Part I: Problems with Nailbed Repairs

1 Nonadherence of the Nail Plate	2
<i>Brian Mailey</i>	
1.1 Patient History Leading to the Specific Problem	2
1.2 Anatomic Description of the Patient's Current Status	2
1.3 Recommended Solution to the Problem	3
1.3.1 Recommended Solution to the Problem	3
2 Posttraumatic Split Nails	6
<i>Michael W. Neumeister</i>	
2.1 Patient History Leading to the Specific Problem	6
2.2 Anatomic Description of the Patient's Current Status	6
2.3 Recommended Solution to the Problem	6
2.3.1 Recommended Solution to the Problem	6
3 Gentian Violet Treatment of Severe Chronic Paronychia	10
<i>Wyndell H. Merritt</i>	
3.1 Introduction	10
3.2 Patient History Leading to the Specific Problem: Case A	10
3.3 Anatomic Description of the Patient's Current Status: Case A	10
3.4 Recommended Solution to the Problem: Case A	11
3.5 Technique: Case A	11
3.6 Postoperative Photographs and Critical Evaluation of Results: Case A	11
3.7 Patient History Leading to the Specific Problem: Case B	12
3.8 Anatomic Description of the Patient's Current Status: Case B	12
3.9 Recommended Solution to the Problem: Case B	12
3.10 Technique: Case B	12
3.11 Postoperative Photographs and Critical Evaluation of Results: Case B	12
3.12 Teaching Points	12

Part II: Problems with Trigger Release

4 Bowstringing	16
<i>Loukia K. Papatheodorou and Dean G. Sotereanos</i>	
4.1 Patient History Leading to the Specific Problem	16
4.2 Anatomic Description of the Patient's Current Status	16

Contents

4.3	Recommended Solution to the Problem	16	4.5	Postoperative Photographs and Critical Evaluation of Results	17
4.3.1	Recommended Solution to the Problem	16	4.6	Teaching Points	17
4.4	Technique	17			
Part III: Problems with Dupuytren's Disease					
5	Exposed Tendons	20			
	<i>Riccardo E. Giunta and Elisabeth M. Haas</i>				
5.1	Patient History Leading to the Specific Problem	20	5.4	Technique	20
5.2	Anatomic Description of the Patient's Current Status	20	5.4.1	Steps for the Procedure	21
5.3	Recommended Solution to the Problem	20	5.5	Postoperative Photographs and Critical Evaluation of Results	21
5.3.1	Recommended Solution to the Problem	20	5.6	Teaching Points	22
6	Acute Vascular Compromise after Dupuytren's Fasciectomy	23			
	<i>James N. Winters, Jeffrey B. Friedrich, and Michael W. Neumeister</i>				
6.1	Patient History Leading to the Specific Problem	23	6.4	Technique	24
6.2	Anatomic Description of the Patient's Current Status	23	6.5	Postoperative Photographs and Critical Evaluation of Results	25
6.3	Recommended Solution to the Problem	24	6.6	Teaching Points	25
7	Secondary Contractures	26			
	<i>M. Claire Manske and Jeffrey B. Friedrich</i>				
7.1	Patient History Leading to the Specific Problem	26	7.4	Technique	28
7.2	Anatomic Description of the Patient's Current Status	26	7.5	Postoperative Photographs and Critical Evaluation of Results	30
7.3	Recommended Solution to the Problem	27	7.6	Teaching Points	31
7.3.1	Recommended Solution to the Problem	28			
8	Complications of Dupuytren's Contracture Treatment	33			
	<i>Nash H. Naam and F. Thomas D. Kaplan</i>				
8.1	Patient History Leading to the Specific Problem	33	8.4	Technique	34
8.2	Anatomic Description of the Patient's Current Status	33	8.5	Postoperative Photographs and Critical Evaluation of Results	34
8.3	Recommended Solution to the Problem	33	8.6	Teaching Points	36
8.3.1	Recommended Solution to the Problem	34			
Part IV: Problems with Flexor Tendon Repair					
9	Flexor Tendon Rupture	38			
	<i>Jin Bo Tang</i>				
9.1	Patient History Leading to the Specific Problem	38	9.4	Technique	40
9.2	Anatomic Description of the Patient's Current Status	38	9.4.1	Steps for the Procedure	40
9.3	Recommended Solution to the Problem	38	9.5	Postoperative Photographs and Critical Evaluation of Results	40
9.3.1	Recommended Solution to the Problem	40	9.6	Teaching Points	41
10	Adhesions of the Flexor Tendon	42			
	<i>Donald H. Lalonde</i>				
10.1	Patient History Leading to the Specific Problem	42	10.2	Anatomic Description of the Patient's Current Status	42

