Foreword	xii
Preface	xiii
Contributors	xiv
1 The Definition of Acute Care Surgery	1
<i>Robert D. Becher, Raul Coimbra, and Kimberly A. Davis</i>	
1.1 Drivers for the Acute Care Surgery Model	1
1.2 Fellowship Training in ACS	3
1.3 Surgeon Satisfaction with ACS	3
1.4 Patient Throughput Improvements with ACS	3
1.5 Care Delivery Models	4
1.6 Standardizing Care: The Development of Grading Systems for EGS Diseases	4
1.7 Improving Patient Outcomes after Emergency General Surgery	4
1.8 Conclusion	6
2 Anatomic and Physiological Considerations	9
<i>Bishwajit Bhattacharya and Kimberly A. Davis</i>	
2.1 Introduction	9
2.2 Physiological Effects of Laparoscopy	9
2.2.1 Physiologic Effects of Increased Intra-abdominal Pressure	9
2.2.2 Physiologic Effects of Hypercarbia	10
2.3 Anatomic Considerations	10
2.4 Patient Populations	11
2.4.1 Pediatric Patients	11
2.4.2 Pregnant Patients	11
2.4.3 Geriatric Patients	12
2.5 Other Physiological Considerations of Minimally Invasive Surgery	12
2.6 Future of Minimally Invasive Surgery	12
3 Impact of Acute Surgical Illness on Critical Care Decisions Pre- and Postoperatively	14
<i>Lena M. Napolitano and Jay Doucet</i>	
3.1 Preoperative Critical Care	14
3.1.1 Strategies to Optimize Organ Function and Intravascular Volume Preoperatively	14
3.2 Postoperative Critical Care	18
3.2.1 Role of the Surgical Team and Intensivist	18
3.2.2 Resuscitation Goals	19
3.2.3 Transfusion Strategies	20
3.2.4 Management of Sepsis	22
3.2.5 Respiratory Failure/ARDS	24
3.2.6 Acute Kidney Injury	28
3.2.7 Nutrition	28
3.2.8 Pain, Agitation, and Delirium	28
3.2.9 Prevention of Complications/Prophylaxis	30
4 Cervical Trauma	34
<i>Aaron Richman and Clay Cothren Burlew</i>	
4.1 Penetrating Neck Trauma	34
4.1.1 Tracheal Injury	35
4.1.2 Cervical Esophageal Injury	36
4.1.3 Cervical Vascular Injury	36
4.2 Carotid Artery	37
4.3 Vertebral Artery	38
4.4 Subclavian Artery	38

Contents

4.5	Blunt Neck Trauma	39	Expert Commentary on Cervical Trauma	45
4.5.1	Blunt Cerebrovascular Injury Management	39	<i>Timothy C. Fabian</i>	
5	Blunt Abdominal Trauma	46		
	<i>Morgan Schellenberg and Kenji Inaba</i>			
5.1	Introduction	46	5.6	Pancreatic Injuries
5.2	General Approach to Blunt Abdominal Trauma	46	5.6.1	Diagnosis
5.3	Management of Specific Injuries After Blunt Abdominal Trauma	47	5.6.2	Management Strategy
5.3.1	Solid Organ Injuries	47	5.6.3	Surgical Techniques
5.3.2	Diagnosis	47	5.6.4	Complications
5.3.3	Management Strategy	48	5.7	Major Vascular Injuries
5.3.4	Surgical Techniques	48	5.7.1	Diagnosis
5.3.5	Complications	50	5.7.2	Management Strategy
5.4	Hollow Viscus Injuries	50	5.7.3	Surgical Techniques
5.4.1	Diagnosis	50	5.7.4	Complications
5.4.2	Management Strategy	51	5.8	Diaphragm Injuries
5.4.3	Surgical Techniques	51	5.8.1	Diagnosis
5.5	Gastroesophageal (GE) Junction Injuries	51	5.8.2	Management Strategy
5.5.1	Stomach	51	5.8.3	Surgical Techniques
5.5.2	Duodenum	52	5.8.4	Complications
5.5.3	Small Bowel and Colon	52	5.9	Considerations for Abdominal Closure
5.5.4	Rectum	52	5.10	Conclusion
5.5.5	Complications	53	Expert Commentary on Blunt Abdominal Trauma	61
6	Penetrating Abdominal Trauma	62	<i>Robert C. Mackersie</i>	
	<i>Lyndsey E. Wessels, Michael J. Krzyzaniak, and Matthew J. Martin</i>			
6.1	Introduction	62	6.4	Evaluation and Management of Gunshot Wounds
6.1.1	A Brief History of Penetrating Abdominal Trauma	62	6.4.1	Evaluating for "Hard Signs to Operate"
6.1.2	Epidemiology of Penetrating Abdominal Trauma	62	6.4.2	Selective Nonoperative Management
6.1.3	Abdominal Anatomy	63	6.4.3	Operative Principles Unique to Gunshot Wounds
6.2	Basic Principles of Penetrating Abdominal Trauma	63	6.5	Laparoscopy in Penetrating Abdominal Trauma
6.2.1	Mechanisms of Injury	63	6.6	Special Scenarios
6.2.2	Initial Evaluation	63	6.6.1	Penetrating Abdominal Trauma in Pregnancy
6.2.3	Basic Operative Principles	64	6.7	Damage Control Surgery
6.3	Evaluation and Management of Abdominal Stab Wounds	64	6.7.1	Damage Control Abdominal Procedures
6.3.1	Evaluating for "Hard Signs to Operate"	64	6.7.2	Damage Control Resuscitation
6.3.2	Selective Nonoperative Management	65		
6.3.3	Operative Principles Unique to Stab Wounds	69		

