

HISTORY OF ECMO

- 1 From the first ECMO patient into the future

TECHNICAL AND PROGRAMMATIC ASPECTS OF ECMO

- 2 Development and staffing of an ECMO service
- 3 ECMO configurations and cannulation in pediatric patients
- 4 ECMO configurations and cannulation in adult patients
- 5 The ECMO circuit and trouble shooting
- 6 Echocardiography in the management of ECMO patients
- 7 Airway management in ECMO patients
- 8 Acute renal failure and renal replacement therapy in ECMO patients
- 9 Ambulance ground transportation of ECMO patients
- 10 Fixed-wing and helicopter air transport of ECMO patients
- 11 Implications and experiences with long run ECMO

ECMO BLOOD INTERACTION

- 12 The unholy blood - biomaterial interaction in extracorporeal
- 13 Heparin anticoagulation for Trans-catheter Aortic Valve Implantation on ECMO
- 14 Bivalirudin for alternative anticoagulation in heparin induced thrombocytopenia during ECMO
- 15 Argatroban for anticoagulation in pediatric and adult ECMO
- 16 ECMO transfusion and coagulation management

PHARMACOLOGICAL CONSIDERATIONS FOR ECMO

- 17 Pharmacological considerations for analgesia and sedation of ECMO
- 18 Challenges of antimicrobial therapy in ECMO patients
- 19 Vasopressor and inotropic support in ECMO patients with refractory shock

ECMO IN NEONATAL AND PEDIATRIC RESPIRATORY DISEASE

- 20 ECMO for Meconium Aspiration Syndrome
- 21 ECMO for neonatal pulmonary hypertension and associated
- 22 ECMO in Congenital Diaphragmatic Hernia
- 23 Evidence and management of rare presentations in neonatal ECMO
- 24 ECMO for the pediatric patient with Status Asthmaticus
- 25 ECMO for pediatric pneumonia and sepsis
- 26 ECMO in pediatric lung transplantation
- 27 Weaning and decannulation of neonatal and pediatric respiratory ECMO support

ECMO IN NEONATAL AND PEDIATRIC CARDIAC DISEASE

- 28 ECMO in pediatric patients with univentricular circulation
- 29 ECMO in pediatric patients with congenital heart disease
- 30 Extracorporeal cardiopulmonary resuscitation in children
- 31 ECMO as a bridge to pediatric heart transplantation

32 Weaning and decannulation of pediatric cardiac ECMO

ECMO IN ADULT RESPIRATORY DISEASE

- 33 Venovenous ECMO for Acute Respiratory Distress Syndrome
- 34 Extracorporeal CO₂ removal to enhance protective ventilation in ARDS
- 35 ECMO in Middle Eastern Respiratory Syndrome (MERS-CoV)
- 36 ECMO in SARS-CoV-2 (COVID-19) patients
- 37 ECMO in pregnancy and the peripartum patient
- 38 ECMO in sickle cell disease and acute chest syndrome
- 39 ECMO for severe respiratory failure secondary to HIV infection
- 40 Bicaval dual lumen ECMO cannulation for lung transplantation
- 41 Weaning and liberation from V-V ECMO

ECMO IN ADULT CARDIAC DISEASE

- 42 ECMO support for adults with congenital heart disease
- 43 ECMO for myocardial infarction with cardiogenic shock
- 44 ECMO support for patients with myocarditis
- 45 Left ventricular venting strategies during ECMO support
- 46 ECMO support for patients with major aortic surgery or dissection
- 47 Mechanical support for post-cardiotomy right ventricular failure
- 48 ECMO for the complicated post-cardiotomy cardiac arrest
- 49 ECMO for accidental hypothermia and cardiorespiratory arrest
- 50 ECMO support for pulmonary embolism
- 51 Extracorporeal cardiopulmonary resuscitation in adults
- 52 Bridging from ECMO to durable left ventricular assist device
- 53 ECMO in the management of heart transplantation
- 54 Weaning and liberation from V-A ECMO

ECMO IN THE ADULT TRAUMA PATIENT

- 55 ECMO for hemorrhagic shock after blunt trauma
- 56 ECMO in patients with burn and smoke inhalation injury

REHABILITATION, NEUROLOGICAL AND ETHICAL ASPECTS OF ECMO

- 57 ECMO in the awake patient, early extubation and physical rehabilitation
- 58 Neurodevelopmental outcome after pediatric cardiac ECMO support
- 59 Neurologic complications in adult ECMO
- 60 Management of ECMO complicated by intracranial hemorrhage
- 61 Neurological monitoring and determination of brain death in ECMO
- 62 Ethical considerations for ECMO initiation and end-of-life care
