

Part I: Scientific Basis

1. Rationale for Dental Implants
2. Terminology in Implant dentistry
3. Functional Basis for Dental Implant Design
4. Bone Physiology, Metabolism, and Biomechanics
5. Biomaterials for Dental Implants

Part II: Biomechanical Properties of Dental Implants

6. Clinical Biomechanics in Implant Dentistry
7. Stress Treatment Theorem for Implant Dentistry
8. Treatment Planning: Force Factors Related to Patient Conditions
9. Dental Implant Surfaces

Part III : Fundamental Science

10. Medical Evaluation of the Dental Implant Patient
11. Radiographic Evaluation in Oral Implantology
12. Applied Anatomy for Dental Implants
13. Dental Implant Infections
14. Pharmacology in Implant Dentistry

Part IV: Treatment Planning Principles

15. Interactive Computed Tomography and Dental Implant Treatment Planning
16. Available Bone and Dental Implant Treatment Plans
17. Prosthetic Options in Implant Dentistry
18. Bone Density: A Key Determinant for Treatment Planning
19. Treatment Plans Related to Key Implant Positions and Implant Number

Part V: Edentulous Site Treatment Planning

20. Treatment Plans for Partially and Completely Edentulous Arches in Implant Dentistry
21. Preimplant Prosthodontic Factors Related to Surgical Treatment Planning
22. Single and Multiple Tooth Replacement: Treatment Options
23. Treatment Planning for the Edentulous Posterior Maxilla
24. The Edentulous Mandible: Fixed Versus Removable Prosthesis Treatment Planning
25. The Edentulous Maxilla: Fixed versus Removable Treatment Planning

Part VI: Implant Surgery

26. Basic Surgical Techniques and Armamentarium
27. Implant Placement Surgical Protocol
28. Ideal Implant Positioning
29. Maxillary Anterior Specific Implant Surgery
30. Mandibular Specific Anatomic Implications for Dental Implant Surgery
31. Dental Implant Surgery Complications
32. Immediate Implant Surgical Protocol
33. Immediate Load/Restoration in Implant Dentistry

Part VII: Soft and Hard Tissue Rehabilitation

34. Atraumatic Tooth Extraction and Socket Grafting
35. Bone Substitutes and Membranes

- 36. Particulate Membrane Grafting/Guided Bone Regeneration
- 37. Maxillary Sinus Anatomy, Pathology, and Graft Surgery
- 38. Intraoral Autogenous Bone Grafting
- 39. Extraoral Autogenous Bone Grafting for Dental Implant Surgery
- 40. The Use of Botox and Dermal Fillers in Oral Implantology

Part VIII: Dental Implant Maintenance

- 41. Peri-Implantitis and Peri-Implant Mucositis: Diagnosis, Classification, Etiologies, and Therapies
- 42. Implant Maintenance: Long-term Implant Success
