

Volume 1

Overview

1. General Principles of Molecular Imaging

Brian D. Ross and Sanjiv Sam Gambhir

Part I: Molecular Imaging Technologies

2. Positron Emission Tomography and Magnetic Resonance Imaging

Farshad Moradi, Ryan L. Brunsing, Vipul R. Sheth and Andrei Iagaru

3. SPECT and SPECT/CT

Brian F. Hutton, Marlies C. Goorden and Freek J. Beekman

4. Principles of Micro X-ray Computed Tomography

Cristian T. Badea

5. Small-Animal SPECT, SPECT/CT, and SPECT/MRI

Ling-Jian Meng and Neal H. Clinthorne

6. Instrumentation and Methods to Combine Small-Animal PET With Other Imaging Modalities

Andrew N. Groll and Craig S. Levin

7. Functional Imaging Using Bioluminescent Reporter Genes in Living Subjects

Scott K. Lyons, Kevin P. Francis and Christopher H. Contag

8. Principles and Practice of Intraoperative Fluorescence Imaging

Dimitris Gorpas, Vasilis Ntziachristos and Jie Tian

9. Molecular Endoscopic Imaging in Cancer

Timo Rath, Markus F. Neurath and Raja Atreya

10. Intravital Microscopy

Shariq M. Usmani and Thorsten R. Mempel

11. Ultrasound

F. Stuart Foster and Emmanuel Cherin

12. Hybrid PET-CT-Ultrasound Imaging

Bertrand Tavitian and Maily Perez-Liva

13. Photoacoustic Molecular Imaging: Principles and Practice

Junjie Yao and Lihong V. Wang

14. Inhaled Gas Magnetic Resonance Imaging: Advances, Applications, Limitations, and New Frontiers

Alexander M. Matheson, Caleb Thompson and Grace Parraga

15. Magnetic Particle Imaging for Vascular, Cellular and Molecular Imaging

Prashant Chandrasekharan, Zhi Wei Tay, Xinyi Y. Zhou, Elaine Y. Yu, Barry K.L. Fung, Caylin Colson, Benjamin D. Fellows, Yao Lu, Quincy Huynh, Chinmoy Saayujya, Paul Keselman, Daniel Hensley, Kuan Lu, Ryan Orendorff, Justin Konkole, Emine Ulku Saritas, Bo Zheng, Patrick Goodwill and Steven Conolly

