Foreword	<i>xvii</i>
Preface	<i>xix</i>
Acknowledgements	<i>xxi</i>
About the Companion Website	<i>xxiii</i>
Nomenclature Used in The Study of Human Disease	<i>xxv</i>
Standard Abbreviations for Prescribers	<i>xxviii</i>

Part I Pathology of Teeth and Supporting Structures 1

1	Disorders of Tooth Development and Eruption	3
1.1	Anodontia, Hypodontia and Oligodontia	3
1.2	Hyperdontia (Supernumerary Teeth)	5
1.3	Microdontia and Macrodontia	6
1.4	Gemination, Fusion and Concrescence	7
1.5	Taurodontism and Dilaceration	9
1.6	Amelogenesis Imperfecta	11
1.7	Dentinogenesis Imperfecta	13
1.8	Dentinal Dysplasia (Dentin Dysplasia)	14
1.9	Regional Odontodysplasia (Ghost Teeth)	16
1.10	Delayed Tooth Eruption	17
1.11	Tooth Impaction (Impacted Teeth)	18
1.12	Dens Invaginatus and Dens Evaginatus	20
1.13	Fluorosis (Mottled Enamel)	22
1.14	Tetracycline-Induced Discoloration of Teeth: Key Features	24
1.15	Enamel Pearl: Key Features	24
1.16	Talon Cusp: Key Features	25
1.17	Hutchinson's Incisors and Mulberry Molars: Key Features	26
1.18	Tooth Ankylosis: Key Features	26
1.19	Supernumerary Roots: Key Features	27
2	Dental caries	29
2.1	Definition/Description	29
2.2	Frequency	29

- 2.3 Aetiology/Risk Factors/Pathogenesis 29
- 2.4 Classification of Caries 30
- 2.5 Clinical Features 30
- 2.6 Differential Diagnosis 33
- 2.7 Diagnosis 33
- 2.8 Microscopic Features 33
- 2.9 Management 35
- 2.10 Prevention 36

- 3 Diseases of the Pulp and Apical Periodontal Tissues 37**
- 3.1 Classification of Diseases of the Pulp and Apical Periodontal Tissues 37
- 3.2 Pulpitis 38
- 3.3 Apical Periodontitis and Periapical Granuloma 40
- 3.4 Apical Abscess (Dentoalveolar Abscess) 43
- 3.5 Condensing Osteitis 44

- 4 Tooth Wear, Pathological Resorption of Teeth, Hypercementosis and Cracked Tooth Syndrome 47**
- 4.1 Tooth wear: Attrition, Abrasion, Erosion, and Abfraction 47
- 4.2 Pathological Resorption of Teeth 50
- 4.3 Hypercementosis 52
- 4.4 Cracked Tooth Syndrome 53

- 5 Gingival and Periodontal Diseases 57**
- 5.1 Classification of Gingival and Periodontal Diseases 58
- 5.2 Chronic Gingivitis 58
- 5.3 Necrotizing Periodontal Diseases 60
- 5.4 Plasma Cell Gingivitis 63
- 5.5 Foreign Body Gingivitis 64
- 5.6 Desquamative Gingivitis 65
- 5.7 Chronic Periodontitis 67
- 5.8 Aggressive Periodontitis 70
- 5.9 Fibrous Epulis (Peripheral Fibroma) 73
- 5.10 Peripheral Ossifying/Cementifying Fibroma 74
- 5.11 Peripheral Giant Cell Granuloma (Giant Cell Epulis) 76
- 5.12 Angiogramuloma (Pyogenic granuloma/pregnancy epulis) 77
- 5.13 Inflammatory Gingival Hyperplasia (Inflammatory Gingival Enlargement) 79
- 5.14 Generalized Gingival Hyperplasia in Pregnancy 81
- 5.15 Drug-Induced Gingival Hyperplasia 82
- 5.16 Familial Gingival Hyperplasia 84
- 5.17 Gingival and Periodontal Abscesses 86
- 5.18 Pericoronitis/Pericoronal Abscess 89
- 5.19 Gingival Enlargement in Granulomatosis with Polyangiitis (Wegener's granulomatosis) 91
- 5.20 Gingival Enlargement in Leukaemia 93
- 5.21 Gingival Enlargement in Ascorbic Acid Deficiency 95

