

## Contents

<b>About the Author</b>	<i>xvii</i>
<b>Foreword</b>	<i>xix</i>
<b>Preface</b>	<i>xxi</i>
<b>Acknowledgements</b>	<i>xxiii</i>
<b>1 The Dental Operatory</b>	<b>1</b>
Space	1
Electricity, Water, and Drainage	1
Ergonomics	2
The Operatory	2
Adjustable Stools/Chairs	2
Built-in Desk	6
Powered Dental Delivery Systems	6
Electric	6
Air/Gas-Driven	8
Compressor	10
Storage Tank	10
Assembly Delivery System	10
Storage	11
Lighting	11
Dental Loupes (Telescopes)	13
Radiography	15
CR (Computed Radiography) Technology	15
DR (Digital Radiography) Technology	16
General Anesthesia	16
ASA Scoring	16
Patient Monitoring Devices	17
Blood Pressure (BP)	20
End-Tidal Carbon Dioxide (ETCO <sub>2</sub> )	21
Pulse Oximetry (SpO <sub>2</sub> )	24
Electrocardiography (EKG)	25
Respiration	25
Temperature	26
Regional Analgesia	26
Benefits of Regional Anesthesia	26
Indications for Regional Anesthesia	27
Contraindications for Local and Regional Anesthesia	27
Onset of Action	27
Duration	27
Regional Anesthesia Equipment	27
Dosage	27
Injection Precautions	27

Technique	28
Infraorbital Nerve Block	28
Caudal Maxillary Nerve Block	29
Middle Mental Nerve Block	31
Caudal Mandibular (Inferior Alveolar) Nerve Block	31
Further Reading	32

## 2 **Equipment, Instruments, and Materials for Operative Dentistry** 37

Equipment and Material Recommendations Based on the Level of Dental Care	37
Diagnostics for Basic Dentistry	37
Dental Charts	37
Dental Explorer	37
Periodontal Probe	37
Dental Mirror	37
Mouth Props	37
Operator Safety Equipment	40
Dental Scaling, Irrigation and Polishing Equipment, Instruments, and Techniques	40
Hand Instruments (Scalers and Curettes) for Plaque and Calculus Removal	40
Sickle Scaler	40
Calculus Removal Forceps	41
Curettes	41
Powered Dental Scaling	42
Sonic- and Ultrasonic-Assisted Dental Scaling	42
Dental Polishing Equipment and Materials	47
Sealants	50
Locally Administered Antimicrobials (LAA)	50
Extraction Instruments and Materials	50
Oral Surgery Instruments	50
Periotome	51
Mechanical Periotome	52
Periosteal Elevator	52
Dental Luxators and Dental Elevators for Extractions	52
Luxators	53
Elevators	53
Extraction Forceps	54
Root Tip Pick	54
Hand Instrument Sharpening	54
Instrument Cassette	54
Dental Handpieces	56
Low-Speed Handpiece	56
Contra-Angle Attachment	56
High-Speed Handpiece	58
Burs	59
The Bur Shank	59
The Bur Head	60
Bur Types	60
Maintenance of Dental Equipment	66
Handpiece Maintenance	66
Replacing the High-Speed Turbine	66
Low-Speed Handpiece Cleaning Steps	67
Bur Maintenance	67
Compressor Maintenance	67
Homecare Products to Reduce the Accumulation of Plaque and Tartar (Calculus)	67

