

Contents

About the Author	ix
Preface	xi
Acknowledgements	xv
About the Companion Website	xvii
PART 1 Setting the Statistical Scene	1
CHAPTER 1 The Scientific Method	3
CHAPTER 2 Populations and Samples	31
CHAPTER 3 Principles of Measurement	71
CHAPTER 4 Probability and Types of Distribution	95
CHAPTER 5 Confidence Intervals and Significance Testing	115
PART 2 Statistical Tests	131
CHAPTER 6 Two Sample Comparisons for Normal Distributions: The t-test	135
CHAPTER 7 Nonparametric Two-Sample Tests	155
CHAPTER 8 Contingency Tables, Chi-Squared Test, and Fisher's Exact Test	167
CHAPTER 9 McNemar's Test	195
CHAPTER 10 Association: Correlation and Regression	205
CHAPTER 11 Analysis of Variance	227

PART 3	Doing Research	249
CHAPTER 12	Design, Sample Size, and Power	251
CHAPTER 13	Describing Statistical Models and Selecting Appropriate Tests	263
CHAPTER 14	Designing a Research Protocol	267
CHAPTER 15	Presenting Results to Different Audiences	283
PART 4	Solutions to Exercises	299
APPENDIX A1	Probabilities (P) of the Binomial Distribution for n , r , and p (Based on Sample Proportions) or π (Proportion in the Population)	323
APPENDIX A2	Areas in the Tail of the Normal Distribution	341
APPENDIX A3	Areas in the Tail of the t Distribution	343
APPENDIX A4	Wilcoxon U Statistic (Mann–Whitney Test)	345
APPENDIX A5	Wilcoxon T Statistic	347
APPENDIX A6	Sign Test Statistic R	349
APPENDIX A7	Percentages in the Tail of the Chi-Squared Distribution	351
APPENDIX A8	Quantiles of the Spearman Rank Correlation Coefficient	353
APPENDIX A9	Percentages in the Tail of the F Distribution	355
APPENDIX A10	Flow Chart for Selecting Statistical Tests	363
	Index	365