Part II Pathology of Jaw Bones 99**6 Infections and Necrosis of the Jaw 101**

- 6.1 Acute Suppurative Osteomyelitis 101
- 6.2 Chronic Suppurative Osteomyelitis 104
- 6.3 Sclerosing Osteomyelitis 106
- 6.4 Proliferative Periostitis (Garre's Osteomyelitis) 108
- 6.5 Actinomycosis of the Jaw 109
- 6.6 Cervicofacial Cellulitis (Cervicofacial Fascial Space Infection) 111
- 6.7 Osteoradionecrosis of the Jaw 112
- 6.8 Medication-Related Osteonecrosis of the Jaw 114

7 Cysts of the Jaw 117

- 7.1 Radicular, Lateral Radicular, and Residual Radicular Cysts 117
- 7.2 Dentigerous Cyst 120
- 7.3 Eruption Cyst 122
- 7.4 Odontogenic Keratocyst (Keratocystic Odontogenic Tumour) 123
- 7.5 Lateral Periodontal Cyst 126
- 7.6 Calcifying Odontogenic Cyst 127
- 7.7 Orthokeratinized Odontogenic Cyst: Key Features 130
- 7.8 Glandular Odontogenic Cyst: Key Features 130
- 7.9 Nasopalatine Duct Cyst (Incisive Canal Cyst) 130
- 7.10 Pseudocysts of the Jaw: Solitary Bone Cyst, Aneurysmal Bone Cyst and Stafne's bone Cyst 132
- 7.11 Nasolabial Cyst: Key Features 135

8 Odontogenic Tumours 137

- 8.1 World Health Organization Classification of Odontogenic Tumours (2017) 137
- 8.2 Ameloblastoma 138
- 8.3 Unicystic Ameloblastoma 141
- 8.4 Squamous Odontogenic Tumour 144
- 8.5 Calcifying Epithelial Odontogenic Tumour (Pindborg Tumour) 145
- 8.6 Adenomatoid Odontogenic Tumour 147
- 8.7 Ameloblastic Fibroma 149
- 8.8 Ameloblastic Fibrodentinoma and Ameloblastic Fibro-Odontome 151
- 8.9 Odontome (Odontoma) 153
- 8.10 Dentinogenic Ghost Cell Tumour 155
- 8.11 Odontogenic Myxoma 157
- 8.12 Odontogenic Fibroma (Central Odontogenic Fibroma) 159
- 8.13 Cementoblastoma 161

9 Non-odontogenic Benign and Malignant Tumours of the Jaw 165

- 9.1 Osteoma 165
- 9.2 Multiple Osteomas in Gardner's Syndrome 167
- 9.3 Central Haemangioma (Intraosseous Haemangioma) 169
- 9.4 Melanotic Neuroectodermal Tumour of Infancy 171

- 9.5 Osteosarcoma 172
- 9.6 Chondrosarcoma: Key Features 174
- 9.7 Ewing's Sarcoma 175
- 9.8 Myeloma (Multiple Myeloma) 177
- 9.9 Solitary Plasmacytoma 179
- 9.10 Burkitt's Lymphoma 181

10 Fibro-Osseous and Related Lesions of the Jaw 185

- 10.1 Ossifying Fibroma/Cemento-Ossifying Fibroma 185
- 10.2 Cemento-Osseous Dysplasias 187
- 10.3 Familial Gigantiform Cementoma: Key Features 190
- 10.4 Central Giant Cell Granuloma 191

