

1: Intensive and acute cardiac care: an introduction, *Eric Bonnefoy, Susanna Price, Marco Tubaro, Pascal Vranckx and Christiaan Vrints*

Section I - Intensive and acute cardiovascular care

- 2: Training and certification in Intensive and Acute Cardiovascular Care, *Eric Bonnefoy and Susanna Price*
- 3: Intensive Cardiovascular Care Units: structure, organization and staffing, *Eric Bonnefoy and Tom Quinn*
- 4: The heart team, *Sergio Leonardi, Thomas Modine, and Stephan Windecker*
- 5: Patient safety and clinical governance, *Tom Quinn and Matthew Parkin*
- 6: Ethical issues in Intensive and Acute Cardiovascular Care, *Jean-Louis Vincent and Jacques Creteur*
- 7: Quality of care, *Fiona Ecarnot, and François Schiele*

Section II - The pre-hospital phase and the emergency department

- 8: Emergency medical systems and networks, *Olivier Hoogmartens, Michiel Stiers, Koen Bronselaer and Marc Sabbe*
- 9: Out-of-hospital cardiac arrest, *Jerry P Nolan and Christian Hassager*
- 10: Chest pain and the Chest Pain Units, *Christiaan Vrints, Janina Stepinska, and Marc J Claeys*
- 11: Acute dyspnoea in ED, *Eleni Michou, Nikola Kozuharov, Jasmin Martin, Christian Mueller*

Section III - Monitoring and investigations in the Intensive Cardiovascular Care Unit

- 12: Assessment of the cardiovascular system (including PAC), *Alessandro Sionis, Etienne Gayat and Alexandre Mebazaa*
- 13: Assessment of the respiratory function, *Antoine Vieillard-Baron*
- 14: Neurological assessment of the acute cardiac care patient, *Mathieu van der Jagt, Jeroen Bunge, and Fabio Silvio Taccone*
- 15: Monitoring of the kidney, liver and other vital organs, *Karl Werdan, Brijesh Patel, Matthias Girndt, Henning Ebelt, Jochen Schröder, and Sebastian Nuding*
- 16: Blood gas analysis: acid-base, fluid and electrolyte disorders, *Richard Paul*
- 17: Interpretation and clinical use of chest radiographs, *Alexander Parkhomenko, Olga S Gurjeva, and Tetyana Yalynska*
- 18: Echocardiography (including thoracic ultrasound), *R. Beyer, F. Flachskampf, and Pavlos Myriantheys*
- 19: Computed tomography: coronary angiography and cardiac imaging, *Jeff M Smit, Mohammed El Mahdiui, Michiel A de Graaf, Arthur JHA Scholte, Lucia Kroft, and Jeroen J Bax*
- 20: Cardiac magnetic resonance in intensive and acute cardiovascular care, *Juerg Schwitter and Jens Bremerich*

Section IV - Procedures in Intensive Cardiovascular Care Unit

- 21: Non-invasive ventilation, *Josep Masip, Kenneth Planas, and Arantxa Mas*
- 22: Mechanical ventilation, *Luigi Camporota and Francesco Vasques*
- 23: Temporary pacing, *Bulent Gorenek*
- 24: Ultrasound-guided vascular access, *Richard Paul and Farah Shariff*
- 25: Pericardiocentesis, *Caterina Decarlini and Stefano Maggiolini*
- 26: Chest tubes, *Erino A. Rendina, Camilla Vanni, and Giulio Maurizi*

- 27:Renal support therapy, *Claudio Ronco, Stefano Romagnoli and Zaccaria Ricci*
28:Short term mechanical circulatory support, *Holger Thiele and Pascal Vranckx*
29:Nutrition support, *Michael P Casaer and Greet Van den Berghe*
30:Physiotherapy in critically ill patients, *Rik Gosselink and Jean Roeseler*

Section V - The laboratory in intensive and acute cardiovascular care

- 31:The use of biomarkers for acute cardiovascular diseases, *Allan S Jaffe*
32:Biomarkers in acute coronary syndromes, *Jasper Boeddinghaus, Thomas Nestelberger, Raphael Twerenbold, and Christian Mueller*
33:Biomarkers in acute heart failure, *Rajiv Choudhary, Nicholas Wettersten, Kevin Shah, and Alan Maisel*
34:Biomarkers of coagulation and thrombosis, *Anne-Mette Hvas, Erik L Grove, and Steen Dalby Kristensen*
35:Biomarkers of renal and hepatic failure, *Mario Plebani, Monica Maria Mion, and Martina Zaninotto*

