

Part 1: Fundamentals of Neuropharmacology

Chapter 1 Basic Principles of Neuropharmacology

Chapter 2 Cellular Basis of Communication

Chapter 3 Synaptic Transmission

Chapter 4 Signal Transduction in the Brain

Part 2: Neural Substrates of Drug Action

Chapter 5 Excitatory and Inhibitory Amino Acids

Chapter 6 Widely Projecting Systems: Monoamines, Acetylcholine, and Orexin

Chapter 7 Neuropeptides

Chapter 8 Atypical Neurotransmitters

Part 3: Neuropharmacology of Neural Systems and Disorders

Chapter 9 Autonomic Nervous System

Chapter 10 Neural and Neuroendocrine Control of the Internal Milieu

Chapter 11 Pain

Chapter 12 Neuroinflammation

Chapter 13 Sleep and Arousal

Chapter 14 Higher Cognitive Function and Behavioral Control

Chapter 15 Mood and Emotion

Chapter 16 Reinforcement and Addictive Disorders

Chapter 17 Schizophrenia and Bipolar Disorder

Chapter 18 Neurodegeneration

Chapter 19 Seizure Disorders

Chapter 20 Stroke and Migraine
