

- 1: A historical perspective on neurological and neuropsychiatric definitions, *German E. Berrios and Ivana S. Marková*
- 2: Neuroimaging and fluid biomarkers of Alzheimer's disease: implications for definition, diagnosis and treatment, *V.R. Varma, Y. F. Chuang, and M. Thambisetty*
- 3: Life course, exposure, and ageing populations, *Yoav Ben-Shlomo*
- 4: Examining trends in dementia incidence and prevalence using an age-period-cohort framework, *Kenneth M. Langa, Eileen Crimmins, and Mark D. Hayward*
- 5: Overview of common designs, measures of effect, and biases in neuro-epidemiological studies, *Derrick A. Bennett*
- 6: Conducting research in low and middle income settings., *Maëlen Guerchet, Rosie Mayston, and A. Matthew Prina*
- 7: Trial designs including observational to interventional, *Edo Richard*
- 8: Cardiometabolic morbidities and dementia, *Chengxuan Qiu, Davide Liborio Vetrano, and Laura Fratiglioni*
- 9: Early onset Alzheimer's disease, *Ratnavalli Ellajosyula*
- 10: Huntington's Disease, *Juliana R. Dutra*
- 11: Idiopathic Parkinson's disease and classification of Parkinsonisms, *Valentina Gallo, Tanya P. Garcia, and Karen Marder*
- 12: Dementia and Parkinson's disease, *Rodolfo Savica and Pierpaolo Turcano*
- 13: FTD and ALS, *Giancarlo Logroscino and Adriano Chiò*
- 14: Rare Neurodegenerative Parkinsonism (PSP, MSA, CBD), *James B. Rowe and Ian T.S. Coyle-Gilchrist*
- 15: Posterior Cortical Atrophy, *Keir X. X. Yong, S. J. Crutch, and J. M. Schott*
- 16: Epidemiology of essential tremor, *Elan D. Louis*
- 17: Detecting dementia early in populations, *Amy R. Borenstein*
- 18: The oldest-old and dementia at the end of life, *María M. Corrada and Claudia H. Kawas*
- 19: Global stroke burden and prevention strategies- findings from GBD 2015, *Rita V. Krishnamurthy and Valery L. Feigin*
- 20: Stroke and TIA, *Bo Norrving, MD, PhD*
- 21: Small vessel disease, *Fergus Doubal, Anna Poggesi, Leonardo Pantoni, and Joanna Wardlaw*
- 22: Migraine: Descriptive epidemiology and related neurobiology, *Julio R. Vieira and Richard B. Lipton*
- 23: The clinical spectrum of neurodegenerative disease: moving beyond Mild Cognitive Impairment, *Stina Saunders, Graciela Muniz-Terrera, Tom C. Russ, Craig W. Ritchie, and Karen Ritchie*
- 24: The epidemiology of apathy in neurological disorders, *Sergio Starkstein, Bradleigh Hayhow, and Pierre Wibawa*
- 25: Behavioural and Psychological Symptoms of Dementia, *Rianne van der Linde and Tom Denning*
- 26: Delirium, *Daniel Davis, Sarah Richardson, and Esteban Sepulveda*
- 27: Methods and approaches to examining the interface of late-life depression and dementia, *Mirjam I. Geerlings*
- 28: Epidemiology of schizophrenia and related disorders, *Assen Jablensky, H. E. Jongsma HE, James B. Kirkbride, and Peter B. Jones*
- 29: Multiple sclerosis: Descriptive epidemiology and related neurobiology, *Elisabeth Gulowsen Celius*
- 30: Myasthenia gravis, *Anne Taraldsen Heldal and Nils Erik Gilhus*

- 31: Epilepsy, *Ettore Beghi, Giorgia Giussani, and Torbjorn Tomson*
- 32: Neuropathies: Descriptive epidemiology and related neurobiology, *Ettore Beghi, Giorgia Giussani, and Marco Poloni*
- 33: Sensory loss Vision, *Paul J. Foster, Anthony Khawaja, Lisanne J. Balk, Zaynah Muthy, and Axel Petzold*
- 34: Sensory loss - Hearing, *Adele M. Goman and Frank R. Lin*
- 35: The Neuroepidemiology of Human Prion Disease, *Patrick J. M. Urwin and Anna M. Molesworth*
- 36: Epidemiology of bacterial and parasitic infections of the central nervous system, *Charles R. Newton*
- 37: Infection: other than bacterial, including HIV, *Inès Yoro-Zohoun, Jaime Luna, Salmane Amidou, and Pierre-Marie Preux*
- 38: Traumatic brain and spinal cord injury, *Alice Theadom and Kelly M. Jones*
- 39: Electromagnetic fields, *Joachim Schüz and Maria Feychting*
- 40: Metals and neurodegeneration, *Susan Peters, Anne E. Visser, Marc Weisskopf, Marianthi-Anna Kioumourtzoglou, and Roel Vermeulen*
- 41: Estimating the global burden of stroke: methods and challenges, *Thomas Truelsen, Catherine Johnson, Mohsen Naghavi, Theo Vos, Valery L. Feigin, and Gregory Roth*
- 42: What is the role of trials and other well designed studies in the understanding of neurological and neuropsychiatric conditions, *Carol Brayne*
- 43: Research and methodologic opportunities and challenges conducting research among U.S military personnel, *Ann I. Scher, David W. Niebuhr, and Darrell Singer*
- 44: Global evidence generation, *Adesola Ogunniyi*
- 45: The role of prevention in common neurological disorders, *Giancarlo Logroscino, Carol Brayne, and Rosanna Tortelli*