11 Genetic, Metabolic, and Other Non-neoplastic Bone Diseases 195

- 11.1 Osteogenesis Imperfecta 195
- 11.2 Cleidocranial Dysplasia 197
- 11.3 Cherubism 199
- 11.4 Gigantism and Acromegaly 201
- 11.5 Brown Tumour of Hyperparathyroidism 203
- 11.6 Paget's Disease of Bone (Osteitis Deformans) 205
- 11.7 Fibrous Dysplasia and McCune-Albright Syndrome 207
- 11.8 Mandibular and Palatine Tori: Key Features 210
- 11.9 Focal Osteoporotic Bone Marrow Defect: Key Features 210

Part III Pathology of the Oral Mucosa 213

12 Developmental Anomalies and Anatomical Variants of Oral Soft Tissues 215

- 12.1 Fordyce Granules: Key Features 215
- 12.2 Double Lip: Key Features 215
- 12.3 Leukoedema: Key Features 216
- 12.4 Ankyloglossia: Key Features 216
- 12.5 Geographic Tongue: Key Features 217
- 12.6 Hairy Tongue: Key Features 218
- 12.7 Fissured Tongue: Key Features 218
- 12.8 Lingual Thyroid: Key Features 218
- 12.9 Microglossia and Macroglossia: Key Features 219
- 12.10 Bifid Tongue: Key Features 220
- 12.11 Bifid Uvula: Key Features 220
- 12.12 Cleft Lip: Key Features 221
- 12.13 Calibre Persistent Labial Artery: Key Features 221
- 12.14 Epstein's Pearl and Bohn's Nodules: Key Features 223
- 12.15 Dermoid and Epidermoid Cysts: Key Features 223
- 12.16 Oral Varicosities: Key Features 224
- 12.17 Lymphoid Aggregates: Key Features 224
- 12.18 Parotid Papilla: Key Features 225
- 12.19 Circumvallate Papillae: Key Features 226
- 12.20 Physiological Pigmentation: Key Features 226

- 13 Bacterial Infections of the Oral Mucosa 229**
 - 13.1 Scarlet Fever: Key Features 229
 - 13.2 Syphilis 229
 - 13.3 Gonorrhoea: Key Features 232
 - 13.4 Tuberculosis 233

- 14 Fungal Infections of the Oral Mucosa 237**
 - 14.1 Candidosis (Candidiasis) 237
 - 14.2 Histoplasmosis 244
 - 14.3 Blastomycosis: Key Features 246

- 15 Viral Infections of the Oral Mucosa 247**
 - 15.1 Primary Herpetic Gingivostomatitis (Primary Herpes) 247
 - 15.2 Herpes Labialis 250
 - 15.3 Varicella (Chickenpox) 252
 - 15.4 Herpes Zoster (Shingles) 253
 - 15.5 Infectious Mononucleosis (Glandular Fever) 255
 - 15.6 Oral Hairy Leukoplakia: Key Features 257
 - 15.7 Cytomegalovirus Infection: Key Features 258
 - 15.8 Herpangina: Key Features 258
 - 15.9 Hand, Foot, and Mouth Disease 258
 - 15.10 Squamous Papilloma 260
 - 15.11 Condyloma Acuminatum: Key Features 261
 - 15.12 Multifocal Epithelial Hyperplasia: Key Features 262
 - 15.13 Verruca Vulgaris: Key Features 262
 - 15.14 Measles: Key Features 263

- 16 Non-infective Inflammatory Disorders of the Oral Mucosa 265**
 - 16.1 Recurrent Aphthous Stomatitis 265
 - 16.2 Oral Lichen Planus 269
 - 16.3 Oral Lichenoid Lesions 272
 - 16.4 Pemphigus Vulgaris 273
 - 16.5 Mucous Membrane Pemphigoid 276
 - 16.6 Erythema Multiforme 279
 - 16.7 Lupus Erythematosus: Key Features 281
 - 16.8 Traumatic Ulcer: Key Features 281
 - 16.9 Oral Lesions in Behcet's Disease/Syndrome 282
 - 16.10 Oral Lesions in Crohn's Disease 283
 - 16.11 Oral Lesions in Reactive Arthritis: Key Features 285
 - 16.12 Uremic Stomatitis: Key Features 285
 - 16.13 Chronic Ulcerative Stomatitis: Key Features 285
 - 16.14 Radiation-Induced Mucositis: Key Features 286
 - 16.15 Medication-Induced Oral Ulceration: Key Features 287
 - 16.16 Stevens–Johnson Syndrome and Toxic Epidermal Necrolysis 287

