

**1. Definition, risk factors, and epidemiology of osteoporosis**

Enrique Guerado and Enrique Caso

**2. Pathogenesis: Molecular mechanisms of osteoporosis**

Anastasia E. Markatseli, Theodora E. Markatseli, and Alexandros A. Drosos

**3. Osteoporosis: Biochemical investigations**

Ippokratis Pountos and Peter V. Giannoudis

**4. Diagnosis: Radiological investigations**

David J. Hak and Rodrigo Banegas

**5. Development of a fragility liaison service**

Paul Andrzejowski and Peter V. Giannoudis

**6. NICE guidelines for medical treatment of osteoporosis: An update**

Katherine Lowery and Nikolaos K. Kanakaris

**7. Role of bisphosphonates and denosumab**

Blossom Samuels, Yi Liu, and Joseph Lane

**8. The role of anabolic agents**

Nifon K. Gkekas, Eustathios Kenanidis, Panagiotis Anagnostis, Michael Potoupnis, Dimitrios G. Goulis, and Eleftherios Tsiridis

**9. Current and emerging pharmacological agents in the treatment of osteoporosis**

James X. Liu and Thomas A. Einhorn

**10. Monitoring/surveillance of medical treatment**

Konstantinos D. Stathopoulos and Andreas F. Mavrogenis

**11. Systemic complications of osteoporosis medical treatment**

Konstantinos G. Makridis and Stamatina-Emmanouela Zourntou

**12. Complications of medical treatment: Atypical fractures**

Owen Diamond, Natalie C. Rollick, and David L. Helfet

**13. Biomechanical considerations for fixation of osteoporotic bone**

Peter Augat and Christian von Rden

**14. The fix and treat principle: An update**

Vasileios P. Giannoudis and Peter V. Giannoudis

**15. Principles of management of osteoporotic fractures**

Seth M. Tarrant and Zsolt J. Balogh

**16. Can we accelerate the osteoporotic bone fracture healing response?**

Martijn van Griensven and Elizabeth Rosado Balmayor

**17. Management of osteoporotic proximal humeral fractures: An overview**

J.P.A.M. Verbruggen

**18. Distal humerus fractures in the elderly: To fix or to replace?**

Jon B. Carlson, Craig S. Roberts, and David Seligson

**19. Distal radius osteoporotic features: My preferred method of treatment**

Donato Perretta and Jesse B. Jupiter

**20. Management of osteoporotic pelvic fractures**

Pol M. Rommens, Daniel Wagner, and Alexander Hofmann

**21. Management of osteoporotic acetabular fractures: Fix or replace?**

Peter V. Giannoudis and Panagiotis Douras

**22. Management of osteoporotic proximal intertrochanteric/subtrochanteric femoral fractures**

Avadhoot Kantak and George Tselentakis

**23. Osteoporotic distal femoral fractures: When to fix and how**

Cyril Mauffrey and Nicholas A. Alfonso

**24. Osteoporotic distal femoral fractures: When to replace and how**

Richard Stange and Michael J. Raschke

**25. Osteoporotic long bone fractures: My preferred method of treatment**

Sascha Halvachizadeh and Hans-Christoph Pape

**26. Management of osteoporotic extra-articular proximal tibial fractures**

Daniela Sanchez, Amrut Borade, and Daniel S. Horwitz

**27. Osteoporotic ankle fractures: Principles of treatment**

Theodoros H. Tosounidis and Michael G. Kontakis

**28. Treatment of distal intra-articular/extra-articular tibial fractures**

Vasileios P. Giannoudis and Peter V. Giannoudis

**29. Osteoporotic os calcis fractures: How I manage them**

Angus Jennings and Richard Buckley

**30. Current trend in kyphoplasty for osteoporotic vertebral fractures**

Kalliopi Alpantaki, Georgios Vastardis, and Alexander G. Hadjipavlou

**31. Osteoporotic thoracolumbar fractures: My preferred method of nonoperative treatment**

Terence Ong and Opinder Sahota

**32. Augmentation of fracture fixation: An update**

Peter V. Giannoudis and Panagiotis Douras

**33. Complications of surgical treatment for osteoporotic fractures**

Paul C. Baldwin III and Christian Krettek

**34. Total shoulder replacement and osteoporosis: An Update**

David Limb

**35. Total hip replacement and osteoporosis: Current trends**

Antonios Koutalos, Georgios Komnos, and Theofilos Karachalios

**36. Total knee replacement and osteoporosis: An overview**

Edward S. Holloway and Veysi T. Veysi

**37. Rehabilitation of the osteoporotic patient: Is it different?**

Theodoros H. Tosounidis and Amy Margot Lindh