6.8	Conclusion	75	Expert Commentary on Penetrating Abdominal Trauma	79
	Disclaimer	75	<i>Thomas Scalea</i>	
7	Thoracic Trauma	80		
	<i>Benjamin J. Moran, Katherine M. Kelley, and James V. O'Connor</i>			
7.1	Introduction	80	7.5	Contraindications and Complications of VATS
7.2	Initial Evaluation	80	7.6	Open Thoracic Surgery
7.3	Indications for Operative Intervention	80	7.6.1	Operative Exposure
7.3.1	Urgent/Emergent	80	7.6.2	Airway Management
7.3.2	Thoracic Damage Control	82	7.6.3	Operative Techniques
7.3.3	Elective	82	7.7	Complications
7.4	Video-assisted Thoracoscopic Surgery (VATS)	82	7.8	Cardiac Injuries
7.4.1	History of VATS	82	7.8.1	Presentation and Evaluation
7.4.2	Advantages and Indications for VATS	82	7.8.2	Treatment
7.4.3	VATS Operative Technique	82		Expert Commentary on Thoracic Trauma ...
7.4.4	VATS Indications	82		<i>Gregory J. Jurkovich</i>
8	Vascular Trauma	94		
	<i>Jason Pasley, Megan Brenner, and Raul Coimbra</i>			
8.1	Introduction	94	8.4	Extremity Injuries
8.2	Diagnostic Testing	94	8.5	Reconstructive Options
8.3	Operative Considerations and Approaches ..	96	8.5.1	Saphenous vein
8.3.1	Thoracic Aorta and Great Vessels	96	8.5.2	Polytetrafluoroethylene (PTFE)
8.3.2	Neck Exposure	98	8.5.3	Other Conduits
8.3.3	Carotid Artery	98	8.6	Venous Injuries
8.3.4	Vertebral Artery Exposure	98	8.7	Considerations After Repair of Extremity Injuries
8.3.5	Axillary Artery Exposure	98	8.8	Role of Endovascular Interventions
8.3.6	Brachial Artery	98	8.8.1	Shunts
8.3.7	Abdominal Aorta and the Inferior Vena Cava (IVC)	99	8.8.2	Tourniquets
8.3.8	Celiac Artery	99	8.8.3	REBOA
8.3.9	Superior Mesenteric Artery (SMA)	99	8.9	Conclusion
8.3.10	Inferior Mesenteric Artery (IMA)	99		Expert Commentary on Vascular Trauma ...
8.3.11	Portal Vein (PV) and Superior Mesenteric Vein (SMV)	100		<i>David V. Feliciano</i>
8.3.12	Renal Artery and Vein	100		
8.3.13	Common Femoral Artery (CFA) and Vein	100		
8.3.14	Proximal SFA and Profunda Femoral Artery (PFA)	101		
8.3.15	Distal SFA	101		
8.3.16	Popliteal Artery	101		
9	Appendicitis	112		
	<i>Edward Lineen, Yee Wong, and Nicholas Namias</i>			
9.1	Introduction	112	9.2	Epidemiology