Section VI - Acute coronary syndromes

- 36:Atherosclerosis and thrombosis, *Lina Badimon and Gemma Vilahur*
37:The universal definition of myocardial infarction, *Kristian Thygesen, Joseph S. Alpert, Allan S. Jaffe, and Harvey D. White*
38:ST-segment elevation myocardial infarction, *Borja Ibanez and Stefan James*
39:Fibrinolytic, antithrombotic, and antiplatelets drugs in acute coronary syndromes, *Sigrun Halvorsen, Giuseppe Gargiulo, Marco Valgimigli, and Kurt Huber*
40:Mechanical complications of myocardial infarction, *Elena Puerto and Héctor Bueno*
41:Non-ST-elevation acute coronary syndromes, *Héctor Bueno and José A Barrabés*
42:Percutaneous coronary interventions in acute coronary syndromes, *Marco Valgimigli and Andreas Mitsis*
43:Coronary artery bypass grafting, *Piroze M Davierwala and Michael A. Borger*
44:Gender considerations in acute coronary syndromes, *Eva Swahn, Joakim Alfredsson, and Sofia Sederholm Lawesson*

Section VII - Acute heart failure (including cardiogenic shock)

- 45:Epidemiology, classification, and pathophysiology, *Dimitrios Farmakis and Gerasimos Filippatos*
46:Pharmacological therapy in the acute phase, *Kieran F. Docherty, Jonathan R. Dalzell, Mark C. Petrie, and John J.V. McMurray*
47:Low cardiac output states and cardiogenic shock, *Holger Thiele and Suzanne de Waha-Thiele*
48:Non pharmacological therapy: when drugs are not enough, *Jeroen Dauw, Wilfried Mullens, Johan Vijgen, and Pascal Vranckx*
49:Heart surgery and transplantation, *Volkmar Falk, Felix Schönrrath, and Jan Kügler*
50:Implanted cardiac support devices, *Andrew C Morley-Smith, André R Simon, and John Pepper*
51:Donor organ management, *Arne P Neyrinck, Patrick Ferdinande, Dirk Van Raemdonck, and Marc Van de Velde*
52:Palliative care in the Intensive Cardiovascular Care Unit, *Jayne Wood*

Section VIII - Arrhythmias

53: Atrial fibrillation and supraventricular arrhythmias, *Demosthenes G. Katritsis and A John Camm*

54: Ventricular tachyarrhythmias, *Paolo Della Bella, Dagmara Dilling, and Francesca Baratto*

55: Pacemaker and ICDs: troubleshooting, *Haran Burri and Neasa Starr*

Section IX - Specific acute cardiovascular conditions

56: Myocarditis and pericarditis, *Massimo Imazio and Stephane Heymans*

57: Acute valve disease and endocarditis, *Gregory Ducrocq, Franck Thuny, Bernard Lung, and Alec Vahanian*

58: Acute complications of congenital heart disease in adults, *Susanna Price, Brian F Keogh, and Lorna Swan*

59: Aortic emergencies, *Marc Schepens and Eric Graulus*

60: Cardiac complications in trauma, *Lydia Lam, Leslie Kobayashi, and Demetrios Demetriades*

61: Cardiac emergencies in pregnancy, *Mark Johnson and Jolien Roos-Hesselink*

62: Management of pulmonary hypertension in the ICU, *Massimiliano Palazzini, Nazzareno Galiè and Alessandra Manes*

63: Acute pulmonary embolism, *Stavros Konstantinides, Marcin Kurzyna, and Adam Torbicki*

Section X - Concomitant acute conditions

64: Acute respiratory failure and acute respiratory distress syndrome, *Luciano Gattinoni, Mattia Busana and Eleonora Carlesso*

65: Acute stroke, *Didier Leys, Solène Moulin, and Valeria Caso*

66: Acute kidney injury, *Sofie A Gevaert, Eric Hoste, and John A Kellum*

67: Hyperglycaemia, diabetes, and other endocrine emergencies, *Jan Gunst, Yves Debaveye, and Greet Van den Berghe*

68: Bleeding and haemostasis disorders, *Pier Mannuccio Mannucci and Maddalena Lettino*

69: Anaemia and transfusion, *Pascal Vranckx, Philippe Vanderkerckhove, Roxana Mehran, and Davide Cao*

70: Infections, sepsis and multiorgan dysfunction syndrome, *Jean-Louis Vincent*

71: Pain in the Intensive Cardiovascular Care Unit, *Siân Jaggard and Helen Laycock*

72: Acute cognitive disorders and delirium in Intensive Cardiovascular Care Unit, *John McEvoy, Stephen Keane, and Kevin Clarkson*

73: Special considerations in the immunosuppressed patient, *Anne-Sophie Moreau, Raphaël Favory*

74: Perioperative cardiac care of the high-risk non-cardiac patient, *Martin Balik*

75: Perioperative cardiac care of the high-risk cardio-surgical patient, *Marco Ranucci, Serenella Castelvechio, and Andrea Ballotta*
