
CONTENTS

Preface, **xi**
Acknowledgments, **xii**
About the Companion Website, **xiv**
Scientific Names, **xv**

SECTION I MAMMAL, 1

- 1. Blood and Bone Marrow Sample Collection and Preparation in Small Mammals, 3**
 - Blood Sample Collection, **3**
 - Bone Marrow Collection, **15**
 - References, **17**
- 2. Hematologic Techniques for Quantitative Assessment in Mammals, 19**
 - Erythrocyte and Plasma Parameters, **19**
 - Leukocyte Parameters, **21**
 - Platelet Parameters, **21**
 - References, **21**
- 3. Evaluation and Interpretation of the Peripheral Blood of Mammals, 23**
 - Mammalian Erythrocytes, **23**
 - Erythrocyte Response to Disease, **28**
 - Mammalian Leukocytes, **32**
 - Leukocyte Response to Disease, **34**
 - Platelets of Mammals, **40**
 - Hemogram Evaluation of Specific Species, **42**
 - References, **55**
- 4. Evaluation of Mammalian Bone Marrow, 59**
 - Mammalian Hematopoiesis, **59**
 - Mammalian Bone Marrow Responses in Disease, **66**
 - Bone Marrow Evaluation, **67**
 - References, **67**
- 5. Mammalian Hematology and Clinical Chemistry: Clinical Case Presentations, 69**
 - Case 1: Chinchilla with Dental Disease, **69**
 - Case 2: Guinea Pig with Gastric Stasis, **71**
 - Case 3: Hedgehog with Anorexia, **73**
 - Case 4: Ferret with Lethargy, Inappetence, and Labored Breathing, **75**
 - Case 5: Ferret with Lethargy and Weakness, **79**
 - References, **82**

- 6. Sample Collection for Mammalian Cytodiagnosis, 83**
 - Cytology Sampling and Evaluation Techniques, 83
 - Sample Locations, 83
 - Preparation for Cytologic Examination, 88
 - Sample Collection Techniques, 89
 - Sample Preparation and Evaluation, 94
 - References, 97
- 7. Mammalian Cytodiagnosis, 99**
 - Normal Mammalian Cytology, 99
 - Inflammation, 110
 - Hyperplasia/Benign Neoplasia, 124
 - Malignant Neoplasia, 129
 - Effusions, 153
 - Infectious Agents, 160
 - References, 168
- 8. Mammalian Cytology: Clinical Case Presentations, 175**
 - Case 1: Hedgehog with Swelling under the Right Forelimb, 175
 - Case 2: Dumbo Rat with a Mass on Its Face, 175
 - Case 3: Hedgehog with a vaginal mass, 178
 - Case 4: Sugar Glider with a Mass in the Left Axilla, 179
 - Case 5: Ferret with an Abdominal Mass, 181
 - References, 184

SECTION II AVIAN, 185

- 9. Blood and Bone Marrow Sample Collection and Preparation in Birds, 187**
 - Blood Sample Collection, 187
 - Blood Sample Handling and Preparation, 192
 - Bone Marrow Collection, 195
 - Preparation of the Bone Marrow Sample, 197
 - References, 199
- 10. Hematologic Techniques for Quantitative Assessment in Birds, 200**
 - Erythrocyte and Plasma Parameters, 200
 - Leukocyte Parameters, 204
 - Thrombocyte Parameters, 207
 - Quantitative Evaluation of Bone Marrow Aspirates, 207
 - References, 207
- 11. Evaluation and Interpretation of Peripheral Blood of Birds, 209**
 - Avian Erythrocytes, 209
 - Factors Affecting the Avian Erythrogram, 214
 - Erythrocyte Response to Disease, 216
 - Avian Leukocytes, 220
 - Normal Variation to the Leukogram of Birds, 228
 - Leukocyte Response to Disease, 228
 - Avian Thrombocytes, 235
 - Avian Blood Parasites, 237
 - Bacteremia, 244
 - References, 244
- 12. Evaluation of Avian Bone Marrow, 253**
 - Avian Hematopoiesis, 253
 - Avian Hematopoietic Tissue other than Bone Marrow, 259
 - References, 260

