Preface	xvii
Part 1: Healthy Skin Microbiome and Oral-Skin Interactions	1
1 The Microbiome of Healthy Skin	3
<i>Samantha Samaras and Michael Hoptroff</i>	
1.1 Introduction	3
1.1.1 Retrospective	3
1.1.2 Next Generation Sequencing	6
1.2 The Skin Microbiome in Health	7
1.2.1 Composition	7
1.2.2 Diversity	10
1.2.3 Uniqueness	13
1.3 Healthy Skin is the Foundation of a Balanced Skin Microbiome	14
1.3.1 Physical Aspects of Skin Impacting the Microbiome	14
1.3.2 Biochemical and Defensive Aspects of Skin Impacting the Microbiome	16
1.3.2.1 The Acid Mantle	16
1.3.2.2 Antimicrobial Lipids (AMLs)	16
1.3.2.3 Antimicrobial Peptides (AMPs)	17
1.3.3 Nutritional and Microenvironmental Aspects of Skin Impacting the Microbiome	18
1.3.3.1 Amino Acids	18
1.3.3.2 Sebaceous Lipids	19
1.3.3.3 Organic Acids and Other Materials	19
1.4 A Balanced Skin Microbiome Supports the Normal Functioning of Healthy Skin	20
1.4.1 Pathogen Exclusion	20
1.4.2 Contribution to Skin pH	20

1.4.3	Microbial Contribution to Skin Barrier Integrity	21
1.5	Conclusion	22
	Acknowledgments	23
	References	23
2	The Gut Microbiome-Skin Axis: Impact on Skin and Systemic Health	33
	<i>David Drake</i>	
2.1	Introduction	34
2.2	The Gut-Skin Microbiome Axis	35
2.3	The Gut-Skin Microbiome Axis: Principle Pathways	35
2.4	Dysbiosis of the Gut Microbiome and Skin Dyshomeostasis	37
2.4.1	Acne Vulgaris	38
2.4.2	Atopic Dermatitis	39
2.5	Summary and Future Directions	39
	References	40
3	The Skin and Oral Microbiome: An Examination of Overlap and Potential Interactions between Microbiome Communities	45
	<i>Sandra Buerger</i>	
3.1	Introduction	45
3.1.1	Focus of the Chapter	45
3.1.2	Definition of Skin Microbiome	47
3.1.3	Definition of Oral Microbiome	48
3.2	Characterization of the Microbiome	48
3.2.1	Variability and Stability of Skin and Oral Microbiome	48
3.2.2	Microbial Community	49
3.2.2.1	Permeant Mutualistic or Commensal Microbes	49
3.2.2.2	Non-Pathogenic Transient Microbes	50
3.2.2.3	Pathogenic Microbes	50
3.3	The Core Skin and Oral Microbiomes	51
3.3.1	Taxonomic Methodology	51
3.3.2	Subgroups of the Microbiome	52
3.3.2.1	Bacteriome	52
3.3.2.2	Mycobiome (and Other Eukaryotic Microbial Members)	52
3.3.2.3	Virome	53
3.4	Interactions Between Skin and Oral Microbiomes	54
3.4.1	Potential for Interactions	54
3.4.2	Quorum Sensing	54
3.4.3	Immune System Development	54

3.4.4	Future Directions	55
3.5	Conclusion	55
	Acknowledgments	56
	References	56
Part 2: Skin Microbiome Observational Research		59
4	Skin Microbiome Alterations in Skin Diseases	61
	<i>Travis Whitfill, Gilles R. Dubé and Julia Oh</i>	
4.1	Introduction and Background	61
4.2	Interactions Between Microbes and Host	62
4.3	Summary of Known Associations Between Skin Dysbioses and Skin Diseases	64
4.3.1	The Role of <i>S. Aureus</i> in Skin Disease	64
4.3.2	Atopic Dermatitis	64
4.3.3	Acne Vulgaris	66
4.3.4	Psoriasis	67
4.4	Skin Dysbioses in Skin Health	68
4.5	Other Skin Conditions	68
4.6	Therapeutic Approaches to Dysbiosis-Associated Skin Diseases	69
4.6.1	Traditional Methods of Treating Dysbiosis-Associated Skin Diseases	69
4.6.1.1	Atopic Dermatitis	69
4.6.1.2	Acne Vulgaris	69
4.6.2	Emerging Therapeutic Approaches to Treating Dysbiosis-Associated Skin Diseases	70
4.7	Conclusion and Future Directions	71
	Acknowledgements	71
	References	71
5	The Axillary Microbiome and its Relationship with Underarm Odor	79
	<i>Alexander Gordon James</i>	
5.1	Introduction	80
5.2	Composition of the Axillary Microbiome	86
5.3	16-Androstene Steroids and Axillary Malodour	95
5.4	The Axillary Microbiome, VFAs and Malodour	96
5.5	The Axillary Microbiome, Thioalcohols and Malodour	100
5.6	Perturbation of the Axillary Microbiome	108
5.7	Human Genetics – Influence on Malodour and the Axillary Microbiome	112

