

1. Introduction

Part 1: Hepatoprotective activity of natural compounds and plant extracts in liver diseases

2. Hepatitis B
3. Hepatitis C
4. Alcoholic fatty liver disease
5. Non-alcoholic fatty liver disease (NAFLD)
6. Liver cancer
7. Chronic liver diseases (steatosis, fibrosis, primary sclerosing cholangitis, biliary cirrhosis)
8. Drug-induced hepatotoxicity

Part 2: Influence of nutrients, plant extracts and natural compounds in liver diseases

9. Influence of Omega-3 fatty acids and Monounsaturated fats in liver diseases
10. Influence of vitamins (E, C, niacin and D) in liver diseases
11. Influence of other nutrients (e.g. l-arginine, taurine and choline) in liver diseases
12. Antioxidants with hepatoprotective activity
13. Plant extracts with putative hepatoprotective activity
14. Plant extracts with putative hepatotoxicity activity
15. Other compounds with hepatotoxicity