- 17 Non-neoplastic Mucosal Swellings 291**
 - 17.1 Irritation Fibroma (Traumatic Fibroma) 291
 - 17.2 Denture-Induced Granuloma (Epulis Fissuratum) 293

- 17.3 Fibrous Epulis (Peripheral Fibroma): key features 294
- 17.4 Pyogenic Granuloma: key features 295
- 17.5 Peripheral Giant Cell Granuloma: key features 295
- 17.6 Peripheral Ossifying Fibroma: key features 295
- 17.7 Traumatic Neuroma 295
- 17.8 Squamous Papilloma: Key Features 296
- 17.9 Congenital Epulis: Key Features 297

18 Benign Neoplasms of the Oral Mucosa 299

- 18.1 Lipoma 299
- 18.2 Schwannoma (Neurilemmoma) 301
- 18.3 Granular Cell Tumour 302
- 18.4 Haemangioma 304
- 18.5 Lymphangioma 306
- 18.6 Leiomyoma (Vascular Leiomyomas): Key Features 307
- 18.7 Rhabdomyoma: Key Features 307

19 Oral Potentially Malignant Disorders 309

- 19.1 Erythroplakia 309
- 19.2 Leukoplakia 311
- 19.3 Chronic Hyperplastic Candidosis (Candidal Leukoplakia) 315
- 19.4 Palatal Lesions in Reverse Smokers 317
- 19.5 Oral Lichen Planus: Key Features 319
- 19.6 Oral Submucous Fibrosis 320
- 19.7 Oral Lichenoid Lesion 322
- 19.8 Lupus Erythematosus 324
- 19.9 Actinic Keratosis of the Lip (Actinic Cheilitis) 326
- 19.10 Graft-Versus-Host Disease 328
- 19.11 Dyskeratosis Congenita 330
- 19.12 Sublingual Keratosis: Key Features 331
- 19.13 Syphilitic Leukoplakia: Key Features 332
- 19.14 Darier's Disease: Key Features 332

20 Malignant Neoplasms of the Oral Mucosa 335

- 20.1 Squamous Cell Carcinoma and Verrucous Carcinoma 335
- 20.2 Melanoma (Malignant Melanoma) 340
- 20.3 Kaposi's Sarcoma 342
- 20.4 Fibrosarcoma: Key Features 343
- 20.5 Rhabdomyosarcoma: Key Features 344
- 20.6 Leiomyosarcoma: Key Features 344

Part IV Pathology of the Salivary Glands 347

21 Non-neoplastic Salivary Gland Diseases 349

- 21.1 Salivary Calculi: Key Features 349
- 21.2 Mucoceles (Mucous Extravasation Cysts, Mucous Retention Cysts and Ranula) 350

- 21.3 Sjögren's Syndrome 352
- 21.4 Sialadenitis: Key Features 354
- 21.5 Necrotizing Sialometaplasia: Key Features 355

- 22 Salivary Gland Neoplasms 357**
- 22.1 World Health Organization Histological Classification of Salivary Gland tumours (2017) 357
- 22.2 Pleomorphic Adenoma 358
- 22.3 Warthin's Tumour (Papillary Cystadenoma Lymphomatosum) 360
- 22.4 Mucoepidermoid Carcinoma 362
- 22.5 Adenoid Cystic Carcinoma 364