5.8	Conclusions and Future Perspectives	115
	Acknowledgements	122

6	Infant Skin Microbiome	131
	<i>Georgios N. Stamatas</i>	
6.1	Introduction	131
6.2	Infant Skin Maturation	132
6.3	Infant Immune System Maturation	133
6.4	Infant Skin Microbiome Dynamics	134
6.5	Mother-Infant Microbial Transmission	137
6.6	Conclusion	138
	References	139
	Part 3: Skin Microbiome in Disequilibrium and Disease	143
7	Microbiome of Compromised Skin	145
	<i>Sara Farahmand</i>	
7.1	Atopic Dermatitis	146
7.2	Psoriasis	148
	7.2.1 Diversity	149
	7.2.2 Microbiome Composition	151
7.3	Acne	152
7.4	Rosacea	153
7.5	Seborrheic Dermatitis and Dandruff	155
7.6	Exposome, Skin Barrier, and Skin Microbiome	157
	7.6.1 Skin Irritation and Microbiome	157
	7.6.2 Diaper Dermatitis	157
	7.6.3 Occupational Hand Dermatitis	158
	7.6.4 Allergic Contact Dermatitis (ACD) and Skin Microbiome	159
7.7	Conclusion	160
	References	163
8	Human Cutaneous Ectoparasites: A Brief Overview and Potential Therapeutic Role for Demodex	171
	<i>Stephen L. Strobel</i>	
8.1	Introduction	171
8.2	Chiggers (Trombiculidae)	172
8.3	Bedbugs (Cimex lectularius and Hemipterus)	173

8.4	Lice	173
8.5	Scabies (<i>Sarcoptes scabiei</i>)	174
8.6	Demodex	175
8.7	The Association Between Demodex, Rosacea and Blepharitis	176
8.8	Hypothesis	177
8.9	Demodex Folliculorum as a Drug Delivery Agent for Early Skin Cancer	177
8.10	Limitations	179
8.11	Conclusion	180
8.12	Future Considerations	181
	References	182
9	Dysbiosis of the Skin Microbiome in Atopic Dermatitis	185
	<i>Joyce Cheng and Tissa Hata</i>	
9.1	Introduction	185
9.2	The Healthy Skin Microbiome	186
9.3	The Skin Microbiome in Atopic Dermatitis	187
9.4	Microbiome-Targeted Treatment Strategies	195
9.5	Conclusion	196
	References	196
10	The Skin Microbiome of Inverse Psoriasis	203
	<i>Jennifer Chung, Bruce E. Strober and George M. Weinstock</i>	
10.1	Introduction	204
10.2	Methods	205
	10.2.1 Subject Population	205
	10.2.2 Patient Diagnosis and Characteristics of Populations	206
	10.2.3 Specimen Collection	206
	10.2.4 Sample DNA Extraction and Sequencing	207
	10.2.5 Downstream Sequence Processing and Analysis	207
10.3	Results	208
	10.3.1 Cohort Metadata	208
	10.3.2 Sequencing Information	208
	10.3.3 The Skin Microbiome of Intertriginous Lesion and Non-Lesional Sites on Inverse Psoriasis Subjects	208
	10.3.3.1 Psoriasis Lesional Status is Associated with Relative Abundance and Presence of Specific Species	208

10.3.3.2	Psoriatic Lesions Trend to Decrease Taxonomic Diversity	210
10.3.3.3	Psoriatic Lesions are Characterized by Greater Intragroup Variability	212
10.3.4	Inverse Psoriasis vs. Plaque Psoriasis vs. Healthy (All Non-Lesion Sites)	212
10.4	Conclusions & Future Plans	212
	Acknowledgements	213
	References	214
Part 4:	Skin's Innate Immunity	217
11	Effects of Endogenous Lipids on the Skin Microbiome	219
	<i>Carol L. Fischer and Philip W. Wertz</i>	
11.1	Introduction	219
11.2	Sebaceous Lipids -- Source of Fatty Acids	221
11.3	Stratum Corneum Lipids - Source of Long-Chain Bases	223
11.4	Antimicrobial Activity of Fatty Acids	226
11.5	Antimicrobial Activity of Long-Chain Bases	230
11.6	Conclusion	231
	References	231
12	Innate Immunity in Epidermis	237
	<i>Miroslav Blumenberg</i>	
12.1	Introduction	237
12.2	Skin Acts as an Anatomical Physical and Chemical Barrier to Infectious Agents	238
12.3	Epidermal Cells Recognize Conserved Features of Pathogens, as well as the Indicators of Tissue Damage	239
12.4	Defensive Antimicrobial Proteins AMPs	240
12.5	Cytokines, Specific Signals that Activate Inflammation and Further Cellular Protective Mechanisms	242
12.6	Specialized White Blood Cells Identify and Remove Pathogens	243
12.7	Complement System	246
12.8	Innate Immune System Activates the Adaptive Immune System	246
12.9	Antiviral Defenses	247
12.10	Innate Immunity Memory?	247
12.11	Cutaneous Microbiome: A Newly Surfaced Contributor to Innate Immunity	248