The Veterinary Oral Health Council (VOHC)	67
Other Homecare Products, Which May Decrease the Accumulation of Plaque and/or Tartar When Used Properly	68
Toothbrush/Dentifrice	68
Wipes	68
Exam Room Educational Aides	68
Dental Models	69
Equipment and Materials for Advanced Dental Care	69
Debriding the Canal	69
Endodontic Files	70
Canal Irrigation	70
Drying the Prepared Irrigated Canal	72
Obturing the Canal	72
Filling the Prepared and Cleaned Root Canal	72
Gutta Percha	72
College-Tipped Pliers to Handle the Paper and Gutta Percha Points	73
Retrograde Amalgam Carrier (1 mm)	73
Spreaders	73
Pluggers	73
MTA	73
Light-Cured Glass Ionomer Liner/Base	74
Restorative Materials Used in Advanced Dental Procedures	75
Composite Resins	75
Curing Light	75
Polishing the Restoration	75
Advanced Periodontal and Oral Surgery	75
Lasers	75
Carbon Dioxide Laser (10,600 nm)	75
Diode Laser	77
Therapy Lasers (Low-Level Laser Therapy – LLLT)	77
Laser Safety	77
Orthodontic Equipment and Materials Used in Advanced Dental Procedures	79
Alginate Used to Create Arch Impressions to Create a Dental Model	79
Boxing and Bite Registration Wax	79
Dental Casts (Study Models, Stone Models)	80
Orthodontic Buttons and Masel Chain Elastics	80
Composite Splinting Material Used in Fabrication of Inclined Plane and Fracture Stabilization	80
Patient and Operator Infection Control	80
Further Reading	83
<b>3 Oral Anatomy for the General Practitioner</b>	<b>87</b>
The Oral Cavity	87
Mucosa	87
Muscles	87
Tongue	87
Innervation of the Oral Cavity	89
Blood Supply and Lymphatic Drainage	90
Salivary Glands	90
Periodontium	90
Gingiva	90
Attached Gingiva	93
Gingival Sulcus	93

Periodontal Ligament	93
Cementum	94
Alveolar Bone	94
Cranium	95
Facium	95
Maxillae and Mandibles	95
Maxillae	95
Mandibles	97
Temporomandibular Joint	100
Teeth	100
Cat Teeth	101
Dog Teeth	102
Tooth Types and Numbers	102
Tooth Structure	105
Enamel	105
Dentin	105
Pulp	106
Tooth Eruption	108
Surfaces of Teeth and Directions in the Mouth	109
Further Reading	112

#### 4 Dental Radiography 113

Incorporating Dental Radiography into General Practice	113
Radiation Safety	113
ALARA	113
Personnel Monitoring	113
Radiograph Equipment	113
X-ray Generator	114
Sensors	114
Intraoral Digital Software	116
Positioning	116
Parallel and Bisecting Angle Techniques	117
Vertical and Horizontal Angulation	118
Positioning for the Maxillary Arch	120
SLOB Rule	123
Extraoral Technique to Remove Superimposition of the Zygomatic Arch	125
Positioning for the Mandibles	126
Temporomandibular Joint	126
CT and CBCT Imaging	128
Radiograph Image Troubleshooting	128
Foreshortened Image	128
Elongated Image	128
Image Archiving	128
Radiograph Interpretation	133
Radiographic Landmarks	133
Mental Foramina and Mandibular Canal	133
Radiographic Terminology	136
The Symphysis	137
Chevron-Shaped Lucency	137
Maxillary Sinus Radiolucencies and Densities	137
Mandibular Canal Overlay	137
Periodontal Disease	137
Horizontal Bone Loss	140
Vertical Bone Loss	140