Contents

9.3 Pathogenesis	113	9.5.3 Appendectomy Versus Antibiotics	122
9.4 Diagnosis	114	9.5.4 Uncomplicated	122
9.4.1 Ultrasound	115	9.5.5 Complicated Appendicitis	123
9.4.2 Computed Tomography	116	9.6 Appendicitis in the Elderly	123
9.4.3 MRI	118	9.7 Pregnancy	124
9.5 Treatment	118	Expert Commentary on Appendicitis	131
9.5.1 Laparoscopic Versus Open Appendectomy	118	<i>Purvi P. Patel, Brendan Ringhouse, Christian Renz, and Fred A. Luchette</i>	
9.5.2 Alternative Minimal Invasive Techniques	121		
10 Acute Cholecystitis	132		
<i>Giana H. Davidson and Eileen M. Bulger</i>			
10.1 Introduction	132	10.6 Special Populations	136
10.2 Diagnostic Evaluation	132	10.6.1 Cholecystitis in Pregnancy	136
10.3 Indications and Timing for Operative Intervention	132	10.6.2 Cirrhosis	136
10.4 Symptomatic Gallbladder disease	133	10.6.3 Older population with Cholecystitis	136
10.4.1 Acute Cholecystitis	133	10.7 The Role of Minimally Invasive Surgery	136
10.4.2 Percutaneous Cholecystostomy	133	10.7.1 Role Of Intraoperative Cholangiogram (IOC), Intraoperative Ultrasound, and Indocyanine Green (ICG)	138
10.4.3 Chronic Cholecystitis	133	10.8 Contraindications to an MIS Approach	139
10.5 Complicated Biliary Disease	133	10.8.1 Open Cholecystectomy	139
10.5.1 Choledocholithiasis	133	10.9 The Role for Nonoperative Management	139
10.5.2 Cholangitis	134	10.9.1 Percutaneous Cholecystostomy	139
10.5.3 Gallstone Pancreatitis	134	10.9.2 Perforated Cholecystitis with Hepatic Abscess ..	139
10.5.4 Gangrenous Cholecystitis	134	10.10 The Management of Complications	139
10.5.5 Acalculous Cholecystitis	135	Expert Commentary on Acute Cholecystitis	147
10.5.6 External Compression of the Common Bile Duct: Mirizzi's and Lemmel Syndrome	135	<i>Ronald Stewart</i>	
10.5.7 Hydrops	135		
10.5.8 Cholecystenteric Fistula (Gallstone Ileus)	135		
10.5.9 Porcelain Gallbladder	136		
11 Acute Diverticulitis	148		
<i>Maryanne L. Pickett, Joseph P. Minei, and Michael W. Cripps</i>			
11.1 Introduction	148	11.8 Open Management Strategies	152
11.2 Indications for Operative Intervention	148	11.8.1 Hartmann's Procedure	152
11.3 Nonoperative Management	149	11.8.2 Primary Anastomosis (PA), With or Without, Diverting Loop Ileostomy (DLI)	152
11.4 Emergent Operation	149	11.9 Damage Control	152
11.5 Nonemergent Surgery	149	11.9.1 Timing of Stoma Reversal	153
11.6 Role of Minimally Invasive Surgery	150	11.9.2 Management of Postoperative Complications ..	153
11.7 Contraindications to MIS	151	Expert Commentary on Acute Diverticulitis	159
		<i>Frederick A. Moore</i>	

12	A Modern Approach to Complicated Pancreatitis	160		
	<i>Chris Javadi, Monica Dua, and Brendan Visser</i>			
12.1	Terminology Matters.....	160	12.5.3	Retroperitoneal Debridement.....
12.2	Necrosis and Infection Exist in a Continuum.....	160	12.5.4	Two Trocar Technique.....
12.3	Indications for Intervention.....	161	12.5.5	Primary Percutaneous Drainage.....
12.4	What is Our Goal?.....	161	12.5.6	Transgastric Debridement.....
12.5	Evolution of Strategies.....	161	12.5.7	Endoscopic Transgastric Debridement.....
12.5.1	Open Necrosectomy.....	161	12.6	Conclusion
12.5.2	Laparoscopic Debridement.....	161		Expert Commentary on A Modern Approach to Complicated Pancreatitis
				<i>Peter Fagenholz and George C. Velmahos</i>
13	Inflammatory/Infectious Bowel Disease	172		
	<i>Cigdem Benlice, Ipek Sapci, and Scott R. Steele</i>			
13.1	Crohn's Disease	172	13.3.5	The Management of Postoperative Complications.....
13.1.1	Introduction.....	172	13.4	Clostridium Difficile Colitis
13.1.2	Indications for Operative Intervention.....	172	13.4.1	Indications for Operative Intervention.....
13.1.3	Special Considerations.....	174	13.4.2	The Role of Minimally Invasive Surgery.....
13.1.4	Minimally Invasive Approaches in Crohn's Disease.....	175	13.4.3	Contraindications to an MIS Approach.....
13.1.5	Conclusion.....	176	13.4.4	Open Management Strategies.....
13.2	Ulcerative Colitis	176	13.4.5	The Management of Postoperative Complications.....
13.3	Clinical Manifestations	176	13.4.6	Conclusion.....
13.3.1	Indications for Operative Intervention.....	177		Expert Commentary on Inflammatory/ Infectious Bowel Disease
13.3.2	The Role of Minimally Invasive Surgery.....	178		<i>Formosa Chen and Clifford Y. Ko</i>
13.3.3	Contraindications to an MIS Approach.....	179		
13.3.4	Open Management Strategies.....	179		
14	Gastroduodenal Ulcers Requiring Surgery	192		
	<i>Robert D. Winfield and Marie L. Crandall</i>			
14.1	Introduction	192	14.6	Management of Hemorrhagic Peptic Ulcer Disease
14.2	Risk Factors for Peptic Ulcer Disease	192	14.7	Postoperative management of Complicated Peptic Ulcer Disease
14.3	Disease Presentation	192	14.8	Conclusion
14.4	Diagnosis	192		Expert Commentary on Gastroduodenal Ulcers Requiring Surgery
14.5	Management of Complicated Peptic Ulcer Disease	193		<i>L. D. Britt</i>
15	Intestinal Bowel Obstruction	206		
	<i>Bishwajit Bhattacharya and Adrian A. Maung</i>			
15.1	Introduction	206	15.3	Diagnostic Workup
15.2	Background	206		

