

SECTION 1.

Introduction to Creative Programming Techniques

Meagen Salinas

SECTION 2. TREMOR DISORDERS

Case 1 Candidate Selection for Essential Tremor

Laura Surillo Dahdah

Case 2 DBS Programming for Essential Tremor

Brent Bluett

Case 3 Utilizing DBS to Improve Orthostatic Tremor

Anhar Hassan

Case 4 Bilateral VIM-Thalamic DBS for Medication-refractory Orthostatic Tremor

Mitra Afshari & Jill Ostrem

Case 5 Rebound Tremor Following a Sub-optimally Placed VIM DBS

Parul Jindal & Joohi Jimenez-Shahed

Case 6 Symptomatic Cystic Lesion Following DBS Surgery

Vibhash Sharma & Shilpa Chitnis

SECTION 3. PARKINSON'S DISEASE

Case 7 Candidate Selection for DBS for Parkinson's Disease

Laura Surillo Dahdah

Case 8 DBS Programming for Parkinson's Disease

Raja Mehanna

Case 9 Target Selection for Parkinson's Disease with Medication Refractory Unilateral Resting Tremor

Fuyuko Sasaki & Genko Oyama

Case 10 Genetic Mutations and DBS

Jared Hinkle & Zoltan Mari

Case 11 Issues to Consider When Mild Cognitive Impairment is Revealed in Pre-operative Screening

Sushma Kola & Anhar Hassan

Case 12 Use of the STN and GPi Deep Brain Stimulation Targets in the Same Parkinson's Patient: Patient Specific Targeting

Shabbir Hussain I. Merchant & Nora Vanegas-Arroyave

Case 13 Medication-Refractory Parkinsonian Tremor Requiring Dual Lead Implantation for Tremor Control

Anhar Hassan

Case 14 Use of Constant Current Mode to Allow Both Monopolar and Bipolar Interleaving at a Single Contact

Meredith Spindler & Lana Chahine

Case 15 STN-DBS May Improve Pain in the Setting of Parkinson's Disease

Anjali Gera/Gian Pal

Case 16 DBS Responsive Camptocormia in Parkinson's Disease

Elena Call & Helen Bronte-Stewart

Case 17 Deactivation of One STN-DBS Device to Address Brittle Ipsilateral Dyskinesia in a Patient with Tremor-Dominant Parkinson's Disease
Julia Kroth & Sergiu Groppa

Case 18 Management of Stimulation-Induced Dyskinesia in Parkinson Disease with Interleaving Programming Settings
Vibhash Sharma & Rajesh Pahwa

Case 19 Management of Brittle Dyskinesia and DDS in Subthalamic Deep Brain Stimulation
Junaid Siddiqui & Jawad Bajwa

Case 20 Freezing of Gait after Bilateral GPi-DBS in Generalized Dystonia
Mariana Moskovich

Case 21 GPi Stimulation-Induced Gait Disturbance and Management by Re-programming
Dhanya Vijayakumar & Joohi Jimenez-Shahed

Case 22 Rescue Vim DBS to Address Refractory Tremor following STN DBS with Brittle Stimulation-Induced Dyskinesia
Mitra Afshari & Jill Ostrem

Case 23 Postural Instability and Gait Disorder after STN-DBS: Evaluating Disease Progression, Stimulation Settings, and Medication
Javier R. Pérez-Sánchez & Monica M. Kurtis

Case 24 Non-Surgical Management of an Exposed DBS Lead
Ethan G. Brown & Jill Ostrem

Case 25 Steroid-Responsive Edema Interfering with DBS Programming
Pravin Khemani & Shilpa Chitnis

Case 26 The Positive Lesion Effects of Intracranial Hemorrhage on DBS Surgery Outcome
Jacqueline Meystedt & David Charles

Case 27 Fibrous Scarring and DBS Lead Implantation
Vinata Vedam Mai & Michael Okun

Case 28 Cerebral Venous Infarction after Deep Brain Stimulation Surgery
Andi Nugraha Sendjaja & Takashi Morishita

Case 29 Open Circuits and Loss of DBS Benefit in the Setting of Parkinson's Disease
Arjun Tarakad & Joohi Jimenez-Shahed

Case 30 Acute Neuropsychiatric Symptoms and Impulse Control Disorders after Subthalamic Nucleus Deep Brain Stimulation
Adolfo Ramirez-Zamora & Michael Okun

Case 31 Improved Outcome on Interleaved Deep Brain Stimulation Settings
Svjetlana Miocinovic & Shilpa Chitnis

Case 32 Deep Brain Stimulation Targeting the Ventral Intermediate Nucleus of the Thalamus for Parkinsonian Tremor and Later Adding the the Globus Pallidus Internus for Parkinson's Disease Features
Teri Thompson

Case 33 Expected Improvement in Sleep Quality and Unexpected Improvement in Severe Nightmares after DBS in Parkinson's Disease
Laurice Yang

SECTION 4. DYSTONIA

Case 34 Candidate Selection for DBS for Dystonia

Laura Surillo Dah Dah

Case 35 DBS Programming for Dystonia

Mitesh Lotia

Case 36 Choosing a Target for DBS in Dystonia Associated Tremor: GPi, VIM, STN, Zi or a Combination of Targets

Mustafa Siddiqui & Stephen B. Tatter

Case 37 Stimulation Induced Dyskinesia, Interleaving Settings and Management of STN DBS in DYT-1 Dystonia

Kyle T Mitchell & Jill Ostrem

Case 38 Deep Brain Stimulation Targeting the Globus Pallidus Internus for Dystonic Tremor in the Setting of Generalized Dystonia

Teri Thompsen

SECTION 5. MISCELANEOUS

Case 39 Huntington's Disease: DBS in Adult Huntington's Disease for Treatment of Axial Dystonia

Jessica A. Carl and Leo Verhagen Metman

Case 40 Aggressiveness: DBS for Medically Refractory Aggressive and Injurious Behavior

Oscar Bernal-Pacheco

Case 41 Bilateral Globus Pallidus DBS for Dystonia and Dystonic Tremor in Spinocerebellar Ataxia 17

Aparna Shukla and Pam Zeilman

Case 42 Deep Brain Stimulation for Disabling "Outflow" Tremors: Troubleshooting Strategies for Tremor Habituation

Corneliu Luca

Case 43 Tardive Dystonia and Dyskinesia Responsive to Deep Brain Stimulation

Irene Malaty