	Furcation Involvement and Exposure	142
	Alveolar Bone Expansion (Chronic Alveolar Osteitis)	143
	Tooth Extrusion	144
	Endodontic Disease	144
	Radiograph Evaluation for Endodontic Disease	144
	Pulpitis	146
	Internal Resorption	148
	Endoperio Lesions	148
	Perioendo Lesions	149
	External Root Resorption	149
	Classification of Tooth Resorption by Stages and Types	152
	Classification by Tooth Resorption Types	154
	Neoplastic Disease	154
	Computed Tomography (CT) and Cone Beam Computed Tomography (CBCT) Imaging	155
	Further Reading	159
<b>5</b>	<b>Charting</b>	<b>163</b>
	Two-/Four-Handed Charting	163
	Step-By-Step Charting	163
	The Conscious Exam	163
	Incisor Relationship	163
	Canine Relationship	185
	Premolar and Molar Relationship	185
	Temporomandibular Joints	185
	Anesthetized Examination	185
	Tooth-By-Tooth Examination	188
	Periodontal Indices	191
	Gingiva	191
	The Periodontal Probe	191
	Clinical Probing Depth	192
	Dental Explorer	192
	Furcation Disease Charting	194
	Bleeding on Probing	194
	Gingivitis Index	194
	Tooth Mobility	194
	Plaque and Calculus Accumulation	194
	Crown Pathology	198
	Enamel Hypoplasia	200
	Enamel Hypomineralization	200
	Trauma	201
	Resorptions and Caries	207
	Charting Abbreviations	212
	Therapy Abbreviations	217
	Further Reading	218
<b>6</b>	<b>The Comprehensive Oral Prevention, Assessment, and Treatment Visit</b>	<b>221</b>
	Comprehensive Oral Prevention, Assessment, and Treatment (COPAT)	221
	Case Volume	222
	Workflow	222
	A Real Timeline Workflow Example	223
	9:00 Examination of the Conscious Dental Patient	223
	12:13 General Anesthesia for Oral Cavity and Tooth-by-Tooth Examination, Probing and Full-Mouth Intraoral Radiographs	227
	12:55 Anesthetized Examination	227

Basic Treatment Options in Companion Animal Dentistry	227
1:16 P.M. Exam Findings and Treatment Plan Discussed with the Owner. Approval Gained for Additional Care and Related Fees	230
1:43 P.M. Extraction Completed	230
2:36 P.M. Patient Recovered from Procedure	230
3:44 P.M. Veterinary Assistant Prepares Report to Share with Client	230
6:00 P.M. Patient Discharge and Client Discussion with Immediate Homecare Instructions	230
Plaque and Calculus Prevention	230
Efficacy of Homecare Products	231
The Veterinary Oral Health Council	231
Efficacy Through Mechanical Action	232
Efficacy Through Nonmechanical Action	235
Efficacy Through Mechanical <i>plus</i> Nonmechanical Actions	236
Safety of Homecare Products	236
Gastrointestinal Inflammation	237
Safety Against Tooth Fracture	237
Scheduling the Next Professional Oral Hygiene Visit	237
Further Reading	238

<b>7 Oropharyngeal Inflammation</b>	<b>243</b>
Periodontal Diseases	243
Clinical Periodontal Diseases	245
Stage 1 (PD1) Periodontal Disease – Gingivitis Inflammation of the Gingiva Without Support Loss	245
Etiology and Pathogenesis of Periodontal Disease	245
Periodontal Probing/Intraoral Radiography	245
Bleeding on Probing	246
Local Antibiotic Application	246
Diode Laser Periodontal Therapy	248
Stage 2 (PD2) Periodontal Disease – Early Periodontitis	253
Suprabony and Infrabony Pockets	253
Gingival Recession – Non-Pocketing Periodontal Disease	256
Treatment of Gingival Recession	257
Mucogingival Surgery	257
Furcation Disease	259
Tooth Mobility	259
Stage 3 (PD3) Periodontal Disease – Moderate Periodontitis	260
Stage 4 Periodontal Disease (PD4) – Advanced Periodontitis	260
Canine Tooth Extrusion (Super Eruption)	260
Alveolar Bone Expansion (Chronic Alveolar Osteitis)	262
Oronasal Fistula	262
Periodontal Regeneration	264
Where Bone Grafts Are Indicated	266
Bone Grafts Are Not Indicated Where	266
Technique to Place a Bone Graft	266
Canine Palatal Periodontal Pockets	267
Palatal Defect Graft Technique	267
Guided Tissue Regeneration	268
Mucositis – Inflammation of the Oral Mucosa	268
Treatment for Contact Mucositis	271
Stomatitis	273
Feline Chronic Gingivitis Stomatitis	273
Etiology of FCGS	273
History and Clinical Signs and Symptoms	275
Radiography	275