10.3 Recommended Solution to the Problem	42	10.5 Critical Evaluation of Results	43
10.3.1 Recommended Solution to the Problem	42	10.6 Teaching Points	44
10.4 Technique	43		
10.4.1 Steps for the Procedure	43		
11 Bowstringing of the Flexor Tendon	45		
<i>Jin Bo Tang</i>			
11.1 Patient History Leading to the Specific Problem	45	11.4.2 Stage 1 Surgery	46
11.2 Anatomic Description of the Patient's Current Status	45	11.4.3 Stage 2 Surgery	47
11.3 Recommended Solution to the Problem	46	11.4.4 Steps for the Procedure: Stage 2	47
11.4 Technique	46	11.5 Postoperative Photographs and Critical Evaluation of Results	47
11.4.1 Steps for the Procedure: Stage 1	46	11.6 Teaching Points	47
12 Ruptured Flexor Pollicis Longus Tendon	50		
<i>Florian Neubrech and Michael Sauerbier</i>			
12.1 Patient History Leading to the Specific Problem	50	12.4 Technique	51
12.2 Anatomic Description of the Patient's Current Status	50	12.4.1 Steps for the Procedure	52
12.3 Recommended Solution to the Problem	51	12.5 Postoperative Photographs and Critical Evaluation of Results	52
12.3.1 Recommended Solution to the Problem	51	12.6 Teaching Points	52
Part V: Problems with Extensor Tendon Repair			
13 Extensor Lag	54		
<i>Douglas P. Hanel and Nicholas P. Iannuzzi</i>			
13.1 Patient History Leading to the Specific Problem	54	13.4 Technique	55
13.2 Anatomic Description of the Patient's Current Status	54	13.4.1 Steps for the Procedure	55
13.3 Recommended Solution to the Problem	55	13.5 Postoperative Photographs and Critical Evaluation of Results	55
13.3.1 Recommended Solution to the Problem	55	13.6 Teaching Points	57
14 Stiffness in the Extensor Tendon	58		
<i>Kai Megerle</i>			
14.1 Patient History Leading to the Specific Problem	58	14.4 Technique	59
14.2 Anatomic Description of the Patient's Current Status	58	14.5 Postoperative Photographs and Critical Evaluation of Results	60
14.3 Recommended Solution to the Problem	59	14.6 Teaching Points	61
15 Relative Motion Treatment of Chronic Boutonniere Deformity	62		
<i>Wyndell H. Merritt</i>			
15.1 Patient History Leading to the Specific Problem	62	15.4 Technique	62
15.2 Anatomic Description of the Patient's Current Status	62	15.5 Postoperative Photographs and Critical Evaluation of Results	62
15.3 Recommended Solution to the Problem	62	15.6 Teaching Points	63
16 Management of Chronic Sagittal Band Rupture	64		
<i>Wyndell H. Merritt</i>			
16.1 Patient History Leading to the Specific Problem	64	16.2 Anatomic Description of the Patient's Current Status	64

