	Preface				xxii
	Contributors				xxiii
1	Single-Row Rotator Cuff Repair Using Graft Augmentation and Bone Marrow Aspirate Concentrate Augmentation				1
	<i>Anand Murthi and Manesha Lankachandra</i>				
1.1	Patient Positioning	1	1.4	Rehabilitation	3
1.2	Portal Placement	1	1.5	Rationale and Evidence for Approach	3
1.3	Surgical Technique	2			
2	SCOI Row Rotator Cuff Repair—A Medial Row, Tension-Free, Triple-Loaded, Crimson Duvet–Augmented Rotator Cuff Repair				6
	<i>Eric Tannenbaum, John Taylor, Stephen Snyder, and Michael Bahk</i>				
2.1	Patient Positioning	6	2.3	Surgical Technique	8
2.2	Portal Placement	7	2.4	Surgeon Tips and Tricks	10
2.2.1	Posterior Midglenoid Portal (PMGP)	7	2.5	Pitfalls/Complications	11
2.2.2	Anterior Midglenoid Portal (AMGP)	7	2.6	Rehabilitation	11
2.2.3	Midlateral Subacromial Portal (MLSP)	8	2.7	Rationale and/or Evidence for Approach	12
3	Single-Row Undersurface All-Inside Rotator Cuff Repair				14
	<i>Ashleigh Elkins and George A.C. Murrell</i>				
3.1	Patients Selected for Surgery ..	14	3.8	Arthroscopic Suturing	17
3.2	Patient Positioning	14	3.9	Preparing and Deploying Suture Anchors	17
3.3	Patient Preparation	14	3.10	Closing	17
3.4	Posterior Portal Placement ...	14	3.11	Rehabilitation	18
3.5	Initial Diagnostic Shoulder Arthroscopy	15	3.12	Six-Month Review	18
3.6	Creation of the Lateral Portal .	15	3.13	Rationale for the Technique ..	18
3.7	Preparation of the Tendon and Landing Site	15	3.14	Advantages of the Technique	20

Contents

3.15	Disadvantages	21	3.16	Conclusion	21
4	Double-Row Repair with Biceps Tendon Augmentation				23
	<i>Jeffrey S. Abrams and Tertuliano Vieira</i>				
4.1	Examination under Anesthesia	23	4.6	Avoid Pitfalls and Complications	28
4.2	Positioning	23	4.7	Rehabilitation	28
4.3	Portal Placement	23	4.8	Rationale and Benefits	28
4.4	Surgical Technique	23			
4.5	Surgical Benefits	26			
5	Double Row with “Rip-Stop” Rotator Cuff Repair				30
	<i>Mark R. Wilson, Eric D. Field, and Larry D. Field</i>				
5.1	Patient Positioning	30	5.5	Pitfalls/Complications	34
5.2	Portal Placement	30	5.6	Rehabilitation	35
5.3	Surgical Technique	30	5.7	Rationale and/or Evidence for Approach	35
5.4	Surgeon Tips and Tricks	33			
6	SpeedBridge Repair of Massive Rotator Cuff Tears Using Provisional Traction Suture Reducing Anchor and Bioinductive Bovine Augment Patch				36
	<i>Hithem Rahmi, Sevag Bastian, and John Itamura</i>				
6.1	Positioning	36	6.3.7	Perform a Repair Using the SpeedBridge (Arthrex) with the Medial Seal Technique	40
6.1.1	Lateral Decubitus Position	36	6.3.8	Placement of Bioinductive Bovine Augment Patch	42
6.2	Portal Placement	36	6.4	Surgeon Tips and Tricks	42
6.2.1	Standard Portals	36	6.4.1	Visualization	42
6.3	Surgical Technique	37	6.4.2	Traction Stitch	43
6.3.1	Initial Portal Placement	37	6.4.3	Medial Seal	43
6.3.2	Subacromial Access/Assessment	38	6.4.4	SpeedBridge Preparation	43
6.3.3	Preparation of the Rotator Cuff Footprint	38	6.4.5	Dog-Ear	44
6.3.4	Perform Soft Tissue Releases	38	6.4.6	Patch Augment	44
6.3.5	Traction Sutures	38	6.5	Pitfalls/Complications	44
6.3.6	Placement of Provisional Traction Suture Reducing Anchor	39	6.5.1	Medial Seal Failure	44
			6.5.2	Failure of Repair	44