Medical Management of FCGS	275
Antimicrobials	276
Anti-Inflammatory Medication	276
Meloxicam	276
Cyclosporine	276
Interferon	276
Intralesional Use of Interferon Protocols	277
Steroids	277
Surgical Management of FCGS	277
Extraction of Selective Teeth or Full-Mouth Extraction	277
Technique for Placement of Esophagostomy Feeding Tube in the Anesthetized Cat	278
Extraction Instrumentation and Techniques in Dogs and Cats as a Treatment for Moderate and Advanced Periodontal Disease, Contact Mucositis, and Stomatitis	279
Pre/Post-Extraction Radiographs	279
Equipment for Extractions	279
Flap Design, Procedure, and Closure	279
Flap Closure	280
Extraction of Incisor Teeth	281
Technique for Incisor Extraction	281
Technique for Maxillary Canine Tooth Extraction	282
Use the Following Steps for Maxillary Canine Tooth Extraction	282
Mandibular Canine Extraction Technique	284
Facial Exposure	284
Lingual Exposure	285
Premolar Teeth Extraction Technique	285
Technique for Extraction of Premolars	286
Molar Extraction	286
Hemisection and Restoration	286
Hemisection Technique	286
Root Fragment Retrieval	287
Technique for Root Fragment Retrieval	288
Technique for Extracting Multiple Teeth	289
Feline Immunodeficiency Virus (FIV)-positive Cats with Feline Chronic Gingivitis Stomatitis	295
Adjunct Therapy With the Carbon Dioxide Laser	295
The Therapeutic Laser	296
Further Reading	297
<b>8 Tooth Resorption</b>	<b>305</b>
Prevalence	305
Etiology	305
Terminology/Classification	305
Classification by Anatomical Location – Internal and External Resorption	306
Internal Resorption	306
Inflammatory External Resorption	306
External Noninflammatory Replacement Resorption	308
Further Classification of External Tooth Resorption by Anatomical Extent (Stages)	308
Classification by Radiographic Appearance (Types)	309
Clinical Signs	310
Clinical Examination Findings	310
Radiographic Findings	311
Treatment of Tooth Resorption	313
Restoration	314
Monitoring Without Immediate Care	315
Crown/Root Atomization	315

Tooth Extraction	315
Instruments and Materials for Extraction of Teeth Affected by Tooth Resorption	315
Step-by-Step Extraction Technique	316
Crown Amputation with Intentional Partial Root Retention Followed by Gingival Closure	316
Step-by-Step Procedure for Intentional Crown Amputation and Gingival Closure	317
Further Reading	319

## 9 Oral Trauma 323

Anatomy and Physiology	323
Crown Wear – Abrasion and Attrition	323
The Traumatized Tooth	323
Signs and Symptoms of Endodontic Disease	327
Physical Examination Signs of Endodontic Disease	327
Endodontic Therapy	327
Location of the Dental Trauma	327
Pulpitis	327
Uncomplicated Enamel, Crown, and Crown–Root Fractures	328
Complicated Tooth Fractures	330
Age of the Patient	331
Age of the Fracture	331
Materials for Endodontic Therapy	331
Paper Points	331
Gutta Percha	331
Zinc Oxide–Eugenol	333
Mineral Trioxide Aggregate (MTA)	333
Calcium Hydroxide	333
Sodium Hypochlorite (Bleach)	334
Ethylenediaminetetraacetic Acid (EDTA)	334
Instruments for Endodontic Therapy	334
Barbed Broaches	334
Gates-Glidden Drills	334
Endodontic Files	335
The International Standards Organization (ISO)	337
Endodontic Stop	338
Spreaders and Pluggers	339
College Pliers	341
Retrograde Amalgam Carriers	341
Spatulas	342
Irrigation Needles	342
Fundamental Endodontic Procedures	342
Vital Pulp Therapy	342
Instruments and Materials	343
Technique	343
Standard (Conventional) Root Canal Therapy	344
Instruments and Materials	344
Accessing the Pulp Chamber and Root Canal	345
Incisors	345
Canines	345
Maxillary Fourth Premolar	345
Maxillary First Molar	345
Preparing the Root Canal Debridement and Shaping	345
Step-By-Step Conventional Root Canal Therapy	345
Rotary Debridement	349
Vertical Reciprocation Handpiece Debridement	349
Obturation	349
Restoring Fracture and Access Sites	351