Contents

16.3	Recommended Solution to the Problem	64	16.5	Postoperative Photographs and Critical Evaluation of Results	64
16.4	Technique	64	16.6	Teaching Points	66
17	Posttraumatic Swan Neck Deformity	68			
	<i>Jessica Frankenhoff and Jonathan Isaacs</i>				
17.1	Patient History Leading to the Specific Problem	68	17.3	Technique	71
17.2	Anatomic Description of the Patient's Current Status	68	17.3.1	Steps for Superficialis Sling Procedure	72
17.2.1	Understanding the Problem	68	17.3.2	Steps for Oblique Retinacular Ligament Reconstruction Procedure	72
17.2.2	Evaluation	70	17.4	Postoperative Photographs and Critical Evaluation of Results	73
17.2.3	Choose the Best of the Available Treatment Options Based on Patient's Needs and Disabilities	70	17.5	Teaching Points	73
Part VI: Problems with Vasospasm					
18	Refractory Raynaud's Phenomenon	76			
	<i>Collier S. Pace, Lauren Hutchinson, and Michael W. Neumeister</i>				
18.1	Patient History Leading to the Specific Problem	76	18.4	Technique	77
18.2	Anatomic Description of the Patient's Current Status	76	18.5	Postoperative Photographs and Critical Evaluation of Results	77
18.3	Recommended Solution to the Problem	76	18.6	Teaching Points	78
Part VII: Problems with Compression Neuropathy					
19	A Practical Approach to Recurrent Carpal Tunnel Syndrome	80			
	<i>Robert C. Russell and Franziska Huettner</i>				
19.1	Patient History Leading to the Specific Problem	80	19.4	Technique	80
19.2	Anatomic Description of the Patient's Current Status	80	19.4.1	Steps for the Procedure	81
19.3	Recommended Solution to the Problem	80	19.5	Postoperative Photographs and Critical Evaluation of Results	81
			19.6	Teaching Points	81
20	Recurrent Carpal Tunnel Syndrome	83			
	<i>Chye Yew Ng and Michael J. Hayton</i>				
20.1	Patient History Leading to the Specific Problem	83	20.4	Technique	83
20.2	Anatomic Description of the Patient's Current Status	83	20.4.1	Hypothenar Fat Pad Flap	84
20.3	Recommended Solution to the Problem	83	20.4.2	Steps for the Procedure	84
20.3.1	Recommended Solution to the Problem	83	20.5	Postoperative Photographs and Critical Evaluation of Results	84
			20.6	Teaching Points	85
21	Failed Carpal Tunnel Release: Recognizing the Lacertus Syndrome	87			
	<i>Elisabet Hagert and Catherine Curtin</i>				
21.1	Patient History Leading to the Specific Problem	87	21.3	Recommended Solution to the Problem	88
21.2	Anatomic Description of the Patient's Current Status	87	21.3.1	Recommended Solution to the Problem	88
21.2.1	General Appearance	87	21.4	Technique	89
21.2.2	Clinical Examination	87	21.5	Postoperative Photographs and Critical Evaluation of Results	90
21.2.3	Ultrasound Examination	87	21.6	Teaching Points	90

22	Cubital Tunnel Release at the Elbow	91
	<i>Steven T. Lanier and Jason H. Ko</i>	
22.1	Patient History Leading to the Specific Problem	91
22.2	Anatomic Description of the Patient's Current Status	91
22.3	Recommended Solution to the Problem	91
22.3.1	Recommended Solution to the Problem	92
23	Recurrent Cubital Tunnel	96
	<i>Emily M. Krauss and Susan E. Mackinnon</i>	
23.1	Patient History Leading to the Specific Problem	96
23.2	Anatomic Description of the Patient's Current Status	96
23.3	Recommended Solution to the Problem	96
23.3.1	Recommended Solution to the Problem	96
24	Recurrent Ulnar Neuropathy	101
	<i>Thomas H. Tung</i>	
24.1	Patient History Leading to the Specific Problem	101
24.2	Anatomic Description of the Patient's Current Status	101
24.3	Recommended Solution to the Problem	101
24.3.1	Recommended Solution to the Problem	101
25	Radial Tunnel Release in the Forearm	104
	<i>Steven T. Lanier and Jason H. Ko</i>	
25.1	Patient History Leading to the Specific Problem	104
25.2	Anatomic Description of the Patient's Current Status	104
25.3	Recommended Solution to the Problem	104
25.3.1	Recommended Solution to the Problem	104
	22.4 Technique	92
	22.4.1 Steps for the Procedure	94
	22.5 Postoperative Photographs and Critical Evaluation of Results	94
	22.6 Teaching Points	94
	23.4 Technique	97
	23.4.1 Additional Procedures	100
	23.5 Postoperative Photographs and Critical Evaluation of Results	100
	23.6 Teaching Points	100
	24.4 Technique	101
	24.5 Postoperative Photographs and Critical Evaluation of Results	102
	24.6 Teaching Points	103
	25.4 Technique	105
	25.4.1 Steps for the Procedure	106
	25.5 Postoperative Photographs and Critical Evaluation of Results	107
	25.6 Teaching Points	107
	Part VIII: Problems with Nerve Repair	
26	End Neuroma	110
	<i>Theodore A. Kung and Paul S. Cederna</i>	
26.1	Patient History Leading to the Specific Problem	110
26.2	Anatomic Description of the Patient's Current Status	110
26.3	Recommended Solution to the Problem	110
26.3.1	Recommended Solutions to the Problem	111
27	Pain following Nerve Repair	114
	<i>Ida K. Fox and Leahthan F. Domeshek</i>	
27.1	History	114
27.2	Anatomic Description of the Patient's Current Status	114
27.2.1	Examination Findings	114
27.2.2	Intraoperative Findings	114
27.2.3	Physiologic Explanation of Problem	114
	27.3 Recommended Solution to the Problem	115
	27.4 Technique for Nerve Harvest and Repair	115
	27.4.1 Sural Nerve Harvest	115
	27.4.2 Upper Extremity Nerve Repair	115
	27.4.3 Nerve Grafting	116
	27.4.4 Tendon and Muscle Repairs	117