6.6	Rehabilitation	44	6.7	Rationale and/or Evidence for Approach.	45
7	Two-Anchor, Double-Row Rotator Cuff Repair with Incorporated Biceps Tenodesis				46
	<i>Michael J. O'Brien and Felix H. Savoie</i>				
7.1	Patient Positioning	46	7.4	Surgeon Tips and Tricks (Use of Specific Instrumentation)	50
7.2	Portal Placement	46	7.5	Pitfalls/Complications	51
7.3	Surgical Technique (Step-by-Step Approach).	47	7.6	Rehabilitation	51
7.3.1	Posterior Viewing Portal	47	7.7	Rationale and/or Evidence for Approach.	51
7.3.2	Lateral Viewing Portal	47			
7.3.3	Repair	48			
8	Arthroscopic Transosseous Equivalent Rotator Cuff Repair: Key Points of Surgical Technique				53
	<i>Thomas "Quin" Throckmorton</i>				
8.1	Operative Technique: Patient positioning	53	8.5	Pitfalls and Complications	56
8.2	Portal Placement	54	8.6	Rehabilitation	56
8.3	Surgical Technique	54	8.7	Literature Review	57
8.4	Surgeon Tips and Tricks	56			
9	Arthroscopic Double-Row Transosseous Equivalent Repair of Large Rotator Cuff Tears				58
	<i>Ajay S. Padaki, Daniel J. Song, Pinkawas Kongmalai, and William N. Levine</i>				
9.1	Patient Positioning	58	9.3.2	Subacromial Space	59
9.1.1	Standard Supine Beach Chair Positioning	58	9.4	Surgeon Tips and Tricks (Use of Specific Instrumentation)	60
9.2	Portal Placement	58	9.5	Pitfalls/Complications	60
9.2.1	Posterior	58	9.6	Rehabilitation	61
9.2.2	Anterior.	59	9.7	Rationale and/or Evidence for Approach.	61
9.2.3	Lateral.	59	9.7.1	Repair Technique	61
9.3	Surgical Technique (Step-by-Step Approach).	59	9.7.2	Postoperative Therapy	61
9.3.1	Diagnostic Arthroscopy from the Posterior Portal	59			

Contents

10	Arthroscopic Rotator Cuff Repair Using a Suture-Bridge Technique and Associated Open Subpectoral Biceps Tenodesis	63		
	<i>Catherine M. Rapp, Alexander Vara, Brett P. Wiater, and J. Michael Wiater</i>			
10.1	Patient Positioning	63	10.4	Surgeon Tips and Tricks
10.2	Portal and Incision Placement	65	10.5	Pitfalls/Complications
10.3	Surgical Technique Step-by-Step	66	10.6	Rehabilitation
			10.7	Rationale
11	Transosseous Repair	76		
	<i>J. Gabriel Horneff and Mark D. Lazarus</i>			
11.1	Patient Positioning	76	11.5	Pitfalls/Complications
11.2	Portal Placement	76	11.6	Rehabilitation
11.3	Surgical Technique (Step-by-Step Approach)	77	11.7	Rationale and/or Evidence for Approach
11.4	Surgeon Tips and Tricks	79		
12	True Transosseous Hybrid Rotator Cuff Repair	82		
	<i>Brett Sanders</i>			
12.1	Patient Positioning	82	12.4	Surgeon Tips and Tricks (Use of Specific Instrumentation)
12.2	Portal Placement	82	12.5	Pitfalls/Complications
12.3	Surgical Technique (Hybrid Cuff Repair)	83	12.6	Rationale and/or Evidence for Approach
13	All-Arthroscopic Anchorless Transosseous Rotator Cuff Repair	88		
	<i>Aydin Budeyri, Raffaele Garofalo, and Sumant "Butch" Krishnan</i>			
13.1	Case and Scope	88		
14	Fully Arthroscopic Transosseous Rotator Cuff Repair: A Reverse-Guided Technique	90		
	<i>Jean Kany</i>			
14.1	Patient Positioning and Portals	90	14.4	Pitfalls/Complications
14.2	Surgical Technique	91	14.4.1	Rehabilitation
14.2.1	Debride and Prepare the Footprint	91	14.4.2	Rationale and/or Evidence for Approach
14.2.2	Deploy the Instrument	92	14.5	Conclusion
14.3	Surgeon Tips and Tricks	93		

