

About the Editor

Contributors

Preface

Acknowledgments

1. A History of Pain Research

Fernando Cervero and John N. Wood

2. The Measurement of Pain in the Laboratory Rodent

Jeffrey S. Mogil

3. Invertebrate Models of Nociception: Learning From Flies and Worms

Daniel Hesselson, Denise S. Walker, Joshua Neil Massingham, William R. Schafer, G. Gregory Neely, and

Yee Lian Chew

4. Human Genetics of Pain

James J. Cox, Ingo Kurth, and C. Geoffrey Woods

5. Dorsal Root Ganglion Neuron Types and Their Functional Specialization

Edward C. Emery and Patrik Ernfors

6. The Sympathetic Nervous System and Pain

Judith A. Strong, Jun-Ming Zhang, and Hans-Georg Schaible

7. Heat Pain and Cold Pain

Felix Viana and Thomas Voets

8. Noxious Mechanosensation

Patrick Delmas, Sergiy Mikhailovych Korogod, and Bertrand Coste

9. Sodium Channels and Pain

Theodore R. Cummins, Stephen G. Waxman, and John N. Wood

10. Potassium Channels and Pain

Jérôme Bussierolles, Xavier Gasull, and Jacques Noël

11. Voltage Gated Calcium Channels: Molecular Targets for Treating Chronic Pain

Gerald W. Zamponi, Maria A. Gandini, and Terry P. Snutch

12. Chloride Channels in Nociceptors

Uhtaek Oh and Jooyoung Jung

13. Neuroimmune Interactions and Pain

Jiahe Li and Peter M. Grace

14. The Neurobiology of Pain: Development and Sex

Maria Fitzgerald and Michael W. Salter

15. Central Nervous System Pain Pathways

Andrew J. Todd and Fan Wang

16. Dorsal Horn Pain Mechanisms

Hanns Ulrich Zeilhofer and Robert Ganley

17. Visceral Pain

David C. Bulmer and Carolina Roza

18. fMRI and Human Pain Perception

Giandomenico Iannetti and A. Vania Apkarian

19. Neurobiological Basis of Migraine

Philip R. Holland, Jan Hoffmann, and Peter J. Goadsby

20. Effect of Sleep Loss on Pain

Chloe Alexandre, Alban Latremoliere, and Patrick H. Finan

21. Sensory Signaling Pathways in Inflammatory and Neuropathic Pain

Hanneke L.D.M. Willemsen and Niels Eijkelkamp

22. The Diversity of Neuropathic Pain

Nanna Brix Finnerup and Nadine Attal

23. The Transition From Acute to Chronic Pain

Wei-Hsin Sun, Yu-Shiuan Su, and Chih-Cheng Chen

24. Cancer and Pain

Rie Bager Hansen and Sarah Falk

25. Opioids and Pain

Christoph Stein and Claire Gaveriaux-Ruff

26. Neurotrophins, Cytokines, and Pain

Shafaq Sikandar and Claudia Sommer

27. Chemo- and Optogenetic Strategies for the Elucidation of Pain Pathways

Sascha R.A. Alles, Anne-Marie Malfait, and Richard J. Miller

28. Autoantibodies and Neuropathic Pain

John M. Dawes and David L. Bennett

29. The Proteomics and Metabolomics of Pain - Opportunities for Systems Medicine

David Gomez-Varela and Manuela Schmidt