16. Optogenetics

Maria G. Paez Segala and Loren L. Looger

17. Imaging Mass Spectrometry

Richard R. Drake, Danielle A. Scott and Peggi M. Angel

18. CEST (Chemical Exchange Saturation Transfer) MR Molecular Imaging

Guanshu Liu and Peter C.M. van Zijl

19. Molecular Imaging Using Raman Scattering

Stefan Harmsen and Sanjiv Sam Gambhir

20. Synchrotron-Based Dynamic Lung Imaging

Stephen Dubsky

21. Light-Sheet Fluorescence Microscopy for Multiscale Biological Imaging

Jae-Byum Chang, Ruixuan Gao and Fei Chen

22. Cerenkov Imaging

Edwin C. Pratt, Ryo Tamura and Jan Grimm

23. Near-Infrared II Optical Imaging

Shuqing He and Zhen Cheng

Part II: Chemistry of Molecular Imaging

24. Chemistry of Molecular Imaging: An Overview

Silvio Aime, Fabio Travaglini, Enzo Terreno and Giovanni B. Giovenzana

25. PET Radiochemistry

Henry F. VanBrocklin

26. SPECT Radiochemistry

Theodosia Maina and Mathew Thakur

27. The Chemistry in Surface Functionalization of Nanoparticles for Molecular Imaging 493

Xianchuang Zheng, Joanna Wang and Jianghong Rao

28. Newer Bioconjugation Methods

Ahmet Krasniqi, Catarina Xavier and Nick Devoogdt

29. Targeted Antibodies and Peptides

Michael R. Lewis, Cathy S. Cutler and Silvia S. Jurisson

30. Antibody-Based Molecular Imaging

Kathryn M. Tully, Veronica L. Nagle, Joshua A. Korsen and Jason S. Lewis

31. Hyperpolarized Magnetic Resonance With Dissolution Dynamic Nuclear Polarization: Principles and Applications

Jan H. Ardenkjaer-Larsen

32. Magnetic Resonance Imaging Agents

Cuihua Wang, Elisenda Rodriguez and John W. Chen

33. Optical Imaging Agents

Luisa Ottobri, Cristina Martelli and Giovanni Lucignani

34. Photoacoustic Molecular Imaging With Exogenous Agents

Liming Nie, Yajing Liu and Xiaoguan Chen

35. Ultrasound Contrast Agents

Mark A. Borden, Paul A. Dayton, Connor Slagle and Rachel W. Walmer

36. Theranostics: Agents for Diagnosis and Therapy

Fay Nicolson and Moritz F. Kircher

37. Magnetic Nanoparticles

Ahmad Amirshaghghi, Zhiliang Cheng, Lee Josephson and Andrew Tsourkas

38. Aptamers for Molecular Imaging

Frédéric Duconge

39. Nonclinical Product Developmental Strategies, Safety Considerations and Toxicity Profiles of Medical Imaging and Radiopharmaceuticals Products

Adebayo Laniyonu, Yanli Ouyang, Jonathan Cohen, Sunny Awe, Olayinka Dina, Siham Biade, Sally Hargus and Tushar Kokate

40. Intraoperative Molecular Imaging Agents

Stan van Keulen and Eben L. Rosenthal

Volume 2

Part III: Molecular Imaging in Cell and Molecular Biology

41. Protein Engineering for Molecular Imaging

Anna M. Wu

42. Phage Display for Imaging Agent Development

Jessica Hung, Fred Reynolds and Kimberly A. Kelly

43. Molecular Imaging of Gene Therapy

Ramasamy Paulmurugan and Tarik F. Massoud

44. Cell Surveillance Using Magnetic Resonance Imaging

Brooke M. Helfer and Jeff W.M. Bulte

45. Tumor Vasculature

Susan Notohamiprodjo, Zohreh Varasteh, Ambros J. Beer, Gang Niu, Xiaoyuan (Shawn) Chen, Wolfgang Weber and Markus Schwaiger

46. Imaging Hypoxia

Hong Yuan, Gregory M. Palmer and Mark W. Dewhirst

47. Molecular Imaging of Protein-Protein Interactions and Protein Folding

Tarik F. Massoud and Ramasamy Paulmurugan

48. Molecular Imaging of Cellular Signaling Pathways

Kathryn E. Luker

49. Exosome Imaging

Do Won Hwang, Minseok Suh and Dong Soo Lee

50. Gene-Editing Technologies and Applications for Molecular Imaging

Gary D. Luker

51. Reporter Genes for Ultrasound and MRI

Mikhail G. Shapiro

52. Theranostic Approaches Using Live Bacteria

Jung-Joon Min, Mai Thi-Quynh Duong, Thangam Ramar, Sung-Hwan You and Sae-Ryung Kang

Part IV: Applications of Molecular Imaging Oncology

53. Molecular and Functional Imaging and Theranostics of the Tumor Microenvironment

Marie-France Penet, Samata Kakkad, Jesus Pacheco-Torres, Santosh Bharti, Balaji Krishnamachary and Zaver M. Bhujwala

54. Novel Magnetic Resonance Imaging and Positron Emission Tomography in the RT Planning and Assessment of Response of Malignant Gliomas

David Kamson and Christina Tsien

55. PET Diagnosis and Response Monitoring in Oncology

Richard L. Wahl and Rodney J. Hicks

56. Spectroscopic MRI for Brain Tumor Imaging

Hyunsuk Shim

57. Cancer Detection and Quantification of Treatment Response Using Diffusion-Weighted MRI

Brian D. Ross and Thomas L. Chenevert

58. Prostate Cancer Theranostics

Steven P. Rowe, Mohammad S. Sadaghiani, Rudolf A. Werner, Takahiro Higuchi, Thorsten Derlin, Lilja B.