- 13. Avian Hematology and Clinical Chemistry: Clinical Case Presentations, 262**
 - Case 1: Cockatoo with Lethargy and Anorexia, **262**
 - Case 2: Swainson's Hawk with Head Trauma, **265**
 - Case 3: Pionus Parrot with Weight Loss, Exercise Intolerance, and Sneezing, **269**
 - Case 4: Conure with Lethargy and Anorexia, **273**
 - Case 5: Hawk with Dehydration and Emaciation, **274**
 - References, **278**
- 14. Sample Collection for Avian Cytodiagnosis, 279**
 - References, **286**
- 15. Avian Cytodiagnosis, 288**
 - Normal Avian Cytology, **288**
 - Inflammation, **298**
 - Hyperplasia/Benign neoplasia, **315**
 - Malignant Neoplasia, **319**
 - Effusions, **332**
 - Infectious Agents, **338**
 - References, **354**
- 16. Avian Cytology and Clinical Chemistry: Clinical Case Presentations, 365**
 - Case 1: Lethargic Parrot, **365**
 - Case 2: Macaw with Periorbital Swelling, **366**
 - Case 3: Eagle with Swollen Right Foot, **369**
 - Case 4: Owl with Oral Lesions, **370**
 - Case 5: Hawk with Skin Lesions, **371**
 - References, **374**

SECTION III HERPTILE, 375

- 17. Blood and Bone Marrow Sample Collection and Preparation in Reptiles and Amphibians, 377**
 - Blood Sample Collection, **377**
 - Blood Sample Handling and Preparation, **387**
 - Bone Marrow Collection, **388**
 - References, **389**
- 18. Hematologic Techniques for Quantitative Assessment in Reptiles and Amphibians, 391**
 - Erythrocyte and Plasma Parameters, **391**
 - Leukocyte Parameters, **394**
 - Thrombocyte Parameters, **397**
 - References, **397**
- 19. Evaluation and Interpretation of the Peripheral Blood and Bone Marrow of Reptiles, 399**
 - The Interpretation of the Reptile Hemogram, **399**
 - Reptile Erythrocytes, **399**
 - Factors Affecting the Reptile Erythrogram, **401**
 - Erythrocyte Response to Disease, **404**
 - Reptile Leukocytes, **405**
 - Normal Variation to the Leukogram of Reptiles, **413**
 - Leukocyte Response to Disease, **414**
 - Reptile Thrombocytes, **419**
 - Reptile Blood Parasites, **420**
 - Reptile Hematopoiesis and Bone Marrow Evaluation, **425**
 - References, **428**

- 20. Evaluation and Interpretation of the Peripheral Blood and Bone Marrow of Amphibians, 433**
 - Amphibian Erythrocytes, **433**
 - Amphibian Leukocytes, **435**
 - Amphibian Thrombocytes, **439**
 - Amphibian Blood Parasites, **440**
 - Amphibian Hematopoiesis and Bone Marrow Evaluation, **440**
 - References, **441**
- 21. Herptile Hematology and Clinical Chemistry: Clinical Case Presentations, 443**
 - Case 1: Snake with Nasal Discharge and Mites, **443**
 - Case 2: Snake with Neurologic Behavior and Skin Nodules, **445**
 - Case 3: Comparison of two chelonian respiratory cases, **448**
 - Case 4: Case Series of Chelonian Dystocia and Follicular Stasis, **454**
 - Case 5: Lizard with Limb Lameness, Lethargy, and Anorexia, **463**
 - References, **465**
- 22. Sample Collection for Herptile Cytodiagnosis, 466**
 - Sample Locations, **466**
 - References, **469**
- 23. Herptile Cytodiagnosis, 470**
 - Normal Cytology, **470**
 - Inflammation, **475**
 - Hyperplasia/Benign Neoplasia, **488**
 - Malignant Neoplasia, **489**
 - Effusions, **498**
 - Infectious Agents, **500**
 - References, **511**
- 24. Herptile Cytology and Clinical Chemistry: Clinical Case Presentations, 518**
 - Case 1: Snake with a Bulging Right Eye, **518**
 - Case 2: Lizard with Lethargy and Neurologic Disorder, **521**
 - Case 3: Lizard with Skin Lesion, **524**
 - Case 4: Thin Snake with Swollen Mouth, **524**
 - Case 5: Snake with Diarrhea, **527**
 - References, **528**

