

Part I Nutrition and Biomolecules

- 1 Nutrition and Digestion
- 2 Carbohydrate Structure and Chemistry
- 3 Lipid Structure and Chemistry
- 4 Amino Acids and Proteins
- 5 Biochemical Reactions and Enzymes

Part II Membranes, Transport, and Signaling

- 6 Membranes and Transport
- 7 Cell Signaling

Part III Cellular Respiration

- 8 Principles of Cellular Respiration
- 9 Glycolysis and the Fate of Pyruvate
- 10 Tricarboxylic Acid Cycle
- 11 Oxidative Phosphorylation and Mitochondria

Part IV Metabolism

- 12 Carbohydrate Metabolism
- 13 Fatty Acid Metabolism
- 14 Cholesterol and Steroid Metabolism
- 15 Protein and Amino Acid Metabolism
- 16 Nucleotide and Heme Metabolism

Part V Genetics and Cell Cycle

- 17 DNA Replication and Repair
- 18 Transcription
- 19 Translation and Posttranslational Modifications
- 20 Cell Cycle, Apoptosis, and Cancer
- 21 Molecular Biotechniques
