Introduction to endodontic retreatment 1

Sanjay Miglani, Fugen Dagli Comert, Swadheena Patro, and Viresh Chopra

- 1 Clinical Case 1 – Perforation repair: A case of repair of pulpal floor perforation caused by excessive cutting of the floor of the pulp chamber** 5

Mohammad Hammo

- 2 Clinical Case 2 – Instrument separation: A case of surgical removal of a fractured instrument** 10

Abhinay Agarwal

- 3 Clinical Case 3 – A case of retreatment of Tooth 16: Bypass of ledges and broken instrument** 17

Garima Poddar

- 4 Clinical Case 4 – Instrument retrieval: A case of fractured instrument at the apical third of the mandibular molar** 23

Jojo Kottoor

- 5 Clinical Case 5 – Perforation repair with instrument retrieval: Management of multiple endodontic mishaps** 32

Padmanabh Jha

- 6 Clinical Case 6 – Management of strip perforation and fractured instrument** 38

Zaher Al Taqi

- 7 Clinical Case 7 – Management of root canal treatment failure case with missed lateral canal anatomy and inadequate obturation** 45

Antonis Chaniotis

- 8 Clinical Case 8 – Management of a case with faulty cast post and asymptomatic lateral periodontitis 51**
Antonis Chaniotis
- 9 Clinical Case 9 – Management of a case with endo-perio lesion following a previous root canal treatment 58**
Antonis Chaniotis
- 10 Clinical Case 10 – Management of a failed root canal treatment with silver cone obturation and fractured instrument 64**
Antonis Chaniotis
- 11 Clinical Case 11 – Management of a failed root canal treated maxillary molar with selective root treatment 69**
Gergely Benyőcs
- 12 Clinical Case 12 – Guided endodontics and its application for non-surgical retreatments: Retreatment of a maxillary anterior tooth using static guidance 79**
Gergely Benyőcs
- 13 Clinical Case 13 – Management of pulpal floor perforation with periapical lesion in the mesial root 99**
Zaher Al Taqi
- 14 Clinical Case 14 – Management of root canal treatment failure with missed canal anatomy and inadequate obturation 108**
Eugen Buga
- 15 Clinical Case 15 – Management of root canal treatment failure with inadequate obturation, hidden fractured instrument and ledge formation in a severely curved mandibular molar 114**
Eugen Buga
- 16 Clinical Case 16 – Management of root canal treatment with an instrument fracture in a mandibular molar 121**
Viresh Chopra
- 17 Clinical Case 17 – Management of a mandibular molar with fractured instrument extending in the periapical area 128**
Zaher Al Taqi
- 18 Clinical Case 18 – Management of root canal treatment failure with inadequate obturation and apically calcified canals 134**
Viresh Chopra

- 19 Clinical Case 19 – Management of root canal treatment failure with inadequate obturation and missed canals 140**
Viresh Chopra
- 20 Clinical Case 20 – Management of root canal treatment failure with inadequate obturation, unusual distal root anatomy and suspected ledge formation in a mandibular molar 147**
Eugen Buga
- 21 Clinical Case 21 – Management of root canal treatment failure with inadequate obturation and faulty post placement 154**
Viresh Chopra
- 22 Clinical Case 22 – Management of root canal treatment failure with inadequate obturation, multiple perforations, fractured instrument and ledge formation in maxillary right first molar 161**
Viresh Chopra
- 23 Clinical Case 23 – Management of root canal treatment failure with inadequate obturation, fractured instrument and periapical lesion in mandibular left first molar 172**
Viresh Chopra
- 24 Clinical Case 24 – Retreatment of Tooth 21 180**
Garima Poddar
- 25 Nonsurgical versus surgical retreatment: Decision making 187**
Meetu Ralli Kohli and Bekir Karabucak
- Index 201**