Part V Clinical Presentation of Mucosal Disease 367

- 23 White Lesions of the Oral Mucosa 369**
- 23.1 Actinic Cheilitis: Key Features 369
- 23.2 Chemical Burn: Key Features 370
- 23.3 Chronic Hyperplastic Candidosis: Key Features 370
- 23.4 Darier's Disease: Key Features 371
- 23.5 Dyskeratosis Congenita: Key Features 371
- 23.6 Fordyce granules: Key Features 372
- 23.7 Frictional Keratosis: Key Features 372
- 23.8 Hereditary Benign Intraepithelial Dyskeratosis: Key Features 373
- 23.9 Leukoedema: Key Features 373
- 23.10 Leukoplakia: Key Features 373
- 23.11 Oral Hairy Leukoplakia: Key Features 374
- 23.12 Oral Lichen Planus: Key Features 374
- 23.13 Oral Squamous Cell Carcinoma: Key Features 375
- 23.14 Pseudomembranous Candidosis: Key Features 375
- 23.15 Smokeless Tobacco-Induced Keratosis: Key Features 376
- 23.16 Smoker's Keratosis: Key Features 376
- 23.17 Sublingual Keratosis: Key Features 377
- 23.18 Syphilitic Leukoplakia: Key Features 377
- 23.19 Verrucous Carcinoma: Key Features 377
- 23.20 White Hairy Tongue: Key Features 378
- 23.21 White Sponge Nevus: Key Features 378

- 24 Red and Purple Lesions of the Oral Mucosa 381**
- 24.1 Contact Stomatitis: Key Features 381
- 24.2 Desquamative Gingivitis: Key Features 382
- 24.3 Erythema Migrans: key features 382
- 24.4 Erythema Multiforme: Key Features 382
- 24.5 Erythematous Candidosis: Key Features 383
- 24.6 Erythroplakia: Key Features 383
- 24.7 Haemangioma: Key Features 384
- 24.8 Hereditary Haemorrhagic Telangiectasia: Key Features 384
- 24.9 Infectious Mononucleosis: Key Features 385

- 24.10 Kaposi's Sarcoma: Key Features 385
- 24.11 Linear Gingival Erythema: Key Features 385
- 24.12 Lupus Erythematosus: Key Features 386
- 24.13 Median Rhomboid Glossitis: Key Features 386
- 24.14 Mucosal Ecchymosis, Haematoma, and Petechiae: Key Features 386
- 24.15 Plasma Cell Gingivitis: Key Features 387
- 24.16 Port-Wine Nevus: Key Features 387
- 24.17 Radiation Mucositis: Key Features 387
- 24.18 Thermal Burn: Key Features 388

25 Blue, Black, and Brown Lesions of the Oral Mucosa 389

- 25.1 Addison's Disease: Key Features 389
- 25.2 Amalgam Tattoo: Key Features 389
- 25.3 Black/Brown Hairy Tongue: Key Features 390
- 25.4 Drug-Induced Pigmentation: Key Features 391
- 25.5 Heavy Metal Pigmentation: Key Features 392
- 25.6 Laugier–Hunziker Syndrome: Key Features 392
- 25.7 Melanoma: Key Features 393
- 25.8 Melanotic Macule: Key Features 393
- 25.9 Peutz–Jeghers Syndrome: Key Features 393
- 25.10 Physiological Pigmentation: Key Features 394
- 25.11 Mucosal Nevi: Key Features 394
- 25.12 Smoker's Melanosis: Key Features 395

26 Vesiculobullous Lesions of the Oral Mucosa 397

- 26.1 Angina Bullosa Haemorrhagica: Key Features 397
- 26.2 Bullous Lichen Planus: Key Features 397
- 26.3 Dermatitis Herpetiformis: Key Features 398
- 26.4 Erythema Multiforme: Key Features 398
- 26.5 Hand, Foot and Mouth Disease: Key Features 398
- 26.6 Herpes Zoster (Shingles): Key Features 399
- 26.7 Mucous Membrane Pemphigoid: Key Features 399
- 26.8 Pemphigus Vulgaris: Key Features 400
- 26.9 Primary Herpetic Gingivostomatitis: Key Features 400
- 26.10 Herpes Labialis: Key Features 400

