Preface, viii

Acknowledgments, ix

About the Companion Website, xi

Introduction, 1

Chapter 1 Shape on Low Power, 23

Epidermis

Regular acanthosis, 25

Lobular proliferation, 29

Reticulated proliferation, 35

Central pore, 42

Epidermal perforation, 46

Dermis

Circular islands, 49

Cords/tubules and comma shapes, 53

Space with a lining, 59

Papillations, 70

Polypoid (dome-shaped), 77

Square/rectangular, 82

Palisading reactions, 88

Pseudoepitheliomatous hyperplasia above abscesses, 95

Pink ball, (see Chapter 6)

Chapter 2 Gestalt: Rash/inflammatory, 99

Epidermal changes

Parakeratosis, 101

Spongiosis, 104

Papulosquamous (psoriasiform), 108

Interface (vacuolar), 114

Interface (lichenoid), 119

Inflammation: Specific patterns and cell type

Epidermal eosinophils, 125

Perivascular, 129

Band-like dermal/papillary dermal infiltrate, 133

Diffuse/nodular, 139

Subcutaneous, 146

Chapter 3 Cell Type, 153

Melanocytic, 155

Spindle cells, 168

Pleomorphic cells, 186

Epithelioid vs spindle vs pleomorphic cells, 187

Endothelial, 188

Giant, 202

Clear, 212

Chapter 4 Top-Down, 229

Arthropods, 231

Hyperkeratosis/parakeratosis, 237

Upper epidermal change, 244

Acantholysis, 254

Subepidermal space/cleft, 264

Granular “material” in cells, 271

“Busy” dermis, 276

Dermal material, 279

Fat necrosis, 292

Chapter 5 Color – Blue, 295

Blue tumor, 297

Lymphocytes, 307

Mucin and glands or ducts, 315

Mucin, 319

Chapter 6 Color – Pink, 327

Pink ball of spindle cells, 329

Pink material, 332

Pink dermis, 339

Epidermal necrosis, 341

Chapter 7 Miscellaneous, 347

Alopecia, 349

Immunohistochemistry, 354

Index (Pattern), 361

Index (Histological Category), 366

Index (Alphabetical), 369