15	Double-Row Subscapularis Repair for Full-Thickness Subscapularis Tears	96		
	<i>Grant Garcia, Hailey Casebolt, and Anthony Romeo</i>			
15.1	Patient Positioning	96	15.4	Surgeon Tips and Tricks 105
15.2	Portal Placement	97	15.4.1	Tips 105
15.2.1	Portal Placement Technique	98	15.4.2	Instruments 105
			15.4.3	Knots 106
15.3	Surgical Technique (Step-by-Step Approach)	98	15.5	Pitfalls/Complications 106
15.3.1	Steps	98	15.6	Rehabilitation 106
15.3.2	Tips	101	15.7	Rationale and/or Evidence for Approach 106
15.3.3	Inferior Medial Anchor Placement	101	15.8	Conclusion 108
15.3.4	Superior Medial Suture Placement	102		
16	Arthroscopic Single-Row Subscapularis Tendon Repair	109		
	<i>Howard D. Routman and Jack E. Kazanjian</i>			
16.1	Patient Positioning	109	16.4	Post-Op Rehabilitation 112
16.2	Surgical Technique	109	16.5	Rationale and Evidence 112
16.3	Surgeon Tips and Tricks	112		
17	Arthroscopic Single Row Subscapularis Repair	114		
	<i>Michael Bender and Hussein Elkousy</i>			
17.1	Patient Positioning	114	17.4	Surgeon Tips and Tricks 132
17.2	Portal Placement	115	17.5	Pitfalls and Complications 139
17.3	Surgical Technique	117	17.5.1	Missed Tears 139
17.3.1	Diagnostic Arthroscopy	117	17.5.2	Complete and Retracted Tears 140
17.3.2	Subacromial Assessment and Decompression	120	17.5.3	Re-Tear 142
17.3.3	Biceps Management	122	17.5.4	Infection 143
17.3.4	Anterior Bursectomy and Tear Mobilization	125	17.6	Rehabilitation 144
17.3.5	Tuberosity Preparation and Anchor Placement	127	17.7	Rationale and Evidence for Approach 144
17.3.6	Suture Passage and Tendon Repair	129		

