

## **SECTION I: FUNDAMENTALS**

1. Anatomy of Facial Skin and Scalp
2. Skin Flap Physiology
3. Biomechanics of Skin Flaps
4. Wound Closure Techniques
5. Preparation of the Patient
6. Flap Classification and Design
7. Rotation Flaps
8. Transposition Flaps
9. Advancement Flaps
10. Bilobe Flaps
11. Rhombic Flaps
12. Melolabial Flaps
13. Paramedian Forehead Flaps
14. Z: Plasty
15. Skin and Composite Grafts
16. The Use of Skin Grafts with Local Flaps

## **SECTION II: RECONSTRUCTION OF FACIAL STRUCTURES**

17. Reconstruction of the Eyelids
18. Reconstruction of the Nose
19. Reconstruction of the Lips
20. Reconstruction of the Cheek
21. Reconstruction of the Forehead
22. Reconstruction of the Auricle
23. Reconstruction of Congenital Auricular Malformations
24. Reconstruction of the Scalp

## **SECTION III: ADJUNCTIVE SURGERY**

25. Controlled Tissue Expansion In Facial Reconstruction
26. Complications of Local Flaps

27. Scar Revision of Local Flap Refinement

28. Management of Vascular Abnormalities of the Face
