

## **SECTION 1 Foundations**

- 1 Anatomy of the Mitral Valve
- 2 Pathophysiology of Mitral Valve Disease
- 3 ACC/AHA Guidelines and Treatment Options for Mitral Valve Disease

## **SECTION 2 Diagnostic Tools**

- 4 Physical Examination
- 5 Transthoracic Echocardiogram
- 6 Diagnostic Tools: Transesophageal Echocardiography for Mitral Valve
- 7 Special Imaging Considerations for Transcatheter Mitral Therapy
- 8 Cardiac Magnetic Resonance Imaging for Mitral Regurgitation
- 9 Computed Tomography Scan in Mitral Valve Disease and Its Treatments
- 10 Cardiac Catheterization

## **SECTION 3 Medical Treatment**

- 11 Diuretics and Neurohormonal Medications
- 12 Cardiac Rhythm Management Implantable Devices

## **SECTION 4 Surgical Therapies**

- 13 Medical Devices and Instruments
- 14 Myocardial Protection and Perfusion Techniques in Mitral Valve Surgery
- 15 Mitral Operation: Sternotomy Approach
- 16 Mitral Valve Surgery: Right Thoracotomy Approach
- 17 Mitral Operation: Endoscopic Approach
- 18 Mitral Operation: Robotic Approach
- 19 Surgical Repair of the Mitral Valve
- 20 Surgical Replacement of the Mitral Valve
- 21 Evaluation, Common Pitfalls, and Complications

## **SECTION 5 Transcatheter Therapies**

- 22 Transcatheter Mitral Valve Repair
- 23 Transcatheter Valvuloplasty
- 24 Transcatheter Mitral Valve Replacement
- 25 Percutaneous Mitral Valve Interventions: Evaluation, Pitfalls, and Complications

## **SECTION 6 Developing Successful Programs**

- 26 Developing Successful Structural Heart Programs
- 27 Quality Improvement and Outcomes
- 28 Establishing a Comprehensive Mitral Valve Program: Educating Patients and Referring Physicians
- 29 Ten Elements for a Successful Mitral Program