Contents

15.4	Small Bowel Obstruction	206	15.5.2	Minimally Invasive Surgery for Large Bowel Obstruction	210
15.4.1	Indications for Operative Intervention	206	15.5.3	Technical Considerations in Minimally Invasive Surgery for Large Bowel Obstruction	210
15.4.2	Minimally Invasive Surgery for Small Bowel Obstruction	207	15.5.4	Endoscopic Management of Large Bowel Obstruction	211
15.4.3	Technical Considerations in Minimally Invasive Surgery for Small Bowel Obstruction	208			
15.4.4	Early Postoperative Obstruction	209		Expert Commentary on Intestinal Bowel Obstruction	215
15.5	Large Bowel Obstruction	210		<i>Andrew B. Peitzman</i>	
15.5.1	Operative Intervention for Large Bowel Obstruction	210			
16	Surgical Management of Incarcerated Hernias	216			
	<i>Jessica Koller Gorham and William S. Richardson</i>				
16.1	Introduction	216	16.8	Epigastric, Ventral, and Incisional Hernias ..	219
16.2	Epidemiology	216	16.9	Spigelian Hernia	220
16.3	Differential Diagnosis	216	16.10	Diaphragmatic Hernia	220
16.4	Diagnosis	216	16.11	Flank Hernia	222
16.5	Treatment	216	16.12	Pelvic Hernia	222
16.6	Inguinal Hernia	217	16.13	Internal Hernia	223
16.6.1	Examples	217		Expert Commentary on Surgical Management of Incarcerated Hernias	227
16.7	Umbilical Hernia	218		<i>Brent Matthews</i>	
17	Mesenteric Ischemia	228			
	<i>James Becker, Todd W. Costantini, and Joseph M. Galante</i>				
17.1	Introduction	228	17.4.2	Operative Exposure of the Mesenteric Vessels ..	232
17.2	Anatomy of Mesenteric Circulation	229	17.4.3	Thromboembolic Mesenteric Ischemia	233
17.3	Diagnosis of Acute Mesenteric Ischemia ..	229	17.4.4	Veno-occlusive Mesenteric Ischemia	234
17.3.1	History and Physical Examination	229	17.4.5	Non-Occlusive Mesenteric Ischemia	235
17.3.2	Laboratory Analysis	230	17.5	Ischemic Colitis	235
17.3.3	Imaging	230	17.6	Conclusion	236
17.4	Treatment of Acute Mesenteric Ischemia ..	232		Expert Commentary on Mesenteric Ischemia ..	241
17.4.1	Resuscitation	232		<i>David Spain</i>	
18	Esophageal Emergencies: Emergency Management of Paraesophageal Hernias and Esophageal Perforations	242			
	<i>Geoffrey P. Kohn</i>				
18.1	Introduction	242	18.2.3	Incarceration and Strangulation	243
18.2	Paraesophageal Hernias	242	18.2.4	Diagnosis	243
18.2.1	Etiology	243	18.2.5	Indications for Repair	245
18.2.2	Classification	243	18.2.6	Management of Acute Gastric Obstruction	245
			18.2.7	Operative Technique	245