Contents

27.5 Postoperative Care and Critical Evaluation of Results	118	27.6 Teaching Points	118
--	-----	--------------------------------	-----

Part IX: Problems with Nerve Palsy

28 Finger Contractures	122		
<i>Yan Chen and Peter M. Murray</i>			
28.1 Patient History Leading to the Specific Problem	122	28.4 Technique	122
28.2 Anatomic Description of the Patient's Current Status	122	28.5 Postoperative Photographs and Critical Evaluation of Results	123
28.3 Recommended Solution to the Problem	122	28.6 Teaching Points	123

Part X: Sarcoma

29 Incomplete Resection of Sarcoma at the Hand	126		
<i>Björn Behr and Marcus Lehnhardt</i>			
29.1 Patient History Leading to the Specific Problem	126	29.4 Technique	127
29.2 Anatomic Description of the Patient's Current Status	126	29.4.1 Steps for the Procedure	127
29.3 Recommended Solution to the Problem	126	29.5 Postoperative Photographs and Critical Evaluation of Results	127
29.3.1 Recommended Solution to the Problem	126	29.6 Teaching Points	128

Part XI: Problems with Soft Tissue Coverage

30 Perfusion Problems	132		
<i>Charles Yuen Yung Loh, Yu-Te Lin, and Fu-Chan Wei</i>			
30.1 Patient History Leading to the Specific Problem	132	30.4 Technique	133
30.2 Anatomic Description of the Patient's Current Status	132	30.4.1 Steps for the Procedure	133
30.3 Recommended Solution to the Problem	132	30.5 Postoperative Photographs and Critical Evaluation of Results	133
30.3.1 Recommended Solution to the Problem	132	30.6 Teaching Points	135
31 The Bulky Flap	136		
<i>Kelly Currie, Eryn Neumeister, and Michael W. Neumeister</i>			
31.1 Patient History Leading to the Specific Problem	136	31.3 Recommended Solution to the Problem	137
31.2 Anatomic Description of the Patient's Current Status	136	31.3.1 Recommended Solution To The Problem	137
31.2.1 Management of the Defect	136	31.4 Technique	137
31.2.2 Donor Site Problem	136	31.5 Postoperative Photographs and Critical Evaluation of Results	138
		31.6 Teaching Points	138
32 Contracture after Acute Trauma Surgery of a Blast Burn	141		
<i>Günter K. Germann</i>			
32.1 Patient History Leading to the Specific Problem	141	32.4 Technique	142
32.2 Anatomic Description of the Patient's Current Status	141	32.4.1 Steps for the Procedure	142
32.3 Recommended Solution to the Problem	141	32.5 Postoperative Photographs and Critical Evaluation of Results	142
32.3.1 Recommended Solution to the Problem	141	32.6 Teaching Points	144