12.12	Conclusion	251
12.13	Future Perspectives	252
	References	254
Part 5: Testing and Study Design		261
13	Next Generation Sequencing Reveals the Skin Microbiome	263
	<i>Niamh B O'Hara</i>	
13.1	Introduction	263
13.2	Current Approaches to Test the Microbiome	265
13.3	The Genomics Revolution and Metagenomics	266
13.4	Metagenomics and the Skin Microbiome	267
13.5	Our Work at Biotia	268
13.6	Challenges and Solutions in Metagenomics	269
13.7	The Microbial World is our Oyster	272
13.8	The Future of Metagenomics	273
	Acknowledgements	273
	References	274
14	Three-Dimensional Human Skin Models to Investigate Skin Innate and Immune-Mediated Responses to Microorganisms	277

14.1	State-of-the-Art and Limits of Skin Microbiota Research	277
14.2	Mechanism-Based Approach to Study Host Response to Associated Microbiome: 3D Skin Models	279
14.3	Understanding <i>S. epidermidis</i> and <i>S. aureus</i> Behavior and Role on Reconstructed Human Epidermis (RHE)	281
14.4	Immuno-Competent Atopic Dermatitis Model	284
14.5	Conclusion and Future Perspectives	286
	References	286
15	<i>Cutibacterium acnes</i> (formerly <i>Propionibacterium acnes</i>) In-Vivo Reduction Assay: A Pre-Clinical Pharmacodynamic Assay for Evaluating Antimicrobial/Antibiotic Agents in Development for Acne Treatment	289
	<i>Stuart R. Lessin and James J. Leyden</i>	
15.1	Acne Pathogenesis and the Role of <i>Cutibacterium acnes</i> (formerly <i>Propionibacterium acnes</i>)	290
15.1.1	Introduction	290
15.1.2	Pathogenesis	290
15.1.3	The Role of <i>C. acnes</i> and its Microbiome	290

15.2	Current Therapies and Regulatory Approval	293
15.3	<i>In-Vivo C. acnes</i> Reduction Assay	294
15.4	Correlations of <i>C. acnes</i> Reduction and Clinical Efficacy	297
15.5	Conclusion	300
	References	300

Part 6: Regulatory and Legal Aspects for Skin Microbiome Related Products 303

16 Intellectual Property Tools for Protecting, Developing and Growing a Skin Microbiome Brand 305

Jeffrey K. Mills

16.1	Introduction	305
16.2	The Tools of Intellectual Property	306
16.2.1	Patents	306
16.2.2	Trademarks	307
16.2.3	Copyrights	308
16.2.4	Trade Secrets/Know-How	309
16.3	Building an Intellectual Property Portfolio for a Skin Microbiome Brand	310
16.3.1	Patents to Define “The Fence”	310
16.3.1.1	Patents “As Sticks” - Enforcement of Infringement	313
16.3.1.2	Patents “As Financial Boosts” – Licensing and Other Agreements	314
16.3.2	Trademarks to Establish Brand Recognition	315
16.3.3	Copyrights to Maintain Information	317
16.3.4	Trade Secrets/Know-How to Keep A Competitive Edge	318
16.4	Conclusion	320

17 Regulatory Aspects of Probiotics and Other Microbial Products Intended for Skin Care: The European Approach 321

Atte von Wright

17.1	Introduction	322
17.2	The Governing Bodies and Decision-Making in the EU	322
17.2.1	The Legal Instruments of the EU	323
17.3	Probiotic Foods and the European Regulations	324
17.3.1	The Safety Assessment of Microorganisms by EFSA, The QPS Concept	324
17.3.1.1	The Safety Assessment of Non-QPS Microorganisms	327

17.3.2	The Case of GMMs	328
17.3.3	Microorganisms as Novel Foods	329
17.3.4	Human Probiotics and Functional Claims	329
17.4	Probiotic Skin Care Products as Pharmaceuticals	330
17.4.1	The Authorization Procedure for Medicines	331
17.4.1.1	The Centralized Procedure	332
17.4.1.2	National Authorizations and Authorizations by Mutual Recognition or Decentralized Procedures	333
17.4.2	Bacteria as Medical Devices	334
17.5	Probiotics in Cosmetics	335
17.5.1	Safety Aspects	336
17.5.1.1	Microorganisms on Skin – Problems of Safety Evaluation	337
17.5.2	The Permissible Cosmetic Claims in the EU	338
17.6	Conclusions	338
