Elbow Joint 93**  
*Anne M. Sylvestre*
- 9.1 Fractures and Luxations 94
    - 9.1.1 Condylar Fractures 94
    - 9.1.2 Bicondylar Fractures 94
    - 9.1.3 Acute Luxations 94
    - 9.1.4 Chronic Luxations 99
    - 9.1.5 Proximal Ulnar Fractures 100
    - 9.1.6 Monteggia Fractures 100
  - 9.2 Managing Expectations with Recommended Treatments 101
  - 9.3 Alternatives When Treatment of Choice is Not an Option 101
    - 9.3.1 For Patients with a Fracture 101
    - 9.3.2 For Patients with a Luxation 102
  - References 102
- 10 Radius and Ulna 105**  
*Catherine Popovitch, Thomas W.G. Gibson, and Anne M. Sylvestre*
- 10.1 Fractures 106
    - 10.1.1 Fractures of the Proximal Ulna 106
    - 10.1.2 Fractures of the Proximal Radius 106
    - 10.1.3 Fractures of the Radius in Toy Breed Dogs 106
    - 10.1.4 Fractures of the Radius and Ulna in Non-Toy Breed Dogs and Cats 107
    - 10.1.5 Isolated Fractures of the Shaft of the Ulna 112
    - 10.1.6 Physeal Fractures of the Distal Radius 112
  - 10.2 Managing Expectations with Recommended Treatments 114
  - 10.3 Alternatives When Treatment of Choice is Not an Option 114
  - References 117

**11 Carpal Joint 119***Anne M. Sylvestre*

- 11.1 Fractures and Ligamentous Injuries 120
  - 11.1.1 Fractures of the Styloid Process of the Radius or Distal Ulna 120
  - 11.1.2 Fractures of the Radial Carpal Bone 120
  - 11.1.3 Fractures of the Accessory Carpal Bone 122
  - 11.1.4 Fractures of the Ulnar Carpal Bone 123
  - 11.1.5 Collateral Ligament Injuries 123
  - 11.1.6 Shearing Injuries 124
  - 11.1.7 Hyperextension Injuries 125
  - 11.1.8 Luxation of the Antebrachiaocarpal Joint 125
  - 11.1.9 Luxation of the Accessory Carpal Bone 125
  - 11.1.10 Luxation of the Radiocarpal Bone 126
- 11.2 Managing Expectations with Recommended Treatments 127
- 11.3 Alternatives When Treatment of Choice is Not an Option 127
  - 11.3.1 For Patients with a Fracture 127
  - 11.3.2 For Patients with Ligamentous Injuries 128
- 11.4 About Pancarpal Arthrodesis 128
- 11.5 About Partial Carpal Arthrodesis 128
- References 129

**Section 3 The Hindquarter 131****12 Pelvis 133***Anne M. Sylvestre*

- 12.1 Co-morbidities 134
- 12.2 Fractures 134
  - 12.2.1 SI Luxations/Fractures 134
  - 12.2.2 Fractures of the Iliac Shaft or Wing 134
  - 12.2.3 Acetabular Fractures 137
  - 12.2.4 Ischial Fractures 137
  - 12.2.5 Fractures of the Pelvic Floor 137
  - 12.2.6 Summary of Indications for Surgical Repair of Pelvic Fractures 138
- 12.3 Managing Expectations with Recommended Treatments 139
- 12.4 Alternatives When Treatment of Choice is Not an Option 139
- References 140

**13 Coxofemoral Joint 141***Thomas W.G. Gibson and Anne M. Sylvestre*

- 13.1 Fractures and Luxations 141
  - 13.1.1 Acetabular Fractures 141
  - 13.1.2 Hip Luxations 142
  - 13.1.3 Alternative Treatment of Choice: Open Reduction 146
  - 13.1.4 Capital Physeal Fractures of the Proximal Femur 148
  - 13.1.5 Fractures of the Femoral Neck 149
- 13.2 Managing Expectations with Recommended Treatments 150
- 13.3 Alternatives When Treatment of Choice is Not an Option 150
  - 13.3.1 Acetabular Fractures 150
  - 13.3.2 Luxations 150
  - 13.3.3 Femoral Head and Neck Fractures 151
- 13.4 About the FHO 151
- References 152

<b>14</b>	<b>Femur</b>	<b>153</b>
	<i>Thomas W.G. Gibson and Anne M. Sylvestre</i>	
14.1	Fractures	154
14.1.1	Avulsion Fractures of the Greater Trochanter	154
14.1.2	Fractures of the Femoral Shaft	154
14.1.3	Physal Fractures of the Distal Femur	157
14.2	Managing Expectations with Recommended Treatments	159
14.3	Alternatives When Treatment of Choice is Not an Option	159
	References	161
<b>15</b>	<b>Stifle Joint</b>	<b>163</b>
	<i>Anne M. Sylvestre</i>	
15.1	Fractures and Luxations	164
15.1.1	Articular Distal Femoral Fractures	164
15.1.2	Patellar Fractures	164
15.1.3	Traumatic Patellar Luxations	166
15.1.4	Collateral Ligament Damage	166
15.1.5	Luxation of the Stifle Joint	166

**18 Paw (Manus and Pes) 199***Anne M. Sylvestre*

- 18.1 Fractures and Luxations 199
    - 18.1.1 MC/MT Fractures 199
    - 18.1.2 Phalangeal Fractures 202
    - 18.1.3 Luxations of the Inter-Phalangeal or MC/MT-Phalangeal Joints 203
  - 18.2 Managing Expectation with Recommended Treatments 204
  - 18.3 Alternatives When Treatment of Choice is Not an Option 204
- References 204

