

1. Technical background, patient preparation, quality/safety

- 1.1: Key hardware components, *Marcel van Straten, Sebastian Vandermolen, and Francesca Pugliese*
- 1.2: Technical specifications, *Ulrike Haberland and Thomas Allmendinger*
- 1.3: Physical background of radiation, *Alexia Rossi, Martina DeKnegt, and Jens Hove*
- 1.4: Patient selection and preparation, *Ronak Rajani and Mihaly Karolyi*
- 1.5: Scanner setup and image acquisition protocols, *Ulrike Haberland, Thomas Allmendinger, and Francesca Pugliese*
- 1.6: Image reconstruction, post-processing and analysis, *Jamal Khan, Sarah Mohareem-Elgamal, and Francesca Pugliese*
- 1.7: Radiation exposure, *Anna Beattie and Francesca Pugliese*
- 1.8: Image artifacts, *Oliver Gaemperli*
- 1.9: Tips and tricks to improve image quality, *Mohamed Marwan and Mihaly Karolyi*
- 1.10: Contrast agents and injection protocols, *Casper Muhl and Bibi Martens*
- 1.11: Challenging scenarios, *Ricardo Budde, Sarah Mohareem-Elgamal, and Francesca Pugliese*

2. Indications: Coronary artery disease

- 2.1: Coronary artery calcium imaging, *Martin Willemink*
- 2.2: Coronary CT angiography interpretation and reporting, *Balint Szilveszter, Csilla Celeng, Richard Takx, and Pál Maurovich-Horvat*
- 2.3: Patients with chronic coronary syndrome, *Tessa Genders*
- 2.4: CT-based fractional flow reserve, *Domenico Mastrodicasa*
- 2.5: Myocardial perfusion and scar imaging, *Koen Nieman and Gianluca Pontone*
- 2.6: Atherosclerotic plaque imaging, *Marton Kolossvary*
- 2.7: Stents and bypass grafts, *Sujana Balla and Koen Nieman*
- 2.8: Coronary anomalies, *Andrew Chang, Ian Rogers, and Koen Nieman*
- 2.9: Patients with acute coronary syndrome, *Admir Dedic and Murat Arslan*
- 2.10: Graft vasculopathy in transplanted hearts, *Andrea Bartykowszki*

3. Non-CAD indications

- 3.1: Ventricular dimensions and function, *Richard Takx and Csilla Celeng*
- 3.2: Cardiac reference values, *Giuseppe Muscogiuri*
- 3.3: Aortic valve disease, *Giuseppe Muscogiuri*
- 3.4: Preprocedural aortic valve assessment, *Marco Guglielmo*
- 3.5: Mitral valve disease, *Marco Guglielmo*
- 3.6: Postprocedural valve assessment, *Andrea Baggiano*
- 3.7: Left atrium and pulmonary veins, *Marco Guglielmo*
- 3.8: Infective endocarditis, *Andrea Baggiano*
- 3.9: Great thoracic vessels, *Michael Messerli*
- 3.10: Adult congenital heart disease, *Andreas Giannopoulos*
- 3.11: Cardiomyopathies, *Dominik Benz*
- 3.12: Cardiac masses, *Andreas Giannopoulos*
- 3.13: Pericardial disease, *Sarah Mohareem*
- 3.14: Implanted cardiac devices, *Dominik Benz*
- 3.15: Extracardiac findings, *Michael Messerli*
- 3.16: Artificial intelligence, *Marton Kolossvary*

4. Training and competence in cardiac CT

- 4.1: EACVI certification standards in Cardiac CT, *Andrea Baggiano*
