

Part I: Introduction

- 1 Basic Principles of Pharmacology
- 2 Principles for Maximizing the Safety of Dermatologic Drug Therapy
- 3 Polymorphisms: Why Individual Drug Responses Vary
- 4 Adherence to Drug Therapy
- 5 Medical Decision Making

Part II: Important Drug Regulatory Issues

- 6 The FDA Drug Approval Process
- 7 Pharmacovigilance: Verifying that Drugs Remain Safe
- 8 Drugs Taken Off the Market: Important Lessons Learned

Part III: Systemic Drugs for Infectious Diseases

- 9 Systemic Antibacterial Agents
- 10 Systemic Antifungal Agents
- 11 Systemic Antiviral Agents
- 12 Systemic Antiparasitic Agents

Part IV: Systemic Immunomodulatory Drugs

- 13 Systemic Corticosteroids
- 14 Methotrexate
- 15 Azathioprine
- 16 Mycophenolates
- 17 Cyclosporine
- 18 Phosphodiesterase-4 and Janus Kinase Inhibitors
- 19 Cytotoxic Agents
- 20 Dapsone
- 21 Antimalarial Agents

22 Systemic Retinoids

Part V: Drugs Used in Conjunction with UV or Visible Light

23 Psoralen Plus Ultraviolet A Photochemotherapy and Other Phototherapy Modalities

24 Extracorporeal Photochemotherapy (Photopheresis)

25 Photodynamic Therapy

Part VI: Biologic Therapeutics

26 Tumor Necrosis Factor Inhibitors

27 Interleukin 12/23 Inhibitors

28 Interleukin 17 Inhibitors

29 Interleukin 23 Inhibitors

30 Rituximab

31 Additional Biologic Therapeutics: Dupilumab, Omalizumab, Others

Part VII: Miscellaneous Systemic Drugs

32 Antihistamines

33 Vasoactive and Antiplatelet Agents

34 Antiandrogens and Androgen Inhibitors

35 Psychotropic Agents

36 Intravenous Immunoglobulin Therapy

37 Systemic Anticancer Agents: Dermatologic Indications and Adverse Events

38 Hedgehog Pathway Inhibitors

39 Drugs for the Skinternist

40 Miscellaneous Systemic Drugs

Part VIII: Topical Drugs for Infectious Diseases

41 Topical Antibacterial Agents

42 Topical Antifungal Agents

43 Topical and Intralesional Antiviral Agents

44 Topical Antiparasitic Agents

Part IX: Topical Immunomodulatory Drugs

45 Topical Corticosteroids

46 Topical Retinoids

47 Topical and Intralesional Chemotherapeutic Agents

48 Topical Calcineurin Inhibitors

49 Topical Vitamin D3

Part X: Miscellaneous Topical Drugs

50 Sunscreens

51 Therapeutic Shampoos

52 α -Hydroxy Acids

53 Chemical Peels

54 Products for the Care of Chronic Wounds

55 Agents Used for Treatment of Hyperkeratosis

56 Irritants and Allergens: When to Suspect Topical Therapeutic Agents

57 Miscellaneous Topical Agents

Part XI: Injectable and Mucosal Routes of Drug Administration

58 Local Anesthetics

59 Injectable Dermal and Subcutaneous Fillers

60 Botulinum Toxin Injections

61 Oral Mucosal Therapeutics

Part XII: Major Adverse Effects From Systemic Drugs

62 Hepatotoxicity of Dermatologic Drug Therapy

63 Hematologic Toxicity of Drug Therapy

64 Drug-induced Malignancy

65 Dermatologic Drugs During Pregnancy and Lactation

66 Drug Interactions

67 Cutaneous Drug Reactions With Systemic Features

Part XIII: Special Pharmacology and Therapeutics Topics

68 Informed Consent and Risk Management

69 Compounding in Dermatology

70 Dermatologic Drug Therapy in Children

Appendix I Core Questions for Understanding Systemic Dermatologic Drugs

Appendix II The Most Potentially Serious Drug Interactions
