

SECTION 1 Basic Principles and Concepts

- 1 The New Perspectives on the Face (contributed by M. MICHAEL COHEN JR.)
- 2 Pioneers and Milestones in the Field of Orthodontics and Orthognathic Surgery
- 3 Definition and Prevalence of Dentofacial Deformities
- 4 Hereditary, Developmental, and Environmental Influences on the Formation of Dentofacial Deformities
- 5 Orthodontic Considerations in the Evaluation and Treatment of Dentofacial Deformities
- 6 Periodontal Considerations in the Evaluation and Treatment of Dentofacial Deformities
- 7 Psychosocial Considerations in the Evaluation and Treatment of Dentofacial Deformities
- 8 Speech, Mastication, and Swallowing Considerations in the Evaluation and Treatment of Dentofacial Deformities
- 9 Temporomandibular Disorders: Effects of Occlusion, Orthodontic Treatment, and Orthognathic Surgery
- 10 Nasal Airway Considerations in the Evaluation and Treatment of Dentofacial Deformities
- 11 Anesthesia Techniques, Blood Loss/Fluid Replacement, Airway Management & Convalescence in the Treatment of Dentofacial Deformities

SECTION 2 Planning, Surgical Technique, and Complications

- 12 Orthognathic Surgery Treatment Planning
- 13 Standard Analytic Model Planning for Orthognathic Surgery
- 14 Mandible-First Analytic Model Planning for Orthognathic Surgery
- 15 Sequencing of Orthognathic Procedures: Step-by-Step Approach
- 16 Complications Associated with Orthognathic Surgery
- 17 Malocclusion after Orthodontics and Orthognathic Surgery: Prevention and Treatment Pitfalls
- 18 Grafts Frequently Used During Orthognathic Surgery and for Adjunctive Procedures
- 19 Virtual Surgery Planning (NEW CHAPTER)