Crown Restoration	351
Oral Cavity Trauma	353
Tooth Luxation	353
Avulsion	353
Trauma to the Maxilla	353
Trauma to the Mandibles	355
Summary of Pathologic Causes of Mandible Deviation	355
Principles of Jaw Fracture Repair	361
Treatment Planning and Options	361
Temporomandibular Joint (TMJ) Trauma	361
TMJ Luxation	361
Further Reading	365
<b>10 Oral Masses</b>	<b>367</b>
Identification and Staging of Oral Tumors	367
World Health Organization (WHO) Clinical Staging of Tumors of the Oral Cavity – Primary Tumor–Regional Nodes–Metastasis (TNM) System	367
Primary Tumor (T)	367
Regional Lymph Nodes (N)	367
Distant Metastasis (M)	367
Neoplasia Nomenclature	368
Tissue Sampling	369
Surgical Options to Treat Neoplasia	369
General Overview of Tumor Surgery	369
Benign Neoplasia	371
Gingival Enlargement	371
Cystic Enlargement	379
Dentigerous/Eruption Cysts	379
Inflammatory Cyst	379
Osteomyelitis	381
Odontoma	381
Papilloma	381
Eosinophilic Granuloma Complex	381
Peripheral Odontogenic Fibroma	383
Canine Acanthomatous Ameloblastoma	384
Amyloid-Producing Odontogenic Tumor	388
Traumatic Granulomas	388
Feline Pyogenic Granuloma	391
Oral Malignancy	391
Malignant Melanoma	391
Treatment of Canine Oral Malignant Melanoma	393
Squamous Cell Carcinoma	394
Feline Oral Squamous Cell Carcinoma	394
Treatment of Feline Oral Squamous Cell Carcinoma	396
Canine Oral Squamous Cell Carcinoma	401
Treatment of Squamous Cell Carcinoma in the Dog	401
Papillary Squamous Cell Carcinoma	402
Fibrosarcoma	402
Treatment of Oral Fibrosarcoma in the Dog	403
Osteosarcoma	405
Treatment for Oral Osteosarcoma	405
Multilobular Osteochondrosarcoma	406
Histiocytic Sarcoma	406
Hemangiosarcoma	406
Plasmacytoma	406
Epitheliotropic Lymphoma	406

Salivary Gland Pathology	407
Sialocele Treatment	411
Sialolithiasis	413
Salivary Gland Neoplasia	413
Further Reading	416

<b>11 Occlusal Disorders, Extra Teeth, and Missing Teeth</b>	<b>423</b>
Angle Classification	423
Normal Occlusion in the Dog	423
Normal Occlusion in the Cat	424
Malocclusion – Dental and Skeletal	426
Dental Malocclusion (Malposition)	427
Skeletal Malocclusion	429
Symmetrical Skeletal Malocclusions	429
Asymmetrical Skeletal Malocclusions	431
Persistent Primary (Deciduous) Teeth	431
Supernumerary (Extra) Teeth	433
Missing Teeth	433
Ethics of Performing Veterinary Orthodontic Care	435
Interceptive Orthodontics	435
Extraction of the Malpositioned Tooth	439
Crown Reduction, Vital Pulp Therapy, and Tooth Restoration	441
Moving Teeth	441
Types of Forces Used to Move Teeth	441
Instrumentation for Orthodontic Care	445
Technique for Bracket Placement, Light Chemical Cementation, and Force Activation	446
Orthodontic Appliances	446
The Following are Steps of Orthodontic Therapy Using Appliances	446
Materials and Methods to Create a Dental Study Model	448
Obtaining the Impression	448
Creating Arch Impressions Using Alginate	448
Pouring the Stone Model	450
Water: Powder Ratio	450
Follow These Steps to Mix and Pour Stone	450
The Following are Steps to Pour the Stone Mixture onto the Impression	450
Preparing a Base for Each Cast	451
To Separate the Cast from the Alginate Impression	451
Trimming the Cast	452
Lab Instructions and Shipping	452
Inclined Planes	452
Further Reading	456

**Glossary** 459

**Index** 475
