

Introduction

CHAPTER 1: Clinical Cancer Genetics

CHAPTER 2: Risk assessment in the PCP office: identification of patients for referral

CHAPTER 3: Principles of Cancer Risk Assessment and Genetic Counseling

CHAPTER 4: Laboratory Methods in Cancer Genetic Testing

CHAPTER 5: Understanding tumor and genetic test results. Somatic Tumor Testing and Incidental Germline Findings

CHAPTER 6: Risk Assessment and Clinical Management– Breast Cancer

-Disease-specific Cancer Epidemiology

-Disease-specific Approach to Risk Assessment, Counseling and Testing

-Hereditary Cancer Syndromes

-Clinical Management of Patients at Increased Risk

CHAPTER 7: Risk Assessment and Clinical Management– ColonCancer, Polyposis

CHAPTER 8: Risk Assessment and Clinical Management – Colon Cancer, Non-Polyposis

CHAPTER 9: Risk Assessment and Clinical Management – Ovarian Cancer

CHAPTER 10: Risk Assessment and Clinical Management –Uterine Cancer

CHAPTER 11: Risk Assessment and Clinical Management –Pancreatic Cancer

CHAPTER 12: Risk Assessment and Clinical Management –Urinary Tract Cancer

CHAPTER 13: Risk Assessment and Clinical Management –Stomach Cancer

CHAPTER 14: Risk Assessment and Clinical Management – Endocrine Cancer

CHAPTER 15: Risk Assessment and Clinical Management – Skin Cancer

CHAPTER 16: Risk Assessment and Clinical Management – Pediatric and Other Cancers

CHAPTER 17: Psychological, Ethical, and Legal Issues inCancer Risk Assessment and Genetic Testing

CHAPTER 18: Talking to kids of cancer risk

CHAPTER 19: Future challenges and opportunities in cancer genetics