33 Dorsal Hand Defect	145		
<i>Kelly Currie, Michael Sauerbier, Robert Russell, and Michael W. Neumeister</i>			
33.1 Patient History Leading to the Specific Problem	145	33.4 Technique	147
33.2 Anatomic Description of the Patient's Current Status	145	33.5 Postoperative Photographs and Critical Evaluation of Results	147
33.2.1 Donor Site Problem	146	33.6 Teaching Points	148
33.3 Recommended Solution to the Problem	146		
33.3.1 Recommended Solution to the Problem	147		
Part XII: Problems with Nonarticular Phalanx Fractures			
34 Malrotation in Nonarticular Phalanx Fractures	152		
<i>Mark S. Rekan</i>			
34.1 Patient History Leading to the Specific Problem	152	34.4 Technique	152
34.2 Anatomic Description of the Patient's Current Status	152	34.4.1 Steps for the Procedure	154
34.3 Recommended Solution to the Problem	152	34.5 Postoperative Photographs and Critical Evaluation of Results	154
34.3.1 Recommended Solution to the Problem	152	34.6 Teaching Points	154
35 Nonunion in Nonarticular Phalanx Fractures	155		
<i>A. Lee Osterman and Adam Strohl</i>			
35.1 Patient History Leading to the Specific Problem	155	35.4 Technique	156
35.2 Anatomic Description of the Patient's Current Status	155	35.4.1 Steps for the Procedure	156
35.3 Recommended Solution to the Problem	155	35.5 Postoperative Photographs and Critical Evaluation of Results	156
35.3.1 Recommended Solution to the Problem	156	35.6 Teaching Points	157
36 Stiffness and Hardware Problems in Nonarticular Phalanx Fractures	158		
<i>Max Haerle and Tobias Del Gaudio</i>			
36.1 Patient History Leading to the Specific Problem	158	36.4 Technique	159
36.2 Anatomic Description of the Patient's Current Status	158	36.5 Postoperative Photographs and Critical Evaluation of Results	162
36.3 Recommended Solution to the Problem	158	36.6 Teaching Points	162
37 Angulation in Nonarticular Phalanx Fractures	164		
<i>Berthold Bickert</i>			
37.1 Patient History Leading to the Specific Problem	164	37.4 Technique	165
37.2 Anatomic Description of the Patient's Current Status	164	37.5 Postoperative Photographs and Critical Evaluation of Results	165
37.3 Recommended Solution to the Problem	164	37.6 Teaching Points	165
37.3.1 Recommended Solution to the Problem	165		
Part XIII: Problems with Articular Phalanx Fractures			
38 Angulation in Articular Phalanx Fractures	168		
<i>Marco Rizzo and Maureen A. O'Shaughnessy</i>			
38.1 Patient History Leading to the Specific Problem	168	38.2 Anatomic Description of the Patient's Current Status	168

Contents

38.3	Recommended Solution to the Problem	169	38.5	Postoperative Photographs and Critical Evaluation of Results	170
38.4	Technique	169	38.6	Teaching Points	171
38.4.1	Steps for the Procedure	170			
39	Posttraumatic Bone Loss in Articular Phalanx Fractures	172			
	<i>Carlos Henrique Fernandes and Jorge Raduan Neto</i>				
39.1	Patient History Leading to the Specific Problem	172	39.4	Technique	172
39.2	Anatomic Description of the Patient's Current Status	172	39.5	Postoperative Photographs and Critical Evaluation of Results	172
39.3	Recommended Solution to the Problem	172	39.6	Teaching Points	173
40	Fracture after Prior Kirschner's Wire Fixation	174			
	<i>Carlos Henrique Fernandes and Rodrigo Guerra Sabongi</i>				
40.1	Patient History Leading to the Specific Problem	174	40.4	Technique	175
40.2	Anatomic Description of the Patient's Current Status	174	40.5	Postoperative Photographs and Critical Evaluation of Results	176
40.3	Recommended Solution to the Problem	175	40.6	Teaching Points	176
40.3.1	Recommended Solution to the Problem	175			
41	Contractures in Articular Phalanx Fractures	178			
	<i>Christian K. Spies and Frank Unglaub</i>				
41.1	Patient History Leading to the Specific Problem	178	41.4	Technique	179
41.2	Anatomic Description of the Patient's Current Status	178	41.5	Postoperative Photographs and Critical Evaluation of Results	179
41.3	Recommended Solution to the Problem	179	41.6	Teaching Points	179
41.3.1	Recommended Solution to the Problem	179			
Part XIV: Problems with Metacarpal Fractures					
42	Nonunion in Metacarpal Fractures	184			
	<i>Carsten Surke and Esther Vögelin</i>				
42.1	Patient History Leading to the Specific Problem	184	42.4.3	Left Hand	188
42.2	Anatomic Description of the Patient's Current Status	185	42.4.4	Steps for the Procedure	188
42.3	Recommended Solution to the Problem	186	42.5	Postoperative Results and Critical Evaluation of Results	188
42.3.1	Recommended Solution to the Problem	186	42.6	Teaching Points	188
42.4	Technique	186			
42.4.1	Left Hand	186			
42.4.2	Right Iliac Crest	187			
43	Malunion in Metacarpal Fractures	190			
	<i>Richard J. Tosti and Jesse B. Jupiter</i>				
43.1	Patient History Leading to the Specific Problem	190	43.4	Technique	191
43.2	Anatomic Description of the Patient's Current Status	190	43.5	Postoperative Photographs and Critical Evaluation of Results	192
43.3	Recommended Solution to the Problem	191	43.6	Teaching Points	192
43.3.1	Recommended Solution to the Problem	191			
44	Angulation in Metacarpal Fractures	194			
	<i>Jeffrey Greenberg</i>				
44.1	Patient History Leading to the Specific Problem	194	44.2	Anatomic Description of the Patient's Current Status	194

