

List of contributors

Preface

1. The neurological assessment of the critically ill patient Abdo Barakat and Diana Greene-Chandos
2. Cerebral blood flow physiology and metabolism in neurocritical care Rajat Dhar and Michael Diringier
3. Cerebral edema and intracranial pressure in neurocritical care Shivani Ghosal and Kevin Sheth
4. Hypothermia in neurocritical care: physiology and applications Karina Woodling, Archana Hinduja and Michel T. Torbey
5. Analgesia, sedation, and paralysis Yousef Hannawi and Wendy C. Ziai
6. Airway management and mechanical ventilation in neurocritical care David B. Seder and Julian Bösel
7. Neuropharmacology in the neurocritical care unit Sarah M. Adriance
8. Intracranial monitoring in the neurocritical care unit Chad M. Miller
9. Electrophysiologic monitoring in the neurocritical care unit Anh T. Nguyen and Asma Zakaria
10. The role of transcranial doppler (TCD) as a monitoring tool in the neurocritical care Maher Saqqur, David Zygum and Andrew Demchuk
11. Ischemic stroke in neurocritical care Julian Bösel
12. Intracerebral hemorrhage in neurocritical care Xuemei Cai and Jonathan Rosand
13. Management of cerebral venous thrombosis in the neurocritical care unit Xiaoying Yao and Magdy Selim
14. Subarachnoid hemorrhage in neurocritical care Katja E. Wartenberg and Stephan A. Mayer
15. Status epilepticus in neurocritical care Fawaz Al-Mufti and Jan Classen
16. Neuromuscular disorders in the ICU Christopher L. Kramer, Edward M. Manno and Alejandro A. Rabinstein
17. Management of head trauma in the neurocritical care unit Peter Le Roux
18. Management of autoimmune encephalitis in neurocritical care Murat Sari, Diana Greene-Chandos and Michel T. Torbey
19. Management of cerebral salt wasting syndrome and syndrome of inappropriate antidiuresis in the neurocritical care unit Wendy Wright
20. Brain death in neurocritical care Mark M. Landreneau and David M. Greer
21. Neuroterrorism and drug overdose in neurocritical care John J. Lewin, III, Mohit Datta and Geoffrey S. F. Ling
22. Infections of the central nervous system in neurocritical care Mohamed Sharaby and Barnett R. Nathan
23. Management of the spinal cord injury in the neurocritical care unit epidemiology Kristine

O'Phelan

24. Postoperative management in the neurosurgical critical care unit Ryan A. Grant, Andy J. Redmond and Veronica L. Chiang

25. Ethical considerations in the neuroscience intensive care unit Fred Rincon

26. Pulmonary consult: management of severe hypoxia in the neurocritical care unit Rafael A. Calderón Candelario, Matthew C. Exline and Naeem A. Ali

27. Management of refractory arrhythmias in the neurocritical care unit Mahmoud Houmsse

28. An infectious diseases consult in neurocritical care Michael Frank and Mary Beth Graham

29. A nephrology consult in neurocritical care Jason Prosek and Nabil Haddad

30. Management of hepatic encephalopathy in the neurocritical care unit Stephen M. Riordan and Roger Williams

31. Hypoxic encephalopathy in neurocritical care Maximilian Mulder and Romergryko G. Geocadin

32. Management of delirium in neurocritical care Diana Greene-Chandos and Michel T. Torbey

33. Generalized weakness in the intensive care unit Farrukh S. Chaudhry and Edward M. Manno

34. Management of severely brain-injured patients recovering from coma Caroline Schnakers and Martin M. Monti

35. Acute demyelinating disorders in neurocritical care Lauren Koffman and Joao A. Gomes

36. Building a case for a neurocritical care unit Panayiotis N. Varelas and Efsthios Papavassiliou

37. Neurointensive (NCCU) care business planning Sarah Widing and Noah Grose

Index.