Contents

18	Arthroscopic Repair of Subscapularis Tear Based on the Tear Types	146		
	<i>Chris Hyunchul Jo and Jeong Yong Yoon</i>			
18.1	Patient Positioning	146	18.3.5	Isolated Subscapularis Tendon Tear
18.2	Portal Placement	146	18.3.6	Biological Augmentation with Platelet-Rich Plasma (PRP) and Multiple Channeling
18.3	Surgical Technique (Step-by-Step Approach)	147	18.4	Surgeon Tips and Tricks (Use of Specific Instrumentation)
18.3.1	Partial Tear in the Leading Edge	147	18.5	Pitfalls/Complications
18.3.2	Articular-Sided Tear	147	18.6	Rehabilitation
18.3.3	Concealed Bursal-Sided Tear	147		
18.3.4	Subscapularis Tendon Tear with Supraspinatus Tendon Tear	147		
19	Arthroscopic Transtendon Double-Row Subscapularis Repair with all Suture Medial Row Anchors	151		
	<i>Robert A. Duerr, Tyler J. Hunt, and Laurence D. Higgins</i>			
19.1	Patient Positioning	151	19.5	Pitfalls and Complications
19.2	Portal Placement	151	19.6	Rehabilitation
19.3	Surgical Technique (Step-by-Step Approach)	151	19.7	Rationale and Evidence for Approach
19.4	Surgeon Tips and Tricks (Use of Specific Instrumentation)	152		
20	Four-Anchor Repair of Massive Subscapularis Tear with Subcoracoid Decompression	156		
	<i>Colin P. Murphy, Colin M. Robbins, Connor G. Ziegler, Anthony Sanchez, and Matthew T. Provencher</i>			
20.1	Patient Positioning	156	20.5	Pitfalls/Complications
20.2	Portal Placement	156	20.6	Rehabilitation
20.3	Surgical Technique	156	20.7	Rationale and/or Evidence for Approach
20.4	Surgeon Tips and Tricks	159		
21	Superior Capsular Reconstruction with Fascia Lata Autograft	163		
	<i>Teruhisa Mihata</i>			
21.1	Patient Positioning	163	21.3	Surgical Technique
21.2	Portal Placement	163	21.3.1	Measurement of Defect Size
			21.3.2	Deciding on Graft Size

21.3.3	Harvesting the Fascia Lata and Making the Autograft	165	21.3.10	Side-to-Side Suturing between the Graft and the Infraspinatus Tendon or Teres Minor	169
21.3.4	Treatment of Associated Lesions	165	21.4	Surgeon Tips and Tricks.	169
21.3.5	Acromioplasty	165	21.5	Pitfalls/Complications.	170
21.3.6	Anchor Placement on the Superior Glenoid	165	21.6	Rehabilitation	170
21.3.7	Anchor Placement on the Medial Footprint	167	21.7	Rationale and Evidence for Fascia Lata SCR.	170
21.3.8	Insertion of Fascia Lata into the Subacromial Space	167			
21.3.9	Attachment to the Greater Tuberosity	168			
22	Superior Capsular Reconstruction with Allograft	174			
	<i>David M. Dines, Michael C. Fu, and Joshua S. Dines</i>				
22.1	Patient Positioning	174	22.5	Pitfalls/Complications.	176
22.2	Portal Placement	174	22.6	Rehabilitation	176
22.3	Surgical Technique	174	22.7	Rationale and/or Evidence for Approach.	177
22.4	Surgeon Tips and Tricks.	176			
23	Superior Capsular Reconstruction with Porcine Xenograft	178			
	<i>Ruth A. Delaney and Daniel B.L. Garcia</i>				
23.1	Patient Positioning	178	23.5.2	Phase 2	186
23.2	Portal Placement	178	23.5.3	Phase 3	186
23.3	Surgical Technique	178	23.5.4	Phase 4	186
23.3.1	Key Steps	179	23.6	Rationale and Evidence	186
23.3.2	Tips and Tricks	183	23.6.1	Outcomes—Unpublished Data.	186
23.4	Pitfalls, Complications	184	23.6.2	SCR Data	187
23.5	Rehabilitation	185	23.6.3	DX Matrix Graft	187
23.5.1	Phase 1	185	23.6.4	Evidence Supporting our Rehabilitation Protocol	187
24	All-Arthroscopic Superior Capsular Reconstruction with Dermal Allograft	188			
	<i>Sriram Sankaranarayanan, Frances Cuomo, and Konrad I. Gruson</i>				
24.1	Patient Positioning	188	24.5	Rehabilitation	190
24.2	Portal Placement	188	24.6	Rationale and Evidence for Approach.	190
24.3	Surgical Technique	188			
24.4	Surgeon Tips and Tricks.	190			

Contents

25	Subpectoral Biceps Tenodesis	193
