

PART I: Assessment, Evaluation, and Target Symptoms

PART IA: Assessment and Evaluation

Chapter 1. Epidemiology

Chapter 2. Psychiatric Assessment and Treatment

Chapter 3. Pediatric and Neurological Assessments

Chapter 4. Gender Dysphoria, Gender Incongruence, and Sexual Identity

Chapter 5. Racial and Ethnic Disparities in Assessment and Evaluation

Chapter 6. Digital Biomarkers in Diagnostics and Monitoring

PART IB: Target and Comorbid Symptoms

Chapter 7. Social Communication

Chapter 8. Diet and Nutrition

PART II: Causes

PART IIA: Overview

Chapter 9. Genetics and Genomics

Chapter 10. Epigenomics

Chapter 11. Prenatal, Perinatal, and Parental Risk Factors

Chapter 12. Animal Models

Chapter 13. Electrophysiological Studies

Chapter 14. Environmental Toxicity and Immune Dysregulation

PART IIB: Syndromic Causes

Chapter 15. Overview of Syndromic Causes of Autism and Commonalities in Neurobiological Pathways

Chapter 16. Fragile X Syndrome and Associated Disorders

Chapter 17. Tuberous Sclerosis Complex

Chapter 18. 16p11.2 and Other Recurrent Copy Number Variants Associated With ASD Susceptibility

Chapter 19. Rett Syndrome

Chapter 20. Prader-Willi Syndrome

PART IIC: Imaging and Anatomy

Chapter 21. Neuroanatomical Findings

Chapter 22. The Amygdala in ASD

Chapter 23. Neurobiology of ASD Informed by Structural Imaging Research

Chapter 24. Positron Emission Tomography

Chapter 25. Functional Magnetic Resonance Imaging

PART III: Treatments and Interventions

PART IIIA: Standard Pharmacological Treatments

Chapter 26. Serotonergic Medication

Chapter 27. Antipsychotics

Chapter 28. Treating Hyperactivity in Children With Pervasive Developmental Disorders

PART IIIB: Experimental Therapeutics

Chapter 29. Complementary and Integrative Approaches

Chapter 30. Oxytocin

Chapter 31. Vasopressin

Chapter 32. N-Acetylcysteine

Chapter 33. Arbaclofen: From Animal Models to Clinical Trials

Chapter 34. Cannabis, Cannabinoids, and Immunomodulatory Agents

PART IIIC: Behavioral and Educational Interventions

Chapter 35. Behavioral Treatments

Chapter 36. Early Start Denver Model

Chapter 37. The Developmental, Individual Difference, Relationship-Based Intervention Model: A Comprehensive Parent-Mediated Approach

Chapter 38. School-Based Interventions

Chapter 39. Language and Communication: Challenges and Treatments

PART IIID: Future Treatment Developments

Chapter 40. Transcranial Magnetic Stimulation

Chapter 41. Stem Cell and Gene Therapy

Chapter 42. Gene Therapy and Molecular Interventions

PART IV: Consortia, Employment, and Advocacy

Chapter 44. Consortia:

Developing Precision Medicine Approaches to ASD Conditions

Autism Biomarkers Consortium for Clinical Trials

Interactive Autism Network

Chapter 45. Autism Strengths and Neurodiversity

Chapter 46. Role of Patient Advocacy Groups in Treatment Development