44.3	Recommended Solution to the Problem	195	44.5	Postoperative Photographs and Critical Evaluation of Results	196
44.4	Technique	195	44.6	Teaching Points	197

Part XV: Problems with Basilar Joint Osteoarthritis

45	Recurrent Pain in Basilar Joint Osteoarthritis	202
	<i>Michael S. Gart and Daniel J. Nagle</i>	
45.1	Patient History Leading to the Specific Problem	202
45.2	Anatomic Description of the Patient's Current Status	202
45.3	Recommended Solution to the Problem	202
45.3.1	Recommended Solution to the Problem	202
46	Painful Proximalization of the First Metacarpal after Trapeziectomy	207
	<i>Martin Richter</i>	
46.1	Patient History Leading to the Specific Problem	207
46.2	Anatomic Description of the Patient's Current Status	207
46.3	Recommended Solution to the Problem	207
46.3.1	Recommended Solution to the Problem	207
47	Metacarpal Phalangeal Hyperextension	212
	<i>Anne Argenta and Mark E. Baratz</i>	
47.1	Patient History Leading to the Specific Problem	212
47.2	Anatomic Description of the Patient's Current Status	212
47.3	Recommended Solution to the Problem	213
47.3.1	Recommended Solution to the Problem	214
47.4	Technique	214
47.4.1	Metacarpophalangeal Volar Plate Arthroplasty	214
47.4.2	Extensor Pollicis Brevis to Abductor Pollicis Longus Tendon Transfer	214
47.5	Postoperative Photographs and Critical Evaluation of Results	214
47.6	Teaching Points	214

Part XVI: Problems with Metacarpal Phalangeal Osteoarthritis after Implant Arthroplasty

48	Intraoperative Instability During Metacarpophalangeal Joint Arthroplasty for Osteoarthritis	220
	<i>Chelsea Harris, Yuki Fujihara, and Kevin C. Chung</i>	
48.1	Patient History Leading to the Specific Problem	220
48.2	Anatomic Description of the Patient's Current Status	220
48.3	Recommended Solution to the Problem	220
48.3.1	Recommended Solution to the Problem	220
48.4	Technique	220
48.4.1	Intraoperative Instability	220
49	Revision of Subsided Pyrocarbon Implants	226
	<i>Steven C. Haase</i>	
49.1	Patient History Leading to the Specific Problem	226
49.2	Anatomic Description of the Patient's Current Status	226
49.3	Recommended Solution to the Problem	227
49.4	Technique	227
49.5	Postoperative Photographs and Critical Evaluation of Results	227
49.6	Teaching Points	228