Solnes and Martin G. Pomper

59. Pediatric Molecular Imaging

Heike E. Daldrup-Link

Cardiovascular

60. Imaging Myocardial Metabolism

Robert J. Gropler

61. Congestive Heart Failure

Stephan G. Nekolla, Antti Saraste, Hendrik Sager, Marcus R. Makowski and Markus Schwaiger

62. Molecular Imaging of Atherosclerosis

Eric A. Osborn, Mazen Albaghdadi, Peter Libby and Farouc A. Jaffer

63. Thrombosis and Embolism

Reza Hajhosseiny, Claudia Prieto, Haikun Qi, Alkystis Phinikaridou and Rene' M. Botnar

64. Molecular Imaging of Stem Cell Therapy in Ischemic Cardiomyopathy

Mark Chandy and Joseph C. Wu

Central Nervous System

65. Central Nervous System Molecular Imaging

Lilja B. Solnes, Andreas H. Jacobs, Jennifer M. Coughlin, Yong Du, Reema Goel, Dima A. Hammoud and Martin G. Pomper

66. Applications, Advances, and Limitations of Molecular Imaging of Brain Receptors

Paul Cumming, Gerhard Gru'nder, Zabecca Brinson and Dean F. Wong

67. PET and SPECT Imaging of Neurodegenerative Diseases

Alexander Drzezga, Ge'rrard N. Bischof, Kathrin Giehl and Thilo van Eimeren

68. PET Imaging of Neuroinflammation

Aisling M. Chaney, Emily M. Deal, Isaac M. Jackson and Michelle L. James

Autoimmunity and Immunology

69. Identifying Musculoskeletal Pain Generators Using Molecular Imaging

Daehyun Yoon, Feliks Kogan, Garry Gold and Sandip Biswal

70. Molecular Imaging of Autoimmune Diseases

Alberto Signore, Arianna Di Paolo and Filippo Galli

71. Molecular Imaging of Diabetes

Lieke Joosten, Marti Boss, Tom Jansen, Maarten Brom, Mijke Buitinga, Erik Aarntzen, Olof Eriksson, Lars Johansson, Bastiaan de Galan and Martin Gotthardt

72. Imaging in Asthma

Avanti Gulhane and Delphine L. Chen

73. Molecular Imaging of Fibrosis

Iris Y. Zhou, Sydney B. Montesi, Eman A. Akam and Peter Caravan

74. Imaging of Bacterial Infections

Alvaro A. Ordo'nez and Sanjay K. Jain

Part V: Molecular Imaging in Drug Evaluation

75. Molecular and Functional Imaging in Central Nervous System Drug Development

Basil Ku'nnেকে, Michael Honer, Gennaro Pagano and Markus Rudin

76. PET Imaging in Cancer Clinical Trials

David A. Mankoff

77. Magnetic Resonance Imaging: Cardiovascular Applications for Clinical Trials

Chun Yuan, Zach Miller and Xue-Qiao Zhao

78. Imaging of Gene and Cell-Based Therapies: Basis and Clinical Trials

Andreas H. Jacobs, Sonja Schelhaas, Thomas Viel, Yannic Waerzeggers, Alexandra Winkeler, Bastian Zinnhardt and Juri Gelovani

Part VI: Image Quantitation/Analytics

79. Virtual and Augmented Reality Technologies in Molecular and Anatomical Imaging

Suman B. Mondal and Samuel Achilefu

80. Quantification of Radiotracer Uptake Into Tissue

Michael M. Graham

81. Pharmacokinetic Modeling

Sung-Cheng (Henry) Huang

82. Online Social Media: Concepts and Practices for Molecular Imaging Professionals

Chadwick L. Wright, Michelle I. Knopp and Michael V. Knopp

83. The Regulatory Process for Imaging Agents and Devices

Matthew F. Covington, Sally W. Schwarz and John M. Hoffman

84. Operational Radiation Safety for PET-CT, SPECT-CT, and Cyclotron Facilities

Pat Zanzonico

85. Bridging Spatial Scales From Radiographic Images to Cellular and Molecular Properties in Cancers

Natarajan Raghunand and Robert A. Gatenby

86. AI/Machine Learning in Medical Imaging

Maryellen L. Giger

87. Retrospective Registration in Molecular Imaging

Brian D. Ross, Thomas L. Chenevert and Charles R. Meyer

88. Image Processing Analytics: Enhancements and Segmentation

Lubomir Hadjiiski, Ravi Samala and Heang-Ping Chan

89. Magnetic Resonance Fingerprinting: Basic Concepts and Applications in Molecular Imaging

Kathleen Ropella-Panagis and Nicole Seiberlich

90. MR Elastography

Patrick J. Navin, Sudhakar Kundapur Venkatesh and Richard L. Ehman
