

Chapter 1. An introduction to short cases and Observed Structured Clinical Examinations - OSCEs

Frequently asked questions

Chapter 2. Early to mid-clinical years

- Station 1. History - chest pain and dyspnoea
- Station 2. Take a history - abdominal pain
- Station 3. Take a history - headache
- Station 4. Wash hands and scrub for theatre
- Station 5. Take the pulse and blood pressure (add pulses)
- Station 6. Examine the fingernails
- Station 7. Examine a lump
- Station 8. Examine a body system (cardiovascular) (case 16 - expand)
- Station 9. Examine a body system (respiratory)
- Station 10. Examine a body system (abdomen)
- Station 11. Examine a body system (upper cranial nerves)
- Station 12. Examine a body system (lower cranial nerves)
- Station 13. Examine a body system (arms neurologically)
- Station 14. Examine a body system (legs neurologically)
- Station 15. Examine the neck (thyroid)
- Present your findings
- Examiners' likely questions
- Station 16. Examine the neck lymph nodes
- Station 17. Basic cardiac life support

Chapter 3. Intermediate clinical years

- Station 18. Cardiovascular risk factors history
- Station 19. Obesity history
- Station 20. Obesity examination
- Station 21. Cardiac disease examination
- Station 22. Examine a patient with hypertension
- Station 23. Assess a patient with recent myocardial infarction
- Station 24. Peripheral oedema
- Station 25. Perform an Electrocardiogram ECG
- Station 26. Assess a chronic cough
- Station 27. History in a patient with breathlessness
- Station 28. Examination of a patient with breathlessness
- Station 29. Examine a patient with haemoptysis
- Station 30. Take an occupational lung history
- Station 31. Advise on smoking cessation
- Station 32. Examination of jaundice
- Station 33. Liver failure
- Station 34. Alcohol cessation
- Station 35. Abdominal pain, diarrhoea and bloating
- Station 36. Perform a rectal examination
- Station 37. Take a history of inflammatory bowel disease
- Station 38. Inguinal or femoral hernia
- Station 39. Polycystic kidneys
- Station 40. Lymphoma
- Station 41. Rheumatoid arthritis chronic disease history
- Station 42. Examine the hands
- Station 43. Examine the knees
- Station 44. Examine the feet
- Station 45. Examine the back
- Station 46. Take a history from a patient with osteoarthritis
- Station 47. Examine a patient diagnosed as having osteoarthritis
- Station 48. Hypothyroidism
- Station 49. Systemic lupus erythematosus history
- Station 50. SLE examination
- Station 51. Take a history from a patient with diabetes
- Station 52. Examine a patient with type I diabetes
- Station 53. Take a history for suspected osteoporosis
- Station 54. Acromegaly history
- Station 55. Acromegaly examination
- Station 56. Weight gain (suspected Cushing's syndrome)
- Station 57. Sudden visual loss

Station 58. Sclera and conjunctiva
Station 59. Sore throat
Station 60. Earache
Station 61. History from an older patient
Station 62. Examination of an older patient
Station 63. A history of falls
Station 64. Examination of a patient with a history of falls
Station 65. Mental state examination
Station 66. Depression
Station 67. Pigmented skin lesion
Station 68. Elbow rash
Station 69. Rash on the trunk
Station 70. Pruritic rash
Station 71. Examine for skin disease
Station 72. Examining a tremor
Station 73. Suspected sexually transmitted disease
Station 74. Breast examination
Station 75. Urinalysis testing
Station 76. Peak flow and Spirometry
Station 77. Cannulation
Station 78. Male catheter insertion

Chapter 4: Final year

Station 79. Stoma assessment
Station 80 Handover of a patient
Station 81. The angry patient
Station 82. Breaking bad news
Station 83. Cross-cultural communication
Station 84. Consenting for a procedure - blood transfusion
Station 85. Interpreting an ECG
Station 86. Interpreting a chest X ray
Station 87. Arterial blood gas interpretation
Station 88. The septic patient: a rapid assessment
Station 89. Explaining a disease - asthma
Station 90. Advanced cardiac life support
Station 91. Atrial fibrillation and anticoagulation
Station 92. Heart transplant
Station 93. Low back pain
Station 94. Multiple sclerosis
Station 95. HIV History Taking
Station 96. Pre-operative assessment history
Station 97. Pre-operative assessment examination
Station 98. Opioid prescription
Station 99. A colleague is reported to be drinking excessively
Station 100. Completing a do not resuscitate order
Station 101. Confirmation of death
Station 102. Explaining a disease - type II diabetes