Part XVII: Problems with Interphalangeal Osteoarthritis

50 Failed Silicone Proximal Interphalangeal Joint Arthroplasty	232
<i>Elvira Bodmer and Stephan Schindele</i>	
50.1 Patient History Leading to the Specific Problem	232
50.2 Anatomic Description of the Patient's Current Status	232
50.3 Recommended Solution to the Problem	233
50.3.1 Recommended Solution to the Problem	233
50.4 Technique	233
50.4.1 Steps for the Procedure	233
50.5 Postoperative Photographs and Critical Evaluation of Results	234
50.6 Teaching Points	236
51 Stiffness in Interphalangeal Osteoarthritis	238
<i>Peter M. Murray, Kimberly H. McVeigh, and Ammar Humayun</i>	
51.1 Patient History Leading to the Specific Problem	238
51.2 Anatomic Description of the Patient's Current Status	238
51.3 Recommended Solution to the Problem	238
51.4 Technique	239
51.5 Postoperative Photographs and Critical Evaluation of Results	239
51.6 Teaching Points	240
52 Contracture in Interphalangeal Osteoarthritis	241
<i>Peter M. Murray, Kimberly H. McVeigh, and Ammar Humayun</i>	
52.1 Patient History Leading to the Specific Problem	241
52.2 Anatomic Description of the Patient's Current Status	241
52.3 Recommended Solution to the Problem	241
52.4 Technique	242
52.5 Postoperative Photographs and Critical Evaluation of Results	242
52.6 Teaching Points	243
53 Proximal Interphalangeal Posttraumatic Osteoarthritis	244
<i>Sergio Daroda and Fernando Menvielle</i>	
53.1 Patient History Leading to the Specific Problem	244
53.2 Anatomic Description of the Patient's Current Status	244
53.3 Recommended Solution to the Problem	244
53.3.1 Recommended Solution to the Problem	244
53.4 Technique	245
53.4.1 Steps for the Procedure	246
53.5 Postoperative Photographs and Critical Evaluation of Results	246
53.6 Teaching Points	247
Part XVIII: Problems with Infection in the Thumbs, Fingers, and Wrist	
54 Inadequate Drainage of Infection in the Thumbs, Fingers, and Wrist	250
<i>Nikhil Agrawal and William C. Pederson</i>	
54.1 Patient History Leading to the Specific Problem	250
54.2 Anatomic Description of the Patient's Current Status	250
54.3 Recommended Solution to the Problem	250
54.3.1 Recommended Solutions to the Problem	250
54.4 Technique	250
54.4.1 Steps for the Procedure	252
54.5 Postoperative Photographs and Critical Evaluation of Results	252
54.6 Teaching Points	252
55 Salvage of Osteomyelitis of the Distal Radius after Internal Fixation of an Open Fracture	253
<i>Florian Neubrech and Michael Sauerbier</i>	
55.1 Patient History Leading to the Specific Problem	253
55.2 Anatomic Description of the Patient's Current Status	253
55.3 Recommended Solution to the Problem	253
55.3.1 Recommended Solution to the Problem	254
55.4 Technique	254
55.4.1 Steps for the Procedure	256
55.5 Postoperative Photographs and Critical Evaluation of Results	256
55.6 Teaching Points	256

56 Infectious Destruction of the Wrist	259
<i>Florian Neubrech, Michael Sauerbier, and Berthold Bickert</i>	
56.1 Patient History Leading to the Specific Problem	259
56.2 Anatomic Description of the Patient's Current Status	259
56.3 Recommended Solution to the Problem	260
56.3.1 Recommended Solution to the Problem	260
56.4 Technique	260
56.4.1 Steps for the Procedure	261
56.5 Postoperative Photographs and Critical Evaluation of Results	261
56.6 Teaching Points	262
Part XIX: Problems with Replantation	
57 Stiffness after Replantation	264
<i>Walter Lin, Bauback Safa, and Gregory M. Buncke</i>	
57.1 Patient History Leading to the Specific Problem	264
57.2 Anatomic Description of the Patient's Current Status	264
57.3 Recommended Solution to the Problem	264
57.3.1 Recommended Solution to the Problem	265
57.4 Technique	265
57.5 Postoperative Photographs and Critical Evaluation of Results	267
57.6 Teaching Points	267
58 Failed Replant: Ray Amputation	270
<i>Sang Hyun Woo</i>	
58.1 Patient History Leading to the Specific Problem	270
58.2 Anatomic Description of the Patient's Current Status	270
58.3 Recommended Solution to the Problem	270
58.4 Technique	270
58.5 Postoperative Photographs and Critical Evaluation of Results	271
58.6 Teaching Points	272
59 Failed Digit Replant: Toe-to-Hand Transfer	273
<i>Sang Hyun Woo</i>	
59.1 Patient History Leading to the Specific Problem	273
59.2 Anatomic Description of the Patient's Current Status	273
59.3 Recommended Solution to the Problem	274
59.4 Technique	274
59.5 Postoperative Photographs and Critical Evaluation of Results	275
59.6 Teaching Points	275
60 Failed Thumb Replant: Great Toe-to-Thumb Transfer	277
<i>Sang Hyun Woo</i>	
60.1 Patient History Leading to the Specific Problem	277
60.2 Anatomic Description of the Patient's Current Status	277
60.3 Recommended Solution to the Problem	277
60.4 Technique	277
60.5 Postoperative Photographs and Critical Evaluation of Results	279
60.6 Teaching Points	280
61 Failed Replant: Failed Degloving Revascularization	281
<i>Sang Hyun Woo</i>	
61.1 Patient History Leading to the Specific Problem	281
61.2 Recommended Solution to the Problem	281
61.3 Technique	281
61.4 Postoperative Photographs and Critical Evaluation of Results	282
61.5 Teaching Points	282
62 Attempted Replantation	284
<i>Alexandru Valentin Georgescu and Ileana Rodica Matei</i>	
62.1 Patient History Leading to the Specific Problem	284
62.2 Anatomic Description of the Patient's Current Status	284
62.3 Recommended Solution to the Problem	284
62.3.1 Multiple-Stage Reconstruction	284
62.3.2 Single-Stage Reconstruction	285