SECTION IV FISH, 529

- 25. Blood Sample Collection and Preparation in Fish, 531**
 - Blood Sample Collection, **531**
 - Blood Sampling Handling and Preparation, **537**
 - References, **539**
- 26. Hematologic Techniques for Quantitative Assessment in Fish, 541**
 - Erythrocyte and Plasma Parameters, **541**
 - Leukocyte Parameters, **545**
 - Thrombocyte Parameters, **546**
 - Whole Blood Preservatives, **547**
 - References, **547**
- 27. Evaluation and Interpretation of the Peripheral Blood of Fish, 549**
 - Fish Erythrocytes, **549**
 - Factors Affecting the Piscine Erythrogram, **552**
 - Erythrocyte Response to Disease, **554**
 - Fish Leukocytes, **556**
 - Variations in the Leukogram of Fish, **565**

- Fish Thrombocytes and Hemostasis, **567**
- Fish Blood Parasites, **569**
- Viral Inclusions, **570**
- References, **571**
- 28. Piscine Hematopoiesis, 575**
 - References, **576**
- 29. Piscine Hematology and Clinical Chemistry: Clinical Case Presentations, 578**
 - Case 1: Nurse Shark with Excessive Gilling, **578**
 - Case 2: Reticulated Stingray with Bite Wounds, **581**
 - Case 3: Southern Stingray with Anorexia, **582**
 - Case 4: Knifefish with Tail Wound, **586**
 - Case 5: Toadfish Found Abnormally Floating, **586**
 - References, **591**
- 30. Sample Collection for Wet Mounts and Cytodiagnosis in Fish, 593**
 - Sampling Techniques for Wet Mounts, **593**
 - Sampling Techniques for Cytodiagnosis, **596**
 - References, **599**
- 31. Wet-Mount Microscopy in Fish, 600**
 - Sample Evaluation, **600**
 - Nonparasitic Pathogens, **603**
 - Cutaneous Fish Parasites, **605**
 - Nonpathogenic Organisms, **618**
 - References, **619**
- 32. Wet-Mount Microscopy in Fish: Clinical Case Presentations, 622**
 - Case 1: Tiger Barb with Skin and Behavior Changes, **622**
 - Case 2: Newly Arrived Goldfish, **622**
 - Case 3: Cichlid with a Missing Eye, **624**
 - Case 4: Catfish with Rapid Breathing and Lethargy, **625**
 - Case 5: Damselfish with Skin Lesions and Behavior Changes, **625**
- 33. Piscine Cytodiagnosis, 627**
 - Skin, **627**
 - Calcinosis Circumscripta, **630**
 - Fecal Cytology, **630**
 - Mycobacteriosis, **630**
 - Saprolegniasis, **631**
 - Thyroid, **631**
 - Hepatic Lipidosis, **631**
 - Neoplasia, **631**
 - Effusions, **635**
 - Parasites, **636**
 - Sample Contamination, **636**
 - References, **637**
- 34. Piscine Cytology and Clinical Chemistry: Clinical Case Presentations, 639**
 - Case 1: Shark with Cutaneous Nodules, **639**
 - Case 2: Trout with a Mass on Mandible, **640**
 - Case 3: Seahorse with Possible Gas Bubble Disease, **643**
 - Case 4: Carp with Swollen Operculum, **644**
 - Case 5: Perch with Mass on Left Gill, **645**
 - References, **647**

Appendices, **648**A. Stains and Solutions Used in Hematology and Cytology, **648**Acid-Fast Stain, **648**Gram's Stain, **648**Macchiavello's Stain, **649**Modified Giménez Stain, **649**New Methylene Blue Stain, **650**Standard Natt and Herrick's Solution and Stain, **650**Elasmobranch-Modified Natt and Herrick's Solution and Stain, **651**Quick or Stat Stains, **651**Sudan III and Sudan IV Stains, **652**Wright–Giemsa Stain, **652**B. Hematologic Values, **653**C. Plate Captions, **663**Mammal Plates, **663**Avian Plates, **665**Herptile Plates, **668**Piscine Plates, **676**D. Common Artifacts Found in Blood Film and Cytologic Samples, **681**Artifacts Associated with Contamination of the Sample, **681**Artifacts Associated with Poor Sample Preparation, **683**Index, **686**
