

Part 1: Introduction to EEG
Chapter 1.1: Overview of Seizures and Epilepsy
Chapter 1.2: Role of EEG in Diagnosis and Management
Part 2: Basic Science of EEG
Chapter 2.1: Physiology
Chapter 2.2: Electronics
Chapter 2.3: Generators of EEG Activity
Part 3: Seizure Semiology and Classification
Chapter 3.1: Definitions
Chapter 3.2: Overview of Seizure Semiology
Chapter 3.3: Seizure Classification
Chapter 3.4: Seizure Semiology by Seizure Type and Seizure Localization
Part 4: Epilepsy Classification and Epileptic Syndromes.
Chapter 4.1: Epilepsy Classification
Chapter 4.2: Select Epilepsy Syndromes Seen in Adulthood
Part 5: Clinical EEG
Chapter 5.1: Terminology and Definitions
Chapter 5.2: EEG Basics
Chapter 5.3: Normal EEG
Chapter 5.4: Abnormal Non-Epileptiform EEG
Chapter 5.5: Abnormal EEG in Epilepsy - Interictal Epileptiform and Ictal Discharges
Chapter 5.6: Status Epilepticus
Chapter 5.7: Advanced Techniques
Part 6: Pediatric EEG
Chapter 6.1: Normal Pediatric EEG
Chapter 6.2: Abnormal Pediatric EEG
Chapter 6.3: Pediatric Seizures
Part 7: Differential Diagnosis.
Chapter 7.1: Overview
Chapter 7.2: Psychogenic Nonepileptic Events
Chapter 7.3: Syncope
Chapter 7.4: Other Disorders Mistaken For Seizures
Part 8: Seizure Management
Chapter 8.1: Management of Pediatric Seizures
Chapter 8.2: Management of Adult Seizures/Epilepsy
Chapter 8.3: Management of Status Epilepticus
Chapter 8.4: Non-Medical Treatment
Chapter 8.5: Surgical Treatment of Epilepsy
Chapter 8.6: Comorbidities
Chapter 8.7: Quality Of Care Standards and Counseling
Chapter 8.8: Medications A-Z
Part 9: Samples and Case Discussions
Chapter 9.1: Teaching Case Discussions with Dr. Abou-Khalil
Chapter 9.2: Pediatric Teaching Case Discussions with Dr. Ess
Chapter 9.3: Teaching Case Discussions with Dr. Sonmezturk
Chapter 9.4: EEG Examples