Contents

62.4	Technique	285	62.5	Postoperative Photographs and Critical Evaluation of Results	286
62.4.1	Steps for the Procedure.	285	62.6	Teaching Points	287
63	Nonunion following Digital Replant	289			
	<i>S. Raja Sabapathy</i>				
63.1	Patient History Leading to the Specific Problem	289	63.5	Technique	290
63.2	Anatomic Description of the Patient's Current Status	289	63.5.1	Steps for the Procedure.	291
63.3	Recommended Solution to the Problem	290	63.6	Postoperative Photographs and Critical Evaluation of Results	291
63.4	Recommended Solution to the Problem	290	63.7	Teaching Points	291
64	Nonunion following Major Replant	293			
	<i>S. Raja Sabapathy and Hari Venkatramani</i>				
64.1	Patient History Leading to the Specific Problem	293	64.4	Technique	294
64.2	Anatomic Description of the Patient's Current Status	293	64.4.1	Steps for the Procedure.	295
64.3	Recommended Solution to the Problem	293	64.5	Postoperative Photographs and Critical Evaluation of Results	295
64.3.1	Recommended Solution to the Problem	294	64.6	Teaching Points	295
65	Painful Finger after Bony Nonunion	296			
	<i>Florian Neubrech and Ulrich Kneser</i>				
65.1	Patient History Leading to the Specific Problem	296	65.4	Technique	298
65.2	Anatomic Description of the Patient's Current Status	297	65.4.1	Steps for the Procedure.	299
65.3	Recommended Solution to the Problem	297	65.5	Postoperative Photographs and Critical Evaluation of Results	299
65.3.1	Recommended Solution to the Problem	298	65.6	Teaching Points	299
66	Stiff Fingers and Elbow after Replantation	302			
	<i>Chih-Hung Lin</i>				
66.1	Patient History Leading to the Specific Problem	302	66.4	Technique	303
66.2	Anatomical Description of the Patient's Current Status	302	66.5	Postoperative Photographs and Critical Evaluation of Results	304
66.3	Recommended Solution to the Problem	303	66.6	Teaching Points	304
66.3.1	Recommended Solution to the Problem	303			
67	Poor Grip or Weak Motion after Replantation	305			
	<i>S. Raja Sabapathy</i>				
67.1	Patient History Leading to the Specific Problem	305	67.4	Technique	306
67.2	Anatomic Description of the Patient's Current Status	305	67.4.1	Steps for the Procedure.	307
67.3	Recommended Solution to the Problem	306	67.5	Postoperative Photographs and Critical Evaluation of Results	307
67.3.1	Recommended Solution to the Problem	306	67.6	Teaching Points	307
Part XX: Problems with Complex Regional Pain Syndromes					
68	Complex Regional Pain Syndrome	310			
	<i>Erik Hansen and Jonathan Isaacs</i>				
68.1	Patient History Leading to the Specific Problem	310	68.3	Recommended Solution to the Problem	312
68.2	Anatomic Description of the Patients Current Status	311	68.3.1	Interventional or Surgical Treatments May Be Beneficial in Certain Patients	312
68.2.1	Classification and Pathogenesis	312	68.4	Teaching Points	313

Part XXI: Problems with Scaphoid Fractures

69 Nonunion of the Proximal Pole

70 Scaphoid Nonunion with Avascular Necrosis

71 Scaphoid Revision Nonunion

72 Scaphoid Nonunion

73 Scaphoid Implant Malplacement

Part XXII: Problems with Scapholunate Instability

74 Failed Scapholunate Ligament Repair: Acute

75 Failed Reconstruction with Tenodesis: Chronic

Part XXIII: Problems with the Lunotriquetral Joint

76 Problems with the Lunotriquetral Joint After Ligament Repair