**Section 4 Fracture Repair Techniques 205****19 Essential Information on Fracture Repair 207***Anne M. Sylvestre*

- 19.1 Forces Applied to a Bone 208
  - 19.2 Techniques for Reducing a Fracture 208
    - 19.2.1 Distraction 209
    - 19.2.2 Lever 209
    - 19.2.3 Toggle 209
    - 19.2.4 Oblique Fractures 210
    - 19.2.5 Using the Plate 211
  - 19.3 Instrumentation 211
    - 19.3.1 Drills 211
    - 19.3.2 Fracture Repair General Instruments 213
- References 214

**20 Pins and Wires 215***Catherine Popovitch*

- 20.1 Case Selection 215
  - 20.2 Instrumentation 215
  - 20.3 Fundamentals of Application 215
    - 20.3.1 Cerclage Wires 215
    - 20.3.2 Pins 216
  - 20.4 Pinning Techniques for Various Long Bones 218
    - 20.4.1 Humerus 218
    - 20.4.2 Radius 218
    - 20.4.3 Femur 218
    - 20.4.4 Tibia 220
- References 221

**21 Plating 223***Anne M. Sylvestre*

- 21.1 Case Selection 223
- 21.2 Instrumentation 223
  - 21.2.1 Bone Screws 223
  - 21.2.2 Bone Plates 224
  - 21.2.3 Plating-specific Instruments 225
- 21.3 Fundamentals of Application 226
  - 21.3.1 Selecting a Plate 226
  - 21.3.2 At Surgery 227
  - 21.3.3 Pin-Plate Combination 228
  - 21.3.4 Stack Plating 230
- 21.4 Postoperative Care 230

- 21.5 Plating Techniques for Various Long Bones 230
  - 21.5.1 Humerus 230
  - 21.5.2 Radius 230
  - 21.5.3 Femur 230
  - 21.5.4 Tibia 232
  - References 233
  
- 22 External Fixators 235**  
*Kathryn Wander*
  - 22.1 Case Selection 235
  - 22.2 Basic Rules of External Fixation 235
    - 22.2.1 Pins 235
    - 22.2.2 Connecting Bars 236
    - 22.2.3 Clamps 236
  - 22.3 Fundamentals of Application 237
  - 22.4 Fixators: Biomechanics/Constructs 237
    - 22.4.1 Acrylic Splints/Constructs 238
    - 22.4.2 Circular External Fixators 239
  - 22.5 Postoperative Care 239
  - 22.6 Complications 241
  - 22.7 Preferred Technique for Various Long Bones 242
    - 22.7.1 Tibial Fractures 242
    - 22.7.2 Humeral Fractures 242
    - 22.7.3 Femoral Fractures 242
    - 22.7.4 Radial Fractures 242
  - References 243
  
- 23 Repair of Physeal Fractures 245**  
*Thomas W.G. Gibson*
  - 23.1 Physeal Fractures 245
    - 23.1.1 Crossed Pin Technique 246
  - 23.2 Avulsion Type Physeal Fractures 247
    - 23.2.1 Tension Band Wiring Technique 247
  - 23.3 Repair Techniques for Various Physeal Fractures 247
    - 23.3.1 Proximal Humerus 247
    - 23.3.2 Proximal Ulna 247
    - 23.3.3 Proximal Radius 247
    - 23.3.4 Distal Radius 247
    - 23.3.5 Greater Trochanter 248
    - 23.3.6 Distal Femur 248
    - 23.3.7 Tibial Tuberosity 248
    - 23.3.8 Proximal Tibial Physis 248
    - 23.3.9 Distal Tibial Physis 248
  - References 248
  
- 24 Fractures of the Jaw 251**  
*Teresa Jacobson*
  - 24.1 Anatomical Considerations 251
  - 24.2 Jaw Fracture Management 251
    - 24.2.1 The Principles of Jaw Fracture Management 252
    - 24.2.2 Intubation Considerations for the Fracture Repair 253
    - 24.2.3 Feeding Plan Post Jaw Fracture Repair 253
  - 24.3 Pain Management 254
  - 24.4 Maxillofacial Fracture Repair 255

24.5	Methods of Maxillofacial Fracture Stabilization	257
24.5.1	Tape or Nylon Muzzles	257
24.5.2	Osseous Wiring Techniques for Maxillofacial Fracture Repair	257
24.5.3	Intra-Dental Wiring Techniques with Acrylic Reinforcement	260
24.5.4	Bonding the Maxillary to the Mandibular Canines	265
24.6	Bone Grafts	266
24.7	Teeth in the Fracture Line	266
24.8	Antibiotic Therapy in Maxillofacial Fracture Repair	267
24.9	Irrigation of the Appliance	267
24.10	Recheck Examinations	267
	References	267

**25 Approaches to the Long Bones 269**

*Anne M. Sylvestre*

25.1	Approach to the Diaphysis of the Humerus	269
25.1.1	Patient Position	269
25.1.2	The Surgical Approach	269
25.2	Approach to the Diaphysis of the Radius	271
25.2.1	Patient Position	271
25.2.2	Surgical Approach	271
25.3	Approach to the Femoral Diaphysis	271
25.3.1	Patient Position	271
25.3.2	The Surgical Approach	272
25.4	Approach to the Tibial Diaphysis	272
25.4.1	Patient Position	272
25.4.2	The Surgical Approach	272
	Reference	274

**26 Implants 275**

*Harold Wotton*

26.1	Maneuvering Orthopedic Implants	275
26.2	Quality Implants: Essential Information on Quality Implants	276
26.3	Titanium vs Stainless Steel	276

**Index 279**