27 Ulcerative Lesions of the Oral Mucosa 403

- 27.1 Oral Ulcers in Agranulocytosis: Key Features 403
- 27.2 Oral Ulcers in Behçet's Disease: Key Features 404
- 27.3 Oral Ulcers in Coeliac Disease: Key Features 404
- 27.4 Chronic Ulcerative Stomatitis: Key Features 405
- 27.5 Oral Ulcers in Crohn's Disease: Key Features 405
- 27.6 Oral Ulcers in Cyclic Neutropenia: Key Features 406
- 27.7 Cytomegalovirus Ulcers: Key Features 406
- 27.8 Eosinophilic Ulcer: Key Features 406
- 27.9 Gangrenous Stomatitis: Key Features 406
- 27.10 Necrotizing Sialometaplasia: Key Features 407

- 27.11 Necrotizing Ulcerative Gingivitis: Key Features 407
- 27.12 Oral Ulcers in Reactive Arthritis: Key Features 408
- 27.13 Recurrent Aphthous Ulcers: Key Features 408
- 27.14 Squamous Cell Carcinoma Presenting as an Ulcer: Key Features 409
- 27.15 Syphilitic Ulcers: Key Features 409
- 27.16 Traumatic Ulcer: Key Features 410
- 27.17 Tuberculous Ulcer: Key Features 410
- 27.18 Oral Ulcer in Ulcerative Colitis: Key Features 411

28 Papillary Lesions of the Oral Mucosa 413

- 28.1 Condyloma Acuminatum: Key Features 413
- 28.2 Multifocal Epithelial Hyperplasia (Heck's Disease): Key Features 413
- 28.3 Oral Proliferative Verrucous Leukoplakia: Key Features 414
- 28.4 Squamous Papilloma: Key Features 414
- 28.5 Squamous Cell Carcinoma: Key Features 414
- 28.6 Verruca Vulgaris (Oral Warts): Key Features 414
- 28.7 Verrucous Carcinoma: Key Features 415

Part VI Orofacial Pain 417

29 Orofacial Pain 419

- 29.1 Odontogenic Orofacial Pain 419
- 29.2 Neuropathic Orofacial Pain 421
- 29.3 Other Conditions with Orofacial Pain 423

Part VII Miscellaneous Topics of Clinical Relevance 427

30 Oral Manifestations of Systemic Disorders 429

- 30.1 Gastrointestinal and Liver Disorders 429
- 30.2 Cardiovascular Disease 431
- 30.3 Respiratory Disease 431
- 30.4 Kidney Diseases 432
- 30.5 Endocrine and Metabolic Disorders 434
- 30.6 Nervous System Disorders 435
- 30.7 Haematological Disorders 437
- 30.8 Immune System Disorders 439

31 Systemic Diseases Associated with Periodontal Infections 441

- 31.1 Cardiovascular Disease 441
- 31.2 Coronary Heart Disease (Atherosclerosis and Myocardial Infarction) 441
- 31.3 Stroke 442
- 31.4 Infective Endocarditis 442
- 31.5 Bacterial Pneumonia 442
- 31.6 Low Birth Weight 443
- 31.7 Diabetes Mellitus 443

32 Other Signs and Symptoms Related to the Oral Environment 445

- 32.1 Halitosis 445
- 32.2 Taste Disorders 446
- 32.3 Dry Mouth (Xerostomia) 447
- 32.4 Sialorrhea 448
- 32.5 Trismus 449
- 32.6 COVID-19 Infection 449

33 Outline of Diagnostic Steps and Procedures Employed in Oral Pathology and Oral Medicine 453

- 33.1 History 453
- 33.2 Clinical Examination 454
- 33.3 Clinical Differential Diagnosis 455
- 33.4 Diagnosis 456
